## COMMUNITY BUILDERS AND BENEFACATORS.

The merchant, the business man, or the citizen, is the community builder and local public benefactor who as he is prospered shares his prosperity among the people of the community in which he has gained his success.

There are men and women who through some individual endeavor and merit have gained an eminence in some profession or won fortune in the financial world, and as this fame and fortune have come to them, have denied or shunned in public the parents who brought them into the world, because these parents were poor, illiterate or had no ancestral record of which they, the successful children might boast.

Every community has citizens, like these ungrateful children who repudiate their duties of citizenship to the town or city which has made possible their existence and success, and assume that they owe no allegiance, and can stand alone and boast themselves independent and absolved from doing anything which might assist their community or its people.

It is easy to understand that communities afflicted with this class of citizens can not thrive or prosper, for such citizens are only parasites, who retard, hold back and prevent every local development. Fortunately, however, there are grateful citizens, as there are grateful children, who honor their communities and their citizenship by being generous in their prosperity and promoters of local enterprises which may tend to benefit their home people.

The community builder not only helps himself, but he is a public benefactor, for community building promotes local industry and activity, giving work to the laborer and bringing trade to the merchant. Every local enterprise is entitled to the fullest extent of all home patronage. The local newspaper should be the first paper in every household; the local merchant should be the first sought when any thing is needed; local charities should receive the contribution before any outside charity, and every local worthy enterprise should receive the support of every one. The citizens who seek first to uphold their own communities prove themselves the true bene factors to themselves and to the communities in which they dwell.

**Lungs and Groat Fat.**  
"Lungs and Groat Fat" is an old saying, and there is more than a little truth in it, asserts a doctor. "The convulsive movements which we call laughter exert a very real effect upon the bodily framework. They cause the arteries to dilate, so that they carry more blood to the tissues of the body and the heart to beat more rapidly, so that the flow of the blood through the vessels is hastened. In other words, laughter promotes the very best conditions for an increase of the vital processes; the tissues take up more nutritive material and the waste products are more promptly removed. A good laugh results in an increased flow of blood to the brain; this immediately causes that instrument of thought to work better, with the result that gaudy comedions are sent packing."

**The Lone Star State.**  
Down in Texas at Texian, is a big dry goods firm of which Mr. J. M. Hause is the head. My father, on one of his trips West to buy goods sold to a friend who was with him in the prison camp, always took one of these little Baby Blue cameras, setting and you will be sure to have the morning's best good. For the "dark brown" tactic, lookouts and the like, I am sure the Lone Star girls are the best girls to use. What do you think?"

Youth has its own criteria by which to judge things which its elders assess by other standards. Henry had just come into his mother's kitchen, where she was rolling pie crust.

**The Young Men of Today.**

The young men of today are too full—too much given to self analysis, self pampering. Their shoes and neckties cost more each year than did the entire wardrobe of their grandfathers. They feel a sense of degradation and they wait for success ready made to come to them. There is not a young man in the country who would imitate Ben Franklin and march through the streets munching a loaf of bread while looking for employment. He dares not indeed, because society has become also finicky, and he would be arrested as a tramp. The young men of today wants capital. He cannot be president of a bank or judge of a court the first week he is from school, and he feels like the famous Eli Pussey, that he has "no chance,"—Philadelphia Inquirer.
