NEW ARNSTRONG.
Motters, Quakers, Neckties and Leggings. See the patterns at J. B. Parker, Jr.

WHY NEGLECT THE ROADS?

During the Good Weather it should be seen that the Approaches to New Bern are repaired.

People who come to town over the county roads are complaining about the bad condition of them.

If the roads are bad now during the comparatively dry weather, what can be expected of them later on when the fall rains set in?

The weather is now favorable for road working, the crops are about cultivated, the country people are less busy, and nothing but carelessness and neglect is to hinder the roads from receiving the proper attention. The people who have produce to haul to market should be the ones to interest themselves in the repair of roads, but as a rule they dislike to spare the hands off the farm for road work, until the crops are laid by, then labor is so demoralized and scattered until cotton picking time that it is next to impossible to get it together for road work.

This matter of good or bad roads is of vital importance not only to the planter who perhaps strains his animals to death drawing loads of produce over bad roads to market, but to the market town that expects to handle the produce. No careful intelligent farmer cares to unnecessarily injure his horses, and will decline to market his produce at a town whose approaches are well nigh impassable but will travel further to reach a town across good roads.

Last fall it will be remembered that the roads leading out from New Bern for several miles were in a miserable condition, it being impossible to draw an average load across them. This bad condition existed even in the season for marketing tobacco, and it is also known that some planters who intended to sell their tobacco here were obliged on account of bad roads to carry their stuff elsewhere. It was the same with the cotton crop later on.

The bad roads leading to New Bern are costing the merchants here thousands of dollars in trade that is being carried to other towns; is costing the farmers who are of business necessity obliged to bring their produce here, thousands of dollars, in the wear and tear of their beasts and vehicles.

The road law provides for the keeping of them up, but the law is not enforced. The supervisors appoint an overseer, he qualifies and that is the last ever heard of him. The law requires that where it is needed, the overseer shall have six days work done each year on his section. Many of them don't have one day work done.

Let the law be enforced, and if, as it is argued, there are not hands enough to keep up the roads, make a different law or let the ones most interested, supplement the force by voluntary contributions.

Now is the time to begin work, and if the time is wasted until the rains set in, the same conditions that were present last fall will be again.

In The Magistrates Court

An ejectment suit occupied magistrate S. R. Street's attention for several hours yesterday. It was the case of A. T. Wetherington vs Enoch Rice, both of Clark. The judgment was rendered for plaintiff. Secondary to this suit was a hearing on a peace warrant of A. T. Wetherington vs Enoch Rice. The case was dismissed at the plaintiff's costs.

WHO IS HE?

Who is it that makes the Fever-galton; wears long pants?

The Dover Summer School.

The Craven County Institute for teachers conducted at Dover by Prof. L. L. Hargrave and Miss Bertha Sugg has just completed a six weeks session of good faithful work, although the attendance has not been what might be desired. Teachers have spent three and four and some of them six weeks in diligent study, striving to better prepare themselves for their work this fall.

Prof. Hargrave and Miss Sugg have been wonderfully successful in inspiring the teachers with a proper spirit and zeal for their work, and the teachers are enthusiastic in declaring the benefit derived.

Superintendent Brinson visited the Institute weekly and conducted a class in Civics. The teachers were also encouraged by visits at different times from members of the County Board of Education. The Editor of the Journal, ministers, and others who gave short talks and addresses on educational subjects.

"The Women's Association for the betterment of the Public School House of North Carolina was represented, and both a county and local association were organized.

The people of Dover did all in their power to make the few spare hours that the teachers had, as pleasant as their working hours were profitable.

All in all, we expect much good to result from this year's Institute and we trust that year by year it may grow in numbers, in strength and good work.

FAMINE AND HUNGER.

The Lot of The Inhabitants of The Cape Verde Islands.

A pitiful story comes from New Bedford, Mass. where the Portuguese immigrants went from this city last spring, a story of suffering among the inhabitants of the Cape Verde Islands even worse than the passengers of the unforty masted boat Vera Cruz VII endured. The people in New Bedford have heard from their relatives and friends in that island and all reports tell of suffering and death.

The chief means of information is the Cape Verde news paper which says that despite the efforts of the Military Governor to relieve the situation, the famine is spreading. It appears that for the past three months the Government has totally stopped all operations on the public highways and Government works and the hundreds of laborers usually dependent on such work have been thrown out of employment and are destitute. The heavy emigration from that island last spring robbed the farming districts of skilled labor and the crops utterly failed for lack of help.

The situation on the island of St. Thaddeus is particularly distressing. Old and decrepit people drop dead in the street and babies die of starvation. A death rate as high as fifty per day is reported, and so pressed are the burial authorities that it is necessary to pile the dead in common graves in the cemeteries without coffins.

Successful Bear Round-up.

In the neighborhood of Prescott's post office, Beaufort county, the bears have been annoying the farmers by frequent attacks on their hogs.

Sunday evening, a bear family raided the herd of Mr Irving Bonner, and carried off what they wanted. Monday morning Mr Bonner aroused a number of his neighbors and they started in pursuit of the marauders.

After beating the brush for some time three bears were discovered, two had taken to trees, while the other one, the mother bear had crouched near by to protect her offspring. Then the fun began. After practicing their marksmanship on the head of bruiser, a fatal shot was fired by one of the crowd of hunters and the hog eater stretched herself out in a last struggle. One cub was killed, the other one was captured alive. The she-bear was quite a large specimen and the cubs were well on towards grown.

Weather For Northwest.

Chicago, August 3rd.—The weather map shows heavy rains in Nebraska, Iowa, and Minnesota. Generally clear in the southwest, and temperatures are higher. The conditions are generally very favorable for corn. There is a possibility of too much rain in the Northwest where harvest operations are beginning.

No Pic-Nic.

On account of the prevalence of fever in the neighborhood, the pic nic to be given at Mr Peel's, near Zorab, August 15th, has been indefinitely postponed.
