No training is given them by the old bird. That is left to their wild instincts, which hunger and ne essity develop. There is no "going back to the old home" for the young ea gles. The mother bird tears up every restige of the nest, and if they emit plaintiff shricks the old birds dart at them and push them off the crags of rocks and thereby make them take to their wings. It takes three years for a young eagle to gain its complete plumage and strength.—Independent.

observed years ago, when the late Albert N. Baker lived in the house. He
was an inveterate player of the flute,
and when the mice heard the sound of

But the singing mouse that lived at

became a nuisance after the family

Of all the children who have lived in the White House none has been the object of greater affection from the American people than Tad, the favorite son of President Lincoln, whose early death was the greatest sorrow of his father's life. Tad won the good will of constraint by the treaty avanuathy with everybody by his ready sympathy with all classes and conditions of people. One story of him is to the effect that e once noticed a wounded soldier anging about the gates of the executive mansion, hoping to see the presi-dent, to whom access was dented, it having been given out that no soldiers were to be discharged on any account. This veteran believed that he would not recover and was anxious to see his family before he died. Tad saw him

houted in his loudest boylsh voice:

Corn is a very useful vegetable. If It were not for corn there would be no horse, but he had a large and faithful wife, who took care of it, accompanied by a trusty dog, while he wrote poetry for the papers. We ought to be thank-tal if we have a good wife, which is much better than hanging around saloons and wasting your time in idleness. Corn is also useful to feed hogs with and can be made into cob pipes,
