#### DECEPTIVE VOLUNTARY PUB-LICITY.

The Chattanooga Tradesman makes strong point when it takes issue with the New York Commercial, in the latter's placing so much value on the voluntary statements made public of the business of the great corporations, notably the United States Steel Trust.

On this subject the Tradesman says:

That none of the statements of condition issued by great corporations are complete, not one. They do not answer to any intelligent demand for publicity of their capitalization and operations. The omission of a single fundamental fact vitiates and renders comparatively worthless the very fairest of these reworthless the very lairest of these re-ports. They do not state the actual capital paid in. Without that fact as a basis the entire report is misleading. Take the case of the steel corporation. Its reports proceed on the assumption that every dollar of \$1,880,000,000 of stocks and bonds issued as capital represents actual investment. This when the world knows that there is an enormous amount of "water" in those issues. Experts do not know how much is water and how much is reality; but competent judges say that for one-half of the sum stated the entire properties of the corporation can be duplicated on the most modern and improved lines and supplied with working capital. Others say the investment, including working capital, represents not more than \$550,000,000, all the rest of the colossal pile being improvement. being imaginary, if we may use such a word. This is rank dishonesty at the basis, forming the foundation of the statement; and it inevitably follows that the superstructure is honeycombed with

But no business man or sensible per son is taken in by these "voluntary" public exhibits, no matter how much or who may parade such showings as being in the interest of better commercial in-

Every National bank statement shows positively the amount of stock paid in, and so in the great corporations, what stock has been paid in is the basis for the reader to judge what the corporation is doing when looking over the voluntary statements given out for the pub-

This kind of voluntary publicity is about on a par with the line of argument that some of these great manufacturing corporations are "infant industries" and, need protection as their goods more cheaply abroad than in the home market.

If their is to be any voluntary publicity, it should at least be honest, which would give it a certain and definite value to the public which these statements do not now possess.

## Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. there is only one way to cure deafness and that is by constitutional remedie Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect bearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tabe restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

A Translator's Story.

An interesting little story attaches to the volume of Swedish fairy tales which Mr. H. I. Brackstad has transwhich Mr. H. I. Brackstad has translated. Years ago a Swediah friend gave Mr. Brackstad a book, saying, "Here is something you will like." He turned over the pages with the remark, "It isn't Swedish, is it, for I know Swedish?" "Not Swedish," was the reply, "but Swedish dialect." "Ah." said Mr. Brackstad, "can I manage to year such He tried several times, not very successfully. But one day he began to read the dialect sloud, and then he un erstood it at once. It resembled the dialect of a part of his own country, Denmark, and had been taken down phonetically.-London Chronicle.

A Queer Provision in a Will. The following will, though not espe cially curious in itself, throws a curi ous light on the streets of London in the seventeenth century. Strawberries. Why are they called "straw"-berries? Smart men differ on that. Some say i is on account of their hollow, strawlike stems. Others think it is because they have to be covered with straw or simi ar protecting material in winter. most classical explanation is that our Anglo-Saxon forefathers used to raise them and they gave them this name because the berries are generally on the ground-that is, "strewed" or "strawed" around.

## SPLENDID BLUNDERS.

Besse Errors That Have Been Perpetrated by the Types.

Errors of the press often begin with errors of reporters who have misunderstood spoken words. The rule of follow copy compels the compositor to reposit the exact words written by the reporter, and the following blunders are the result of obedience to this rule. A speaker made this statement:

"In these days clergymen are expected to have the wisdom and learning of Jeremy Taylor." But the reporter

Jeremy Taylor," But the reporter wrote and the compositor repeated "the wisdom and learning of a journeyman tallor."

Another speaker quoted these lines:

Oh, come, thou goddess fair and free, In heaven yelept Euphrosyne. They were printed as written:

Oh, come, thou goddess fair and free, In heaven she crept and frose her knee. Another orator quoted this line from Tennyson's "Locksley Hall:" Better fifty years of Europe than a cycle of Cathay.

But the quotation was written and

Better fifty years of Europe than a circus in Bombay. One of the worst perversions of a hackneyed quotation, incorrectly given by the speaker, is this, which seems to the joint work of the zealous reporter and the equally reckless printer: imicus Plato, amicus Socrates, sed major

#### Meanness Saved Him.

A prominent clergyman used to tell of one of his parishioners who had been very sick. A physician had given him some medicine and told him he could go out, but under no circumstances was he to get wet. The man went out on the farm, and a shower of rain came up suddenly. There was no shelter near, and to save himself he crawled into a hollow log. The action of the rain caused the log to shrink so as to endanger his life.

He could not move, and, being brought face to face with death, the whole of his past life came before him as in a panorama. He remembered the days of his childhood, his entrance upon life, his successes and his sins; then he remembered last of all that when he left home that morning he refused his wife, when she asked him, for 50 cents for the church, and the thought made him feel so small that he had no difficulty in getting out of the log.
