DEMOCRATIC IDIOCY.

It is just such speeches as that made in Congress last week, by Representative Wheeler, of Kentucky, that warrants the long cared animal being named and maintained as the most fitting representative of National Democracy.

It is this exhibit and full display of idiocy, which makes the Democratic party ridiculous, even foolish to its own followers who must submit to be yoked in political fellowship to such men as Congressman Wheeler.

The fact that an eminent member of the Royal family of Germany is to visit this country, and this government makes suitable preparations to receive the distinguished visitor, and bonor him as fittingly becomes his rank, does not mean that such a reception is an exhibition of "flunkey ism" on the part of the Americans. ESP:

Prince Henry of Prussia comes as a representative of the German Empire, a nation which has given to this country millions of good citizens, who are to day true to every spirit of sincere Amer icanisn, and staunch defenders of Ameri can institutions.

These citizens, as well as all other citizens, are interested in seeing that the German Prince receives full American hospitality, and all display that his position warrants, and that this country can

To designate what this country is doing, and will do in the reception and entertainment of the Prince, as "flunkeyism," is not merely untrue, but it is an exhibition of poor taste, and decidedly bad manners, and far from the spirit of Democracy.

The fact that Congressman Wheeler has had his "fling," means no abatement in the courtesy which will be extended by this country to the German Prince, soon to be this government's guest.

But it does show an uncalled for and idiotic display of boorishness, which the opponents of Democracy will use with effect in future campaigns.

CHOICE MISCELLANY

hi, de Witte in perhaps the greatest finance minister Russia has ever had and in his last report has painted as gloomy a view of the industrial and economic situation of the empire an any of his predecessors have done in its chricest days of war, bankruptcy, and famine. The metal industries, he says, are on the verge of ruin; the textile nearly as ind. In twenty years the productivity of the land has diminished over one-quarter. An acre produces productivity of the land has diminish-ed over one-quarter. An acre produces less than one-fifth of the same area in America. The number of houses has diminished nearly one-half in thirty years. Nearly half the population are saly in arrears with their taxes, and the only parts of the empire which show any signs of prosperity are those inhabited by non-Russian populations— Finland, Poland and the Caucasus. It is not a favorable showing for Russia's aggressive purposes, though she is lit-tic accustomed to abate them on ac count of hard times or the penury and sufferings of her people.

Uncle Sam at the Head.

In the world's race after the rolling dollars Uncle Sam comes in far ahead The treasury bureau of statistics has just received the yearbook of the London Daily Mail for 1902, in which the United States heads the list of wealthy nations, with £16,350,000,000 to her credit. Great Britain comes sec ond, with £11,898,000,000; France third, with £9,690,000,000, and Germany fourth, with £8,052,000,000. Russia is last of the principal nations, baving to

her credit only £6,425,000,000. It is also safisfactory to see that of these five nations the United States has the smallest national debt, £221, 006,000. Germany's debt is £651,000, 000, that of the United Kingdom £706,-000,000, that of Russia £711,000,000 and that of France £1,239,000,000.

The same list also shows the United States to be the largest wheat pro ducer, her crop for 1901 being 480,000. 000 bushels, over double that of Russia, next on the list.

Housecleaning by Air.

The first stationary compressed air cleaning apparatus to be placed in a hotel in the United States, if not in the world, was put in operation in Milwaukee recently. The compressor is located in the basement, and from it pipes lead to every floor of the building, with places thereon for attaching the hose, and hereafter the carpets and furniture and draperies of the hotel will be kept clean and sweet by means of this new device. It is at automatic piece of mechanism, and when in use the air pressure is kept at eighty pounds to the square inch. It is operated by electricity, and when the limit of pressure is reached the electrical current is cut off, but as soon as started up the connection is renewed and the pressure maintained. By this means the air current is sent through the carpets, furniture and bedding, cleaning out all, dirt and rendering them sweet and clean,-Milwaukee Sentinel.

Easy Way to Make Money.

About the easiest money making scheme ever seen is at Jerome, Ariz., in the epinion of I. T. Stoddard, secretary of Arlzona. "There is a brook that runs out of the lower workings of Senator William A. Clark's United Verde copper mine," he said. "This water perco lates all through certain sulphuretic copper and gold deposits in the bowels of the earth, and as a result when it runs out of the mine into a pool aranged for its reception it is heavily loaded with liquid copper. The mining people dump scrap iron of all kinds into the pool, and the presence of the iron in the water precipitates the copper in solid form to the bottom of the pool, where it is picked up in irregular shapes. I was told the last time I was in Jerome that Clark's people pick out of that scrap iron pool about \$600 or \$700 worth of practically pure coppe every twenty-four hours. That's what

call an easy way of making money." Dr. Bull's Baby Syrup for Teething Babies. Price, 10 jets. Cures Wind-Colic, Diarrhoes, Dysentery, Griping Pains, Sour Stomach, Fever, Cholera Infantum. Dr. Bull's Baby Syrup promotes the digestion and soothes the

SORES AND Handy, ULCERS.

Sores and Ulcers never become chronic unless the blood is in poor condition—is sluggish, weak and unable to throw off the poisons that accumulate in it. The system must be relieved of the unhealthy matter through the sore, and great danger to life would follow should it heal before the blood has been made pure and healthy and all impurities eliminated from the sys-tem. S.S.S. begins the cure by first cleansing and invigorating the blood, building up the general health and removing from the system A CONSTANT DRAIN all morbid, effetematter. UPON THE SYSTEM.

When this has been accomplished the discharge gradually ceases, and the sore or nicer heals. It is the tendency of these old indolent sores to grow worse and worse, and eventually to destroy the bones. Local applications, while soothing and to some extent alleviate pain, cannot reach the seat of the trouble. S. S. S. does, and no matter of the trouble. S. S. S. does, and no matter how apparently hopeless your condition, even though your constitution has broken down, it will bring relief when nothing else can. It supplies the rich, pure blood necessary to heal the sore and nourish the debilitated, diseased body.

Mr. J. B. Talbert, Lock Box 245, Winons, Miss., says: "Six years ago my leg from the knee to the foot was one solid sore. Several physiciams treated me and I made two trips to Hot Springs, but found no relief. I was induced to try S. S. B., and it made a complete cure. I have been a perfectly well man ever since."
