ONIONS AND LEMONS.

hald to Be a Protection in Cases Contagions Disease.

When a mere lad I had often heard it said that the eating of onions and lemons was a protection against conta-gious diseases, and when about eight en years of age I had an opportunity to test them for myself. I had spen the winter in the city of New Orleans, where, in the spring, yellow fever of a virulent type made its appearance, causing an urgent demand for nurses, and, having faith is what I had beard of the protective power of onions and lemons, I concluded to take what my riends called a ghastly risk and made plication at the Common Street hospital for a position as nurse, was accepted and entered at once upon a line of duty, in commencing which I began the use of raw onloss and lemons, alternating weekly with lemons, always taking them just before going to bed.

I took no other remedy, although medicine was provided every morning for all affaches. At the expiration of the tenth week I was no longer needed and left in as vigorous health as when I entered the hospital.

I entered the hospital.

On taking my departure I was reminded by the head physician that his
medicine had probably preserved my
bealth. Nevertheless a number of
nurses and attaches had died of the
fever, despite his vaunted medical abiity. Defore leaving the institution I acqualitied the doctor with the fact that
I had not used his medicine, but had had not used his medicine, but lied solely spon my suint-less tatment, when he said it was a w-w that it had not killed me and it

Potent Pill Pleasure. The pilit that are potent in MODES OF THE MOMENT.

We do not hear much about all mitts, but the wearing of them is per missible this summer. They come in eight and twelve button lengths. Shirts of the India lines to be worn under the fine white summer gowns are marvels of elaboration and are tichly triumed with lace, ribbon run bending and tucks.

Linens of all kinds are still the favorites for both morning and simple afternoon summer gowns, but old fash-tened French percale, which is one of the most serviceable cotton materials ever made, is being widely employed for tub dresses.

The Death Penalty. A fittle thin; so ctimes results in death. The san era scratch, insignificant cuts or juny bolls have paid the death penalty. It is wise to have Buck len's Arnica Salve ever handy. The Road to Success. It is well for the young man to re-member that if he finishes his education as a skilled farmer or stockma or fruit grower there are plenty of places open waiting for him at good pay, while if he becomes a minister lawyer or doctor he may have to hunt ong and far to find a place and walt long before a good living is assured.-Rockford Register.
