IMPRACTICABLE GRUMBLING. Without criticism and fault finding, there would be no adjustment of many of those ills, which are so largely caused

by the thoughtless and careless. It is the straighout criticism, striking at mistakes and evils, which may make some one squirm, but if it is honest and unprejudiced, its effect will be for good, although it may cause temporary ill will where it hits.

But there is much which passes for U.S. Steel pf ... 621 honest criticism, by those offering it, Penn. R R 119 which is far from such criticism, and is to be classed as grumbling.

It often happens that even grumbling, N.Y Central 1164 if timely, and not affected with malice or prejudice, will work good.

But there is much grumbling, that is impracticable and barren of results, because it is inspired by ill humor, and Coal, Fuel, Iron. fails in its effect through the poor spirit | Amr. Ctton Oil. which directs it.

This impracticable grumbling is found in the family and adds to the burdens of those who exhibit it, without having any | Money but bad effect upon every member of the household.

In the church, there is to be found much of this impracticable grumbling. It corrects no abuses, weakens the christon spirit of all coming in contact with it, and keeps back all church advance-

On the street, in the office, at public meetings, in the newspaper, the impracticable grumbler is prominent and obnox lous, and will work evil unless set back by strong wills, who recognize the mischief which such a person can create, if permitted to have any control, or even be given hearers.

If there must be criticism or even grumbling, in the family, office, church or upon the street, let it be honest, sincere and kindly. It will then receive attention and be given a recognition which will make it of some affect, and thereby accomplish the good purpose, for which it was offered.

A Late Supper.

A yery steady and serious country tieman had joined a newly estabgentleman had joined a new joined London west end club which offered the advantage of bedrooms for country members temporarily in town. When next the squire visited the modern Babylon he put up for the night at the club, swhich had in the meantim become extremely fushionable and its hours correspondingly irregular. The squire went to bed at an early hour, when all was quiet and decorous. If there were a racket in the night be slept through it.

Next morning he came down to breakfast at his usual hour, 8 o'clock but was surprised to find the room in the middle of the dusting process and not a cloth on the tables. While he was guaing helplessly around a sleepy, eyed r came up to him.

A. B. Baxter's Cotton Letter.

New York, Oct. 2. Cotton eased off sharply during the morning, and there was considerable selling pressure. The market showed little spirit. Outside business was moderate. The south bought at the decline. Cables were lower today, and the weather was very fine. Receipts were fair. There was nothing stirring as regard to the crop or the predicted movement. The more settled situation in Wall Street was having a good effect all around on cotton, despite the early weakness today. The conclusion is that there is no big grop ahead, but this view will be general as soon as frost appears, and it is generally the opinion that freezing weather prior to November 20th will lead to the adoption of a lower total estimate than for some time. September closed with 5,000,000 bales behind last year's. Receipts today were 38,000 against 43,000 last year
