A New Profession.

The government is at last coming to the knowledge of her duty to protect her people from the robbery and injury done them by those incompetent, as well as those not equipped to fit glasses correct. Bills are being rapidly passed in the separate States, one is now pending in our sister State of Virginia to establish and maintain a state board of examiners in order to decide who is proficient and to exclude those who are not from the new profession of optometry, before which every one wishing to sell spectacles will have to pass an examination. It is a matter of a short time when such laws will become universal. The practice of optometry is a separate and distinct one from that of medicine. Even an optician requires special training and schools to fit and make such spectacles as are worn by the eyes. J. O. B. KELL.

Still more honors have come to our athletic friend Devlin. Yesterday's Journal mentioned his good work with the New York club in Thursday's game. Weather as far as we will be facilitated to have done this year.

The base ball matters have been aroused by the advent of warm weather.

We are going to have some good games if those who care for the sport will "come across" and show their interest.

We have an excellent amateur club and also we have the refusal of some good grounds, rent free, for three years or more. The principal difficulty now lies in putting the grounds in proper condition for playing.

The amateur season will begin in about three weeks. There will have to be some lively work done to get the grounds in good order by that time. If this is done the public can be assured of some very interesting not to say exciting games at reasonable periods during the summer.

There will be a meeting of those interested in base ball affairs at the Naval Reserve Armory tomorrow (Monday) night at 8 o'clock to discuss this question. Grading the grounds, making the grand stand and a few other necessary repairs will require the outlay of a little expense. If all who have the interest of the game at heart will head the appeal and contribute something to the expense it will not be hard on any one.

Turn out tomorrow night and discuss the matter with the boys. Let us have some rousing games this summer.

Letter to Blades Lumber Co. New Bern N. C. Dear Sir: The usual way to buy paint is to take the lowest price by the gallon. Mistake; the buyer loses by it; how much? Depends on the paint; it is so much a gallon, or so much a year. How much a gallon or year, do you think? As much perhaps, as the total price of the paint. It may take twice the number of gallons.

N. Avery, Delhi, N. Y., owns two houses, both exactly alike. He painted one with Devco and one with another paint. Devco 6 gallons; the other 12. Go by the name Devco. There's nothing cheaper. Go by the price; there's nothing dearer, except not painting at all.

Poor paint is better than none. What does it cost not to paint at all? Can't figure it out exactly; say a tenth of the building a year, besides looks. What is poor paint worth, then? Don't know and don't care; you don't want it. Go by the name.

Yours truly, F. W. Devco & Co. P. O. Box 100, New Bern, N. C.
