WEALTH! AND

More than that-land is the source of all wealth. The ratio of populati n to acreage is the sliding scale upon which opportunity is guaged, success determined Cut the number of land holders in any State in the Union in two, and what is the result? It's simple arithmetic—opportunities donb'ed in that State. What if three-fourths the population be eliminated? Opportunities quadrupled; and so on That's the co dition in the great Southwest, Arkansas, Indian Territory and Oklahoma. This wast territory is supporting less than one fourth the population of its capacity. Fertile-a land where wheat and cotton thrive side by side-where two yearly vegetable crops are demonstrated possibilities - the greatest fruit section in the country; but that's only half the story. The low ratio of population to acreage makes land cheap - that's the main point. There's room for success in the great So 1thwest. Illustrated literature sent on request
