#### FULL INSURANCE AND LESS **PREMIUMS**

Besides the really added better protection which a paid Fire Department would give the owners of perishable property in New Bern, there is the double advantage which comes to those insuring, that of being able to obtain full insurance upon their property, as well as the less cost of premiums which would have to be paid for insurance.

Under the present Fire Department service in New Bern, no insurer can obtain insurance on his property for over three fourths its valuation. Every house N.Y Central.... 11 N. & W...... 56 holder, the owner of buildings, or mer- Va. C Chemical. chants who have large stocks of perishable goods, can understand and appreclate the effect of this rule, which the insurance |companys have adopted for their protection, under the volunteer fire service which is given this city.

Owners of perishable property insure their property in order to secure themselves against a loss which they cannot absolutely guard against. Every insurer wants, first, the pecuniary protection which first class fire insurance guarantees, and second, if a fire loss occurs, the insurer desires simply to be made good by his insurance, for the actual loss inflicted.

Under the present Fire Department service, the insurer in New Bern must lose, if his property is destroyed, one quarter of it. And to secure even three quarters protection. It costs a much higher proportional premium rate, than it would cost with a paid Fire Depart-

This city has out grown in every way its present volunteer fire service. This is recognized on all sides. Other cities in this State, notably Greensboro and Asheville, are seeing the same situation in their cities, and seeking to adopt upto-date methods, which can only be found in a paid fire service.

This paid Fire Depatment service for New Berr, can be easily adopted. There are no violent charges to be made, no changes involving special expense upon tax payers. Whatever expense may be found in the change will prove much less tax upon the tax payer than if the present system be continued, and the high fire premium is to be paid and the three quarters loss clause in insurance policies, is the best insurers can get for protection.

This is a matter demanding attention. Every property owner and merchant has a vital interest in this question. There should be immediate action taken in the

Batallard and other authors believe that gypsies existed in Europe from immemorial times, for they find no account of their crossing the Bosporus, and no record is known to exist of their passage to England or Scotland.

They were better received in these countries than in any other, but so early as 1531 an act was passed re-

early as 1531 an act was passed re-quiring the Exyptians to quit the realm under pain of death, a similar edict being issued in Scotland in 1541 and at varying periods in most of th European states.

Transportation across the seas was among the milder means adopted and probably was the cause of much further dispersion of the tribes. Under Henry VIII. gypsies were shipped from England to Norway or France, and from France, so recently as 1802, they were deported to Africa.

Proper Treatment of Pneumonia Pneumonis is too fangerous a disease for anyone to attempt to doctor himself, although he may have the proper reme-dies at hand. A physician should always be called. It should be borne in mind, however, that pneumonia always results from a cold or from an attack of the grip, and that by giving Chamberlain's Cough Remedy the threatened attack of pneumonia may be warded off. This remedy is also used by physicians in the treatment of pneumonia with the best results. Dr W J Smith, of Sanders, Ala. who is also a druggist, says of it. "I have been selling Chamberlain's Cough Remedy and prescribing it in my practice for the past six years. I use it in

A Brave Engineer.
Floyd B Greenfrough, an engineer on
the Great Northern road, did a brave
thing the other day. During a severe
aform the wires at the station where his engine was were injured. Soon after this was discovered it was found that a nearby railroad bridge was on fire, and an express train was almost due to cross it. There seemed to be no. way to warn the coming train, but Greenhough proved equal to the emergency. He got a light engine, crowded on a full head of steam, sent the engine thundering across the burning bridge and reached a station where the wires were intact in time to avert a bad wreck.

England is niways plad to get another citizen, but sometimes she goes about it in a strange manner, according to the Springfield Republican. A sailor deserted from a Russian battle-ship and joined an English crew on a faraway island. He told them that he was tired of the rule of the car and wanted to become an English elit. and wanted to become an English citizen. They were at a loss how to naturalize him, but finally each one threw a bucket of water on him and so masted off the Russian.
