AMERICAN STOCK CO.,

P. HOWARD, Proprietor, 59-61 Middle Street.

FRUITS AND FLOWERS.

As a rule grafting improves the stock. Dwarf apples are ornamental rather than profitable.

The quince grows so readily from cuttings of about a foot in length that there is really no need to graft it.

The value of good seed is seen when the harvest is gathered. This is true in the garden as well as in the field.

If the garden is laid out in an oblong shape, all the better, as in this form it will be made convenient to cultivate with a horse.

Bark burning of cherry trees is generally confined to trees with long, bare trunks. The remedy is to grow a low spreading head.

The best location for the peach is on the hills and the least favorable in the valleys. It is a good plan to plant a few trees every year.

Pears may be grafted on young apple trees to good advantage, but the fruit will not have the same taste as that from the parent tree.

RALEIGH.

State Firemen's Association at Raleigh July 22-24.

Cotton Mill Merger Progressing. State University Commencement. Sixty-Seven Graduates. Hon. Hillary A. Herbert Delivered the Address.

RALEIGH, June 4.—All the arrangements for the annual convention here July 22-24 of the State Firemen's Association, with its accompanying tournament, are now complete. Great interest is shown here in the event.

The program for the Inter-State Trap Shooting Association's trap-shooting tournament here June 25-26 is issued. There are many events, and valuable purses. The tournament is given for the Raleigh Gun Club.

Today at Morganton the trustees of the State school for deaf-mutes met. The work of the school during the term which ended June 10 has been very satisfactory.

Henry E. Fries of Salem, writes that his scheme for a merger of cotton mills is progressing very well, and that application for admission to it is coming in, so that it will be more extensive than at first planned.

A number of the State officers attended the University commencement at Chapel Hill today. It was the 107th commencement. Sixty-three of the graduates presented theses, while four delivered orations. The annual address before the graduates was by Hon. Hillary A. Herbert, of Alabama, ex-secretary of the navy. The Holt medal was won by R. C. Morrow, the Hume medal by R. N. Duffy, the Hill prize by J. A. Ferrall, the Greek prize by S. S. Robins, the Early English Text Society's prize by Miss Minna Curtis Bynum. Rev. Leonidas W. Crawford presented Bibles to the graduates, and Gov. Aycock conferred the degrees in course.

The trustees of the University elected W. C. Coker, of South Carolina, professor of botany; T. J. Wilson assistant professor of mathematics; H. M. Stacy instructor in mathematics; Dr. H. E. Duerden to fill the position of H. V. Wilson while the latter is at Berlin.

The Superintendent of Public Instruction sends the following letter to treasurers of County Boards of Education: "I must insist that County Treasurers be more careful in making their reports than some have been in the past. I call your special attention to the following important points: The Poll and Property tax should be separated as the blank indicates. In some instances the Treasurer's report that the Sheriffs have failed to keep the amounts collected for Polls and Property separated. It is the duty of the Sheriffs to keep the amounts separate, and a failure to do so may necessitate the County Board having the penalty enforced against them. Under the head "Paid for Other Purposes, giving every item," you must not include anything that should come under any other head. All the money paid County Superintendents for any official work should come under the head "Paid County Superintendent." If he is paid a per diem, you should state how many days he has been on duty. If paid a commission, state what per cent, and on what amount. The compensation of Treasurers can not exceed two per cent on what they pay out. They are not entitled to any commission on receipts or on their own commissions. It is important that you make your reports promptly, so they can be tabulated and prepared for printing."

Weekly Crop Bulletin.

For week ending Monday, June 3, 1902.

The past week was generally quite unfavorable for the progress of crops throughout most of the State, on account of the deficiency in temperature and precipitation. The week was characterized by temperatures considerably below the seasonal average, especially from the 27th to the 30th, and light frosts were reported by a number of correspondents, chiefly in the elevated western section, fortunately with only slight damage to crops. The cool weather both checked growth of vegetation and gave young and tender plants an unhealthy appearance. Showers occurred from Sunday, the 25th, to Tuesday, the 27th, generally in small amounts, the beneficial effects of which soon disappeared. Damaging hail storms accompanied the rainfall on the 29th in a few western counties, notably Henderson. A warm, gusty rain is now greatly needed everywhere, as uplands are suffering rather seriously from drought. The week was very favorable for work, and cultivation continued actively; the planting of most crops has now been completed.

