Official Paper of New Bern and Craven County.

New Bern, N. C. June 1, 1902. GOOD ENOUGH, IS NOT

ENOUGH.

It is the person who is never satisfied with any achievement that accompliance the great things in this world.

Good enough, meaning easily satisfled, does not cause the world to progress, nor does it produce any marked development.

In the church, the member who is good enough, is never an important factor in the religious growth of the church, for he or she is satisfied that existing conditions are all right, and no aggressive christianity is needed.

In the social world, there would be no advancement if those who were satisfied that present conditions were good enough, were in control of society's movements.

And in commercial life, there would be no great industries established, no great trades consummated, if the spirit of good enough was the controlling power.

So it is with communities which refuse to recognize the fact that conditions today are radically different from those of yesterday, and continue to be satisfied with the good enough of yesterday, as if today had nothing new in it.

It is not enough for the individual or the community, that present conditions are easy, that drifting along causes less worry and work than the effort which would produce something through sincere endeavor and desire to better existing conditions.

Good enough, has no part with the power which marks progress, which seeks to advance every worthy cause, and bring greater results out of conditions that may appear to have reached their best ends.

Good enough is never enough to accomplish what is really needed in the world.

develop sometimes from very trifling causes, and when and where you would least expect them. A boil, or abscess, burn, blister, wart, tumor, mole, or the simplest little pimple may be the beginning point of a malignant, frightful looking Cancerous Ulcer.

Apparently there is no difference between a Cancerous and Common Ulcer when they first make their appearance, and for this reason every ulcer, no matter how insignificant or harmless it may seem, and all slow healing sores should excite suspicion and cause alarm, particularly if any of your ancestors ever had Cancer, or you have good reason to think your blood is impure; for the sore, after all, is only the outgrowth, the external evidence of polluted blood, and nothing can check its progress until the cancer tainted, vitiated blood has been purified. All efforts to heal the ulcer by means of salves or other external remedies will result in failure, for such treatment can have no possible effect upon the deadly germs and morbid matter that form in the blood and are carried through the circulation to the sore.

C. e. grow smaller, the discharge stopped, and W. P. BROWN. I was relieved of the terrible disease."

Cancerous Ulcers can be reached only by a remedy that acts upon and through the blood system, and this is just what S. S. S. does. It goes to the fountain head of the disease, and drives out the germ producing poisons which cause the ulcer, and purifies and builds up

again the deteriorated blood. This is the only true and logical treatment for sores of this character.

By the use of S. S. S. the ulcer is supplied with pure, strong blood, which quickly allays the inflammation and forces out all the irritating poisons, and allows the sore to heal naturally and permanently. S. S. S. acts also as a tonic, and where the constitution has become

debilitated and weakened, it restores vitality and strengthens the nervous system, and helps the appetite and digestion. S. S. S. contains no Mercury, Potash or other minerals, but is guaranteed purely vegetable.

Those having a chronic ulcer or sore of any kind that is slow in healing, whether located upon the body or internally, will receive medical advice and such special information as they desire free of cost.
