POLITICAL QUIET.

Purchase of Lakes Near New Bern for Preserve.

Public School Terms. Death at Lumberton. Fox Assists Fox. Extension Railway Street Car System. Cannon For Capitol Square.

RALPH, Sept. 30.—None of the efforts to arouse political enthusiasm this year have succeeded. Audiences are not large, but are attentive and more critical than ever before.

The average length of the terms of the public schools this year is found to be 16 48-100 weeks, or about 4 1/2 months. Last year it was 15 48-100 weeks, and in 1900 it was 14 66-100 weeks. It is now larger than ever before in the history of the common schools.

News reached here today from Lumberton that E. K. Bractor, Jr., a prominent lawyer there, was dying of typhoid fever. One of his children has the same disease.

James H. Fox will make several speeches in the interest of his brother Congressman, E. W. Fox. His first speech will be at Rocky Mount next Monday.

The Supreme Court today took up the docket of appeals from the 6th district. It is a light one.

There is no change in the street car situation here. It is expected that by the end of the year a new company will buy the system and extend it, but at present there is nothing definitely known.

The Secretary of State has nearly completed the very heavy work of sending out to the various county election boards the books etc., for the permanent roll of voters.

Nearly all the State officers are now out on the campaign and the departments are bare of news.

Today the two large cannons were set in granite beds or bases on each side of the Confederate monument, at the west corner to the Capital square, and they add greatly to the appearance of the monument. These guns were originally naval 32 pounders, one dated 1848, the other 1853, and they were taken to the Norfolk navy yard when Virginia occupied it in 1861. They were sent to the Tredegar Iron Works, rifled and made 4 inch rifled guns and a wrought iron band was shrunk on the breech, making them greatly resembling Parrott guns. They were mounted on the sea front of old Ft. Caswell. In January 1902 they were sent to the State Arsenal and they were left loaded and spiked.

The State Board of Education has sold to James A. Bryan for \$4,800 five lakes near New Bern, including Catfish, Ellis, Little, Long and Great lakes about 8,000 acres. They will be used as a gun preserve.

WILCOX GETS NEW TRIAL.

It was found advisable to have another operation on President Roosevelt's leg but the physicians assure the public that he is improving finely and that the operation gives no evidence of danger.

A tidal wave overflowed a large district in Japan and several hundred were drowned. The storm drove many ships ashore. One of the best ships of the Japanese navy is ashore.

The Queen mother of King Alfonso of Spain is said to have married one of her courtiers.

The managers of the John Robinson circus were arrested at Henderson Monday for not paying the entire State tax, \$900. The show also had trouble with the patrons who declared that it was not up to its promises.

Cotton was considerably damaged Saturday in Southern and Eastern Texas by 12 hours of heavy rain.

The Congressional nomination in the Twenty-ninth New York district has been declined by Martin F. Dillon.

Five and a half inches of rain fell at New Hampton, Ia., on Saturday, doing great damage to railways and highways.

The strike of the Chicago City Railway employes has been compromised, the men, however, gaining many concessions.

Delegates are already gathering at Chicago, Ill., for the opening on Thursday of the National Republican League Convention.

While pitching an in-shoot at Natley, N. J., Saturday, Michael O'Keefe broke his arm, the bone snapping with a report like a pistol.

The skeletons of two human beings supposed to be mound builders were found in an Indian mound at Sterling, Ill.

Everybody's For October.

In the October Everybody's there begins a series of articles on "Steamboat Days on the Mississippi and the Missouri Rivers." Life on the great waterways in America was full of dramatic incident and adventure, and these articles abound in episodes of intense human interest. The first article tells of the pilots who navigated the vessels which piled the rivers and of their extraordinary skill in locating channels. There is a remarkable story of a race for a wife between the helmsmen of rival steamers.

COLONY LIFE

Effect of Climate Overcome by Proper Food.

The necessity of pleasant, nutritive and proper food is highly appreciated in the Philippines, particularly by Americans unused to climate and native custom in cooking.

One of our soldier boys writes:—"In this land of bad food and disordered stomachs, a nearly fatal attack of malaria left my digestion for many months in such a state that food of any kind distressed me terribly. I suffered from the effects of drugs, but dared not eat. It was simply misery to live. The so-called remedies only seemed to aggravate my sufferings.

Some friends suggested Grape-Nuts Food, and I gave it a trial. To my surprise and pleasure it did all and more than was claimed for it. I am now after using the food for 18 months, in good health, my digestive apparatus in perfect order and I have long lost all feeling of pain or discomfort after eating. In fact, I live again. I would not be without Grape-Nuts for the world. It is not only the excellent food of your food that renders it valuable, it is also delicious to the taste, possessing flavor of its own, and can be prepared in many ways to suit many palates." Name given by Patient Co., Battle Creek, Mich.
