Animals In Alcohol.

Asimals is Aleckof. M. Grobaut, professor of physiology in Paris, in describing the effect of al-cohol upon animals says that the suc-cessive stages of intoxication through which they pass are gayety, sadness, solemnity, and a supreme intoxication which ends in feath. Rabbits are very curious when under the influence of ligner and a draphen have more in humprobably modifications of one universal substance—there is a sequence, nitro-gen, phosphorus, arsenic, antimony, bis-muth. Sir Lauder Brunton has shown that these possess many common prop-erties in their action upon man and that these properties vary in relation to the place of each in the scale. In the days before chloroform antimony and tobacco were used to produce the partial unconsciousness which attends their action. probably modifications of one universal liquor, and a drunken kangaroo is bru-tally aggressive.

Averting the Evil.

Mildred (very superstitions) - Oh, dear, I would never have accepted you, Jack, if I had remembered it was Fri-

Jankins Was Ignored. William Pitt's last wonds are said to have been, "My country, oh, how I love ind country!" Pitt's butler afterward said that the statesman's dying words were, "I hope the country will do some thing for Jenkins." The butler was jenkins, but nobody accepted his testi-mony and the country certainly did nothing for Jenkins.
