Letter to J. F. Taylor, New Bern, N. C.

Dear Sir: The way to reckon the cost of paint is to put both costs together: the cost of the paint and the cost of putting it on.

It would save this country hundreds of millions of dollars a year; it would save you alone (if you happen to be a victim) several dollars a year.

See how it works. It costs as much to put-on one paint as another, don't it?

Yes, if you use the same number of gallons.

Well, don't! No, you'll use twice as many gallons of adulterated paint as of Devco; and you're got to pay twice as much for putting it on.

Mr. N. Avery, Delhi, N. Y., has two houses alike and in same condition. Painted one house with Devco: 6 gallons. Painted the other house with a paint that was half adulteration: 12 gallons.

Same painter, Geo. Gilbert did both jobs. One cost \$97; the other \$54. Better get by the name.

Yours truly F. W. Devco & Co. E. W. Smallwood sells our paint.
