THE FARMER TO BE ENVIED.

While no new statistics are needed to prove that the farming interest is the real backbone of the country, and to gauge the country's real prosperity, crop conditions must be regarded as the great factor, yet it is not without profit to look over compilations of figures regarding the farmer's growing wealth.

And in this connection the following from The Financier, shows how vast in the following wealth of this country and that the farmer, as a class, was never so prosperous as at the present

The Financier says:-

The Financier says:—

The farmer, so far as actual wealth is concerned, is the capitalist of the United States. The Cenus Bureau report on the value of farming property of the country, isaued last week, estimates that the 5,739,637 farms of the United States are worth \$16,674,090,347. Of this amount \$3,560,198,191, or 21.4 per cent. represents the value of buildings, and \$13,114,492,056, or 87.5 per cent. the value of land and improvements. Farm implements and machinery are worth \$761,261,550, and live stock \$3,078,050,041, making the total farming wealth 041, making the total farming wealth over 20,514 million of dollars. This is over 20,514 million of collars. This is undoubtedly a very low estimate, but accepting it as correct, other forms of industry pale beside it in comparison. The value of the railway systems of the United States, approximating 200,000 miles, is about 11,300 million deliars, counting bonds and stock capitalization. counting bonds and stock capitalization or but little over half the farming weak The railways, in fact, constitute the only single industry which approaches even remotely the supendous totals revealed by the census enumeration of farming wealth. It is impossible, of course, to compare the operations of these two important divisions of industry, weath. It is impossible, of course, to compare the operations of these two important divisions of industry, for the simple reason that they are distinct in their results, and the items which enters into one are not found in another. Still it is not without prevent to clearly as far as possible the interest to classify as far as possible the operating totals, with the idea of affording a rough approximation, at least, of income yield on investment, etc. The railway systems of the United States in railway systems of the United States in 1900 reported gross earnings of \$1,001,005,378, or a little more than 12,5 per cent on the total stock and bond capitalization. The gross farm lacome in 1890 was \$8,764,177,706, and the percentage of gross income upon investment was 1813 per cent. It will be seen that the farming industry made out better than the railways.

Poisoning the System.

It is through the bowels that the body is cleansed of impurities. Constipation keeps these poisons in the system, causing headache, dulness and melancholis at first, then unsightly eruptions and finally serious illness unless a remedy is applied. A Great Work of Art. It was Apelles who visited the studio of Protogenes in Rome and, finding the artist absent, drew a thin colored line in such a way that the Roman knew that only his Grecian brother could have done it. But, not to be outdone Protogenes drew a thinner line upor that of Apelles, and when this was seen Apelles drew a third line upon that of Protogenes. This panel was then looked upon as the greatest work of art, so says the story, in the palace of the Cweers.

BRAIN-FOOD NONSENSE.

Another ridiculous food has bee randed by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for body another for muscles, and still another for bones. A correct diet will not only nour ish a particular part of the body, but it will sustain every other part. Yet however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepare for their apsearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. The crutch is a poor substitute for legs, and affords a very negative and tiresome mode of locomotion—there is no more athetic sight than a person slowly and painfully moving along the treet supported by these artificial limbs.

when Rheumatism settles in the bones and muscles of the legs,

When Rheumatism settles in the bones and muscles of the legs, it is safe to predict that the victim will eventually become helpless and crutch-bound. The corrosive, irritating matter that is deposited in the joints and muscles causes the most intense pain, the knees and ankles swell, and when the natural ells and fluids that lubricate these parts are completely destroyed the joints become locked and the muscles drawn and stiff, and crutches a necessity.

The acid poisons that produce rheumatic pains form in the blood, and are distributed through the system, and lodged in the arms, shoulders, hands, back and feet, or other parts of the body—resulting often in total disability. A permanent cure of Rheumatism can be effected only by a complete cleansing of the blood, and no other remedy so surely accomplishes this as S. S. S. It neutralizes the acid effects, purifies and invigorates the stagnant blood, and the gritty particles are washed out or dislodged by the new rich blood, and relief comes to the pain-racked sufferer. S. S. S. leaves no morbid, irritating matter in the blood to reunite and produce another attack, but expels every atom of it from the system. S. S.
