# CANCEROUS ULCERS

ROOTED IN THE BLOOD. After the age of 45 or 50, when the vital powers are naturally weaker, it is noticed that a hurt of any kind heals slowly and often a very insignifi-

cant scratch or bruise becomes a bad ulcer or sore. At this time of life warty growths, moles and pimples that have been on the body to inflame and fester, and before very long are large eating ulcers.

A small pimple came on my jaw, but gave me no sore. At this time of the natural than the begun to inflame and itch; it would bleed a little, then seab over, but would not heal. This continued for some time then the Cancer head for some time then the Cancer head for some time then the Cancer and have been on the body to give it a fair trial, and it is remarkable what a slimost from birth begin to heal and after taking a few bottles disapted to inflame and fester, pared entirely. This was two years ago; there are still no signs of the Cancer, and my general health continues good. Mrs. R. SHIEER, Wyaconda, Mo.

Whenever a sore or ulcer is slow in healing then you may be sure something is radically wrong with your blood. Some old taint or poison that has been slumbering there for years, is beginning to assert itself, and breaks out and becomes a bad ulcer and perhaps the beginning of Cancer. These old sores are rooted in the blood, and while washes, soaps, salves, etc., keep the surface clean, they are not healing. A blood

medicine to purify and strengthen the polluted blood and a tonic to build up the general system is what is needed, and S. S. S. is just such a remedy. No it and ulcers of every kind quickly yield to its wonderful curative properties.
