***************************** There's Room For Success

Southwest

Have you ever considered the great advantage of this feature of the Southwest-pleuty of elbow room-where three, five, even ten acres may be had at the price of a single acre in your home section? It's worth considering, especia ly when the great productive worth of the land is taken in account. It's a wonderfully fertile section. There is no betagricultural section in this country, and farms are cheap out there-in Arkansas, Oklahoma and Texas-simply because there are more farms than farmers- Can you afford to overlook an opportunity of this kind? Our illustrated booklets will give you the particulars in detail. It not interested yourselt write for them anyway in behalf of interested relatives and neighbors. (Mention this Paper.)

THE BAMBOO PLANT.

It Sometimes Grows at the Bate of

Three Feet a Day. The word bamboo suggests to most Americans a faithful fishing rod or a dainty fan. To the Japanese and Chinese, who are the most practical agriculturists in the world, it is as indispensable as the white pine to the American farmer. They are not only dependent upon it for much of their building material, but make their ropes, mats; kitchen utensils and isumerable other articles out of it.

There are many varieties of the bamboo plant, from the species which is woven into mats to the tall bamboo tree which the Chinaman uses for the must of his large boat. One variety is cultivated as a vegetable and the young shoots eaten like asparagus, or they may be salted, pickled or pre-

The rapidity of growth of the bam 000 is perhaps its most wonderful chapacteristic. There are actual records of a bamboo growing three feet in a single day, or at the rate of one and a half inches an hour.

Varieties of hamboo are found ev erywhere in Japan, even where there are heavy falls of snow in winter. It is a popular misconception that bamis a land of bamboos, and yet where these plants grow it is not so warm in winter as it is in California.—National Geographic Magazine.

Women of Masele In the time of Louis XV, there was an actress engaged at the Theatre Francais-Mile. Gauthier-who could break a coin between the fingers of one hand and roll a sliver plate into the form of a cup of conteal shape. No one could bear the pressure of her hand, and only Maurice de Saxe, one of the strongest men of his time, was able to open her closed hand. Rousseau's Affectation.

Rousseau lived long on his fifth floor in Paris, forgotten by the world which he affected to despise and from affectation really shunned, when an accident happened to him in one of his solitary walks. He was met in a narrow part of the street by M. de Fargeau, driving very fast in his carriage, and in his attempt to get out of the way was pushed down by a large Danish dog running before the horses. M. de Fargeau immediately stopped his coach and hastened to assist the person whom his dog had thus knocked down, but when he saw it was the author of "Emilius" he renewed his apologies and attentions.

The next day he sent to ask after "Tell your master to chain up his dog," was the only answer.

Bishop W. A. Candler was once advocating a more liberal loosing of the purse strings and told his audience that several years before he sent an article to a paper, in which he said, "We pray too loud and work too little." The compositor, consciously or unconsciously, perpetrated a little joke, for when the article appeared it read, tle." "I let it go at that," said the bishop. "The fact is, I believe the printer was right, and I never ventured to correct him."

Benefits Reversed. French and German had proved too hard, but Algernon took up the study of Italian with high hopes.

"How are you and your Italian teacher getting on?" saked one of Algernon's friends when the atudy had proceeded for three months.

"Aw-aw, I'm just about where I was," said Algerhon ambiguously, "but my teacher, d'you know, he's speaking English much better than he was when we began."

Triumphs of Modern Sargery.

Wonderful things are done for the human body by surgery. Drgans are taken out and scraped and pollated and put back, or they may be removed entirely; bones are spliced; pipes take the place of diseased sections of veins, authorite dressings are applied to wounds, bruises, burns and like injuries before influenced on the maturation and in one third the time required by the old treatment. Chamberfain's Pain Balm acts on this same principle. It is an World of all Experiences.

RESURRECTION PLANTS.

The Curious Bose of Jericko and the Mexican Fern Ball.

The rose of Jericho is perhaps one of the most familiar of the curiosities of plant life known as resurrection plants. It is said to be imported from the valley of the river Jordan and is the resurrection plant mentioned in the Bible The plant when received from its native home is simply a bunch of leafless and seemingly lifeless sticks of branches clustered tightly together When placed in a glass of water, how ever, the branches expand, seed bud unfold, and soon the green foliage starts out, and the plant grows.

The Mexican resurrection plant i the fluffy, fernlike variety often noticed in saucers of water in the florist's window. When it is dormant it is a shrunken, rounded ball of tightly folded leaflets, dry and dead.

It is dropped in a bowl of tepid water, and soon one frondlike tip curls slowly outward, then another and another, and in a short time there is float: ing in the dish a beautiful metallic green plant, a great, loose, expanded rosette of fine fernlike leaves, odd and beautiful.

This experiment can be repeated many times, the plant curling together tightly when dry and expanding into new life when soaked in water.-Young People's Weekly.
