DOVER.

August 26.

Col. J. W. Lane passed through Dover this morning en route to his home at Ft. Barnwell.

Mrs. J. E. West's music class will give a concert in the Academy Friday night. No entrance fee will be charged. The public cordially invited to be present.

Mr. S. B. Stephens, who has been conducting a series of meetings at Daugherty Chapel, baptized 18 applicants Saturday morning. Preaching will continue through this week and likely another baptism towards the latter part. Bro Stephens is National Evangelist for the Free Will Baptist church and is doing great work through this section.

Mr. J. M. Hines is travelling this section looking after those who have waited a long time to pay their taxes. He seems to be very determined to collect and the procrastinators are moving around right lively.

Mr. Jackson Jones, living near Fort Barnwell brought his son, a boy about 13 years old, to the doctor this evening. The little fellow while passing through some pea vines was bitten by a large white oak snake. Dr. Follock at this writing is giving the necessary medical attention.

Mr. H. P. Woodson is having erected a very neat dwelling on rail road street to be occupied by Mr. W. B. H. Blandford.

Most of our farmers are engaged in pulling fodder and the weather is excellent for the business. Coston will soon be opening. Potatoes are beginning to make their appearance.

TUSCARORA.

August 26.

Crops are damaged badly in this section on account of the recent heavy rains. Low land corn is a complete failure, and cotton is cut off about one half.

One of Mr. J. F. Register's sons is very sick with fever. Dr. J. F. Rhom is in attendance.

Mrs. O. H. Wetherington is visiting friends in Pender county.

Mrs. Mollie Wetherington is spending a few days in Dover.

One day this week, a negro tramp broke into the house of a negro, Stephen Scott, who lives near here, while all the family were away from home. The tramp took off some provisions, and upset everything in the house in a search for money, but his search was no doubt fruitless, as Stephen has never been known to possess a dollar in the memory of man.

It Means Good Sidewalks.

Several of New Bern's enterprising citizens, among them, J. A. Jones, O. D. Bradham, Thos. A. Henry and a number of others, have purchased granite slabs to curb the side walks in front of their residences.

Putting down curbing means better side walks, and no doubt other citizens will feel pride enough for the looks of their premises, to follow the example of those mentioned.

It is not out of the range of possibilities that New Bern will yet have decent side walks. With a few exceptions, the streets are already in much better condition than they were a few months ago.

Young Hopeful—That's nothing. I'll have everything charged, and I'll keep on that way till I get married.—Magendorfer's Blatter.

What's Before Them.

"These young society boys are sure to be better off," said the Rev. Mr. Strahlman. "They have no thought of the future life."

"Of the future life?" replied the student. "Oh, just they feel that 'Masturbation' is always in their thoughts.—Exchange."

AGAIN WIND FAILED

And no Race. Reliance Led Throughout. Well Ahead When Called Off.

Special to Journal.

New York, August 27.—The third race between the Reliance and Shamrock was started today, the outlook being gloomy at start, weather being hazy and wind very light.

The course was fifteen miles to windward and return, the Reliance started in lead at once and was never threatened afterwards, the only question being able to get over the line before time limit expired.

The wind throughout was puffy, reaching eight miles when boats passed outer mark, the Reliance leading by about six minutes, but when about five miles from finish wind died out and race was declared off at 4.20 p. m. it being seen no chance to finish within time limit, the Reliance being one mile and half in the lead.

The Search Rewarded

That advertising pays, no one with a thimble full of sense will dispute, although some old fogies rather pride themselves on not having so liberal an amount of "gumption." But, to the point. Last Saturday night, a colored man, seeming to be in great distress of mind, strolled into this office, explaining that a bicycle had been stolen from him, and that he had been directed by some one to "go to the Journal office and that the man there would tell him where his wheel was and how to get it." Not being a clairvoyant, nor the person who stole the wheel, the writer could only comfort the distressed man by advising him to "leave a few cents as a retainer and that the Journal would go out to seek his wheel. A small "business local" was inserted in Sunday's paper and yesterday morning a phone message was received at this office from Bayboro saying the wheel had been found there. The man who lost the bicycle lives in the neighborhood of Riverdale, and can recover his property by communicating with this office.

A Singular Accident.

Raleigh August 27.—A very singular accident, and one which narrowly missed being fatal, occurred yesterday afternoon in Swift creek township, near this city.

A preacher rode up to the house of Mr. George Ford and left his horse unhitched in the yard. The horse went to the well, one of the kind having two buckets and a pulley. On the edge of curb was a bucket full of water. This the horse shoved back into the well. Mrs. Ford was standing near the well and as the bucket fell sprang forward and seized the chains, to stop the bucket.

In a second she was drawn head foremost into the well, which is 25 feet deep and in which there is 10 feet of water.

The wells being of rough stone, her husband and the preacher hurried to her rescue. She was conscious and, when they let some lines down to her, seized them and was drawn up. Her head was out and bruised by the stones.

A Dangerous Tobacco Disease.

A very destructive tobacco disease has recently broken out with extreme violence in certain portions of the State. It is the desire of the Station to accumulate all information concerning the disease which may lead to a checking of its ravages. The point now most to be desired is to find out how widely the disease is distributed over the State. To that end we request that all people interested in tobacco growing, who are troubled with any disease of their tobacco plants will send specimens consisting of the lower part of the stem and the roots to the Station. We particularly desire these specimens if the disease consists of the wilting of the leaves, accompanied by brown color in that portion of the stem just inside of the bark. We urge upon all tobacco growers the importance of supplying the Station immediately after this disease appears in the neighborhood, so that we may advise as to the means of preventing its spread. Two diseased plants in the field this year may mean the loss of the entire crop the next year you put tobacco on the soil.
