The Worst Form.

Multitudes are singing the praises of Kodol, the new discovery which is making so many sick people well and weak people strong by digesting what they eat, by cleansing and sweetening the stomach and by transforming their food into the kind of pure, rich blood that makes you feel good all over. Mrs. Cranfill, of Troy, I. T., writes: "For a number of years I was troubled with indigestion and dyspepsia which grew into the worst form. Finally I was induced to use Kodol and after using four bottles I am entirely cured. I heartily recommend Kodol to all sufferers from indigestion and dyspepsia. Take a do-to after meals. RIGHTS OF NAVAJO WOMAN the Alone of All Indian Squaws in Joys Independent

The Navajo woman, who has made her tribe the most ramous of all living Indian races by means of her great and excellent invention, the Navajo blanket, occupies a social position of great independence. Her property, rights are carefully respected. She owns much of the wealth of the tribe, and her children belong to her alone. A woman may have hundreds of sheep when she marries, and not one be Descent is traced through the female line. It is a survival of the primitive

The Navajo woman has no perma ment home. The progress of the tribe has been greatly impeded by its dark superstition that every death is caused by Chinde, the devil, and that evil spirits linger about the dead body. The house is never occupied again. The corpse is buried in the floor and the house pulled down over it, and a Na-vajo would freeze before he would nake a fire upon the logs of one of these deserted heaps. So the Navajo "hogan" is a poor, temporary affair, a mere circular hut of logs and stones, with a hole in the roof for the smoke and a blanket for the door. In the summer the Navajo woman loves to move into a brush wickiup, made of greasewood boughs. There she sets up er loom in the shadow of the rocks and lives in the open air all summer .-Chicago Inter Ocean.

Single Beds For Real Rest. If single beds were more numerou than they are, a great many people would be better off. When one is tired, sick, cross, restless, out of sorts, he or she ought to sleep alone and not communicate by proximity the maladles that affect him. The brute creatures when sick go away by themselves till they die or get over their troubles, and this instinct a great many human beings have. Those that have it are best if indulged in it, not to the slightest degree of neglect, how-ever. Where two children in a family must share the same room in a great many cases they would be better off to have two single beds rather than one wide double bed. We can share a great many things with those we love, but solitude clings to us from birth to death. We come into the world alone; we must go out of it alone, and we live in it alone, in a certain important sense, and to get and keep our "bearings" we must sometimes be left alone It is good that we should be.-Family
