THE LOCAL SITUATION.

Bank and Trade Conditions as Affected by Farmers and Merchants Bank Bank Closing.

(INDIVIDUAL.)

A calm, dispassionate and impartial review of the local situation, as to the effect of the closing of the Farmers and Merchants Bank of this city, upon the financial and trade interests of New Bern, reveals a remarkable unanimity of expression and feeling, locally, that the bank suspension is one which practically affects only the stockholders and depositors of that bank.

The loss to the stockholders is a severe one, both on account of the manner in which they were defrauded, as well as from a pecuniary standpoint.

The depositors suffer only the temporary loss of their money, as it seems well assured every dollar of deposit will be made good, also suffer from the natural disarrangement to their financial affairs, which a bank failure involves, making necessary the completing of other banking arrangements for their business.

Yesterday's (Wednesday) business at the National and Citizens Banks showed nothing of excitement, or indication that there had been a bank suspension in the city.

The money taken in over the counter was greatly in excess of that paid out. New accounts were made, and whatever loans were sought, were accepted as upon any other day.

Tenders of money from outside banks were received, but there was no local need of outside funds.

Both of these banks were, and are, prepared to not merely pay all accounts, but are ready to serve their patrons as they may want, also protect every financial and trade interest of New Bern, as it may be needed.

There is nothing notably changed in local trade conditions.

It is the dull and quiet month of the year, few goods are moving, little money is needed, and business is of a general summer quietness.

The bank suspension has been a severe financial loss to those intimately associated with the Farmers and Merchants, and the causes leading to the suspension are shocking to all sense of financial integrity and ideas of individual probity.

But there is nothing to shake or rattle in the least unstable, the present existing financial and trade conditions of New Bern.

They are solid, being amply protected and safe guarded, controlled by men of unquestioned resource and ability, with credit equal to every possible emergency.

This is the local situation as it appears the day after the bank suspension.
