SENATORIAL COURTESY A LA TILLMAN.

The disgraceful outbreak on the part of Benjamin R. Tillman in the United States Senate, on February 23nd, in his assault upon his fellow member and citizen from South Carolina, was an exhibition which would have shamed the days when the knife, sword or club was regarded as the fitting settlement of an argument between "gentlemen."

It must have been an inspiring sight, that enacted on George Washington's Birthday, in the Senate of the United States, when a Senator, nearly 55 years of age, went clambering over seats and deaks, to reach a fellow member, in order to strike and kill him!

It was senatorial courtesy, a la Till-

Senator Tillman, has so continuously posed for his honesty, that his language, ever immoderate and intemperate, has been regarded as expressive of the man's honesty.

If the man insinuated without proof. in regard to another's character, it was only Tillman's native honesty finding expression.

If the man spoke of "nigger killing" as the ordinary person speaks of slaughtering rats, it was only Tillman's native ruggedness of character.

It was coarse, brutal, harsh, unciviized, unchristian, but being Tillman, it was permitted and endured.

Public audiences have been shocked by this man's language, but because of its sensational character, because the people wanted to hear the man-give vent to some new expletive, applause greeted him, when any other speaker would have received hisses and been thrown testimonials, wanting in sweet-

Senator McLaurin's mistake was attempting to reply to such a man as Sen ator Tillman, although the provocation was very great. His denunciatory language seemed and was the only reply possible, to the unsupported and vile accusation made against him in the

But the outbreak was not unexpected It is a public diagrace upon the country, a shame which will be felt by every decent South Carolinian. Public apology can never redeem the gross breach of decency and order committed last week.

In another man, it would mean retire ment from public, life, but in the present aggressor, it will probably only be held as senatorial courtesy a la Ben Till man, and passed as another phase of the man's native honesty and ruggedness of

The Original Squeers.

The gresset injury which Dickens over indicted on a fellow being was his too accurate portrait of an innoment man in his Squeers. That York shire schoolmasters were, as a rule, ruel and weeked enough it is true, but the particular schoolmaster who was recognized and who recognized himself as the original Squeers seems to have been an exception to the rule. It will be remembered that Dickens and his illustrator traveled together to the north of England for the purpose of collecting material for "Nickloby" and especially Ar the Dothebors opinode. At Great Heldan they visited a boarding school known as Bowes neadency. The master, William Shaw, received the airangers with some hanteur and did not as much as woll affects the operation.

on following their movements through a glass the observer saw on this mound a big and sturdy ant, which made some motions in the direction of the advancing invalids. The latter, went up the mound, one by one, and submitted themselves to treatment. This consisted in the physician ant passing his feelers over the head and body of the patient in a manner distinctly suggestive of the hypnotising of nerves and muscles practiced by human doctors. Scalakin Doess't Come From Scale.
The beautiful product used for ciothing and commonly known as scalakin is not furnished by the true scal, whose ekin is almost useless except when used as an ornamental unit or stiff rug. They are the sea lions and sea bears the eared scals, otaria-whose skins are so highly valued because so soft and warm. The true seal is common enough, but its skin is only prized as a trophy, and it may be added that sealskin when ready for clothing has not, as often supposed, the same downy appearance on the living animal, being covered with long, coarse, deep rooted hairs, which drop out when dressed by the furrier and leave the soft, woolly hair uninjured.

New York's Tall Men.

Why are there so many very tall men in New York? is a question often asked by visitors to the city. The peculiarity is so patent that it very soon forces it self on the attention of every ensual observer. The men are not the ordinarily tall men of six feet or so that one sees quite as many of in Pittsburg or Chicago as you do in New York, but the men whose heads rise up noticenbly out of the crowd wherever they are. What brings them here or what grows them here are questions. They are so plentiful that one can scarcely walk a block down town without meet ing several.-New York Letter in Pittsburg Dispatch.
