ed.

This is a business question of moment to our people, and being a citizen to be affected by said election, I feel that I have the right to express my ideas on its latter to discuss the wisdom or folly of sumptnary laws. I grant freely that those advolaws. I grant freely that those advocating prohibition ethink it best for the people. If this is true in fact it should become a law; if it is untrue it should be defeated. Theory is one thing, but actual observation and experience are better. When prohibition was submit-ted to a vote of the people of Texas, I voted for it in good faith. Since June 2 1890, I have faithfully endeavored to enforce prohibition laws of the United States prevalling in the Indian Territory in my jurisdiction. I have had the assistance of competent and faithful distriot attorneys and marshals, excellent grand and petit juries, in fact, every-thing that could be desired to make the law effective, if it could be made so-My experience has taught me that it is

Skin Cures.

Humour, from Pimples to Scrofula.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of

worn-out parents, as is milk crust, tetter and salt rheum, all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Scap, Ointment and Pills are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absqlute safety and great economy, have made them the standard skin cures and humour remedies of the civilized world.

The grandest testimonial that can be offered the Cuticura remedies is their world-wide sale, due to the personal recommendations of those who have used them. From a small beginning in the simplest form, against monied hosts; countless rivals, and trade indifference, Cuticura remedies have become the greatest curatives of their time, and, in fact, of all time, for nowhere in the history of medicine is to be found another approaching them in popularity and sale. In every clime and with every people they have met with the same reception. The confines of the earth are the only limits to their growth. They have conquered the world.
