NO CHARITY FOR THE IDLE.

With the return of cool weather, and the approach of wintry weather, there must come to a large class of the negro race, the thought of how shall it pass through the months when shelter, heat and food must be had, in order that life can be maintained.

It is this class of idle negroes who can live during the warm months without doing work, or at the most, by taking odd jobs, which must soon be considering.

It lives for the day, does this class of negroes, male and female, and it takes pressing physical needs to make it work.

During the summer it is not forgotten how difficult it was to get help, male or female, and during this Fall, today, labor is hard to procure to pick cotton, or for work of all kinds.

The hardships of cold, the need of shelter and substantial food have not yet pressed upon this idle class of negroes. They are indifferent to the future, will not work, and yet while a few weeks, with snow on the ground, frost filling the air, the idlers will be seeking charity, and practically demanding of the thrifty part of the community that they be clothed, fed and sheltered, and this without any effort on their part to offer to work as an equivalent for food, shelter and clothing.

To see and have persons suffer and perish, unless helped, is hardly to be thought of, but why should those who work be made to support those who will not?

Just how the appeals for assistance of the idle negroes will be met this winter, remains to be seen.

Those who have sought to hire in the summer and fall these same cold weather suppliants, and were laughed at, are likely to be, and rightly so, rather chary of giving aid to those who refused work when offered them.

The working man or woman is ever entitled to aid, but the idle class can make no claim for support, either summer or winter.

Decline of the "Tip" Habit. "Tipt" to porters, waiters and other functionaries are said to be decreasing in amount. A man is no longer ashamed to offer a Pullman car impresario a dime, and the recipient no longer treats the donor of such a small honorarium with scorn.—Minneapolis Tribune.

Cured of Chronic Diarrhoea After Thirty Years of Suffering.

"I suffered for thirty years with diarrhoea and thought I was past being cured," says John S. Holloway, of French Camp, Miss. "I had spent so much time and money and suffered so much that I had given up all hopes of recovery. I was so feeble from the effects of the diarrhoea that I could do no kind of labor, could not even travel, but by accident I was permitted to find a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, and after taking several bottles I am so pleased with the result that I am anxious that it be in reach of all who suffer as I have." For sale by F. S. Duffy & Co.

A NOVEL LIGHTSHIP.

It is Operated Automatically and Does Not Need a Crew. The new lightship at Otter Rock, West Scotland, has some novel features, says a cable dispatch from London to the New York Sun. It is built of steel of extra strength and the hull is divided into three watertight compartments, of which the middle one contains two large steel gas holders. A lantern is placed on a cylindrical mast at a height of twenty-five feet. There is a large bell, which has not only an ordinary tongue, but is made to strike as the vessel rolls. There is also a special clapper which is operated by the passage of gas from the holder to the burner. No crew is needed. The supply of gas is sufficient to operate the light and the bell for several months without any attention.

Henry Braydon Harris, N. C., says:

"I took medicine 20 years for asthma but one bottle of One Minute Cough Cure did me more good than anything else during that time. Best Cough Cure." F. S. Duffy.

Chester's Suggestion.

At a recent distribution of prizes at the London University college Embassador Chester suggested that a number of picked boys from the schools and universities of England be sent to the schools and universities in the United States and a corresponding number of American boys be sent to English schools. Such a course, Mr. Chester thinks, "would do a great deal to promote the harmony, kindly feeling and altogetherness of the two countries."

A Night of Terror.

"Awful anxiety was felt for the widow of the brave General Burnham of Mechanics, Me., when the doctors said she would die from pneumonia before morning," writes Mrs. S. H. Lincoln, who attended her that fearful night, but she begged for Dr. King's New Discovery, which had more than once saved her life, and cured her of Consumption. After taking the sleep all night. Further aid entirely cured her." This marvellous medicine is guaranteed to cure all Throat, Chest and Lung Diseases. Only 50c and \$1.00. Trial bottles free at C. D. Bradham's drug store.

Never Wanted to Be at Home.

"Oh, you men, you men! When you used to call on me before we were married, it was all you could do to tear yourself from me at midnight. Now you are never so happy as when you are away from home." Mr. Griffin—But you seem to forget, Fannie, that I was away from home in those courtship days when it was so hard to tear myself away.—Boston Transcript.

Novo Scotia's Burning Mine.

The coal shaft is about a thousand feet deep, and the seam is thirty feet thick. It has been on fire since 1850, and the problem of putting it out is no nearer a solution than it was twenty years ago. Water has been let in, but the fire is above the sea level, and the flooding has had no effect. After many futile efforts to extinguish the fire engineers began to direct their efforts toward devising plans for circumventing it and reaching the coal still intact. To that end all the workings and approaches leading to the fire were walled up, and new workings were driven lower down. But every plan so far devised has been a failure. The all consuming fire has broken through, and every new work has been reluctantly abandoned.—Toronto Globe.

The Schenk Sex Theory.

A Berlin dispatch to the London Post quotes Professor Schenk as saying in a lecture the other day that in his student days he kept silkworms, and having little means to feed either himself or his pets, they often hungered. He was struck with the fact that the progeny of the worms were nearly all male. Carrying his investigations further, he came to the conclusion that diet exercised an enormous influence on the formation of the sex, which, he maintains, is predetermined in the egg. To influence a dietary system must therefore be pursued for some months.

NEW STOCKING DEVICE.

Roberts' Knitting Machine. Howard H. Harbaugh, with industry connected with a hosiery company near Kenosha, Wis., has been granted a patent upon an attachment for knitting machines that is a great improvement over anything of the kind in use heretofore, says the Chicago Record-Herald.

The attachment, which is designed to be attached to any knitting machine using the vertical stroke method, is intended to join the upper or ribbed portion of a stocking to the lower portion. These two parts, being knitted with different stitches, are knitted upon separate machines, and considerable trouble has been experienced in finding a method of joining them together smoothly. Up to a short time ago all the mills in the country joined them by sewing the parts together, but by Mr. Harbaugh's invention it is possible to knit them together in such a fashion that it is impossible to tell that they were not knit upon the same machine. Mr. Harbaugh has been working upon this scheme for several years and has already been granted four patents upon different styles of the attachment, but he claims this last one far exceeds in efficiency any that has gone before. It can be attached to any knitting machine, with slight alterations, and will undoubtedly find ready recognition among all manufacturers.