Cotton suffered considerably from the cool weather, and many plants have become yellow or sickly in appearance, hence growth has been very slow during the week; chopping cotton is approaching completion, on account of dry weather much late planted is not yet up. Corn has also suffered, but to a much less extent from drought and cool nights generally the crop is in good condition and most of it has received second cultivation; cabbage by various reports by a large number of correspondents.

The outlook for tobacco is not good at present; growth was checked this week, so that recently set out plants have not secured a good start; poor stands, irregularity in growth, and damage by insects contribute to the unfavorable prospect for this crop. While a number of reports indicate that the heads of winter wheat are filling well, the crop is ripening so low that much can hardly be cut; harvest will soon begin; chinch bugs are damaging wheat. Spring oats are beginning to suffer from drought at the most critical period of growth, while beginning to head. Peanuts seem to be doing fairly well. Gardens where properly worked are in good condition, and vegetables of all kinds have become abundant. Digging Irish potatoes is underway, with indications for a somewhat inferior yield. Fruit is still falling considerably. A full crop of blackberries is promised. The strawberry season is about over.

FASHION HINTS.

A Waist of Crepe de Chine. Trimming of Lace Straps.

A very novel waist is here illustrated made of folds of crepe de chine in tuck effect and trimmed with lace straps and

a deep lace yoke. Black chiffon bands are very artistically disposed and a large rosette of the same is placed at the left side. The sleeves are remarkable for their novelty and oddity. All the stitching is done with Corticelli silk.

For shirt waists pongee is especially recommended and it is very fetching made up with bands of ecru embroidery, or over a color with a heavy lace yoke. This material is particularly suitable for the Gibson and Duchesse waists, the former giving the broad-shouldered effect so much sought after just now, in the shape of folds or tucks extending over the shoulder, the latter fastening under a double fly and showing fronts richly embroidered with Corticelli wash embroidery silk. The favored color in pongee is the natural ecru tint, although it can also be procured in different shades. Mercerized fabrics of all kinds will be extensively worn, the process having been vastly improved since it was first brought upon the market, and all sorts of silk and linen mixtures are greatly in vogue.

EITHER WAY HURTS.

A Cross FireOn Coffee Users.

The breaking away from coffee is an exceedingly serious problem to many people, especially when headaches follow leaving off the drug, and dyspepsia and bowel trouble grows more and more serious if the coffee is continued. So there you are between two fires.

A comparatively easy way out was taken by a lady from Franklin, Pa., who says, "We had a curious experience with coffee. Husband had been, for many years, a sufferer from dyspepsia, with heart-burn, headaches and general nervous trouble. We tried a great many physicians and a great many remedies but none of them did him any lasting good.

We concluded there must be something about his employment that thus affected him. One day a man told him that probably coffee was the cause of his trouble and advised him to use Postum. The first time I made it I studied directions and made it good. Well that day was a day long to be remembered.

We liked the Postum but we had a hundred headaches compressed into one. You see the trouble was we had both used coffee so long that our nerves were in a state of collapse without the usual stimulant. Until then I did not dream I was such a slave to coffee but we had to do something to quit, so the next morning I used Postum with part coffee and we missed the headaches, then I used less coffee every morning for about two weeks, and then Postum alone for nearly a year now, and I just wish you could see the change in my husband. He has better health than he ever had before, never has the headache, can eat anything he wants, does not have heart-burn or any stomach trouble, and he cannot be induced to drink coffee under any circumstances.

When anybody mentions dyspepsia in his presence he tells them what cured him.

I was almost as bad as he but am now entirely well, and have gone up from 90 pounds to 105 pounds and am so thankful for the blessing of good health.

If my name will do any good, use it for me and Postum always." Mrs. W. A. Brown, 78-9th Street, Franklin, Pa.

FOR 10 DAYS!
