HAPPY AND PROSPEROUS.

In Western Carolina. Big Congressional Fight. Too Much Civilization For Col. Davidson.

Raleigh, June 18.—Among today's arrivals was Theodore F. Davidson of Asheville, who was seen in the office of the Governor. He brings good news from the mountain region. He said: "Our mountain people are the quietest and happiest people you ever saw. There never were such crops. Our people do not owe anything. So far as they are concerned they are all well satisfied with the State and National Democratic ticket. You know the mountain man always does things cheerfully and with his whole heart. There will be a hard fight in the congressional campaign, but we are going to carry the district. It will be no child's play, however. We are normally entitled to 1800 or 2000 majority, but the Republicans spend no end of money. Their concentrated power is in the federal building at Asheville and it is no trouble for them to carry a campaign to raise as much as \$50,000. In the last campaign they had no end of money after spending it freely in any nook and corner, had \$1800 left, their chairman told me."

Col Davidson is devoted to the mountain country, and speaking about today, the Sapphire country said, that thirty years ago Gen Wade Hampton and himself discovered it. Where they camped and met the will moon shiner, the bear and the trout, now there are \$2,000,000 worth of splendid hotels, railroads, macadamized roads and high civilization. Two years ago Col Davidson went there, but the change was so great that he only stayed for two days and says he will never return. Gov. Aycock smilingly remarked that Col Davidson would be at home thoroughly only in Clay and Graham counties, which have as yet no railroads and are in the State of nature which he so dearly loves.

DEDICATION OF MRS EDDY'S "GIFT."

Christian Science Church, Concord, N. H., a Magnificent Structure.

CONCORD, N. H., July 15.—The newspaper men were today shown through the beautiful new church edifice, a gift from the Rev. Mary Baker G. Eddy, the Discoverer and Founder of Christian Science, to First Church of Christ, Scientist, of Concord, N. H. The members of this denomination, in large numbers, from all parts of the country, are expected here for the church dedication on Sunday, July 16. The cost of the handsome granite building is about \$200,000, and will be dedicated free from debt, which is the usual practice with numerous Christian Science churches which have been built in this and foreign lands.

The dedicatory services on Sunday will be of a simple nature, in accordance with the desire of Mrs. Eddy. They will be held at 10:30 A. M., 3 P. M., and 7:30 P. M. The important feature of these religious services will be the dedicatory message from the generous donor of this magnificent church edifice, the Rev. Mary Baker G. Eddy.

The architecture of the church is the Italian or Southern Gothic, to which the famous Concord granite is admirably adapted. Over the main entrance, carved in Tennessee marble, is the significant inscription: "A GIFT FROM MARY BAKER G. EDDY, THE DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE, TO FIRST CHURCH OF CHRIST, SCIENTIST, CONCORD, NEW HAMPSHIRE." A striking feature of the church exterior is the stone tower and lantern, which rise into the air 165 feet, being visible from all parts of the neighboring country and forming a handsome landmark.

The erection of this magnificent church was made possible by Mrs. Eddy's generous gift of one hundred and twenty thousand dollars. The loyalty of Christian Scientists to their beloved Leader has been well illustrated in spontaneous and unolicited donations toward the furnishings of the Home Church of Mrs. Eddy. A few contributions from scores of churches and hundreds of individuals are as follows:—

The local members of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., presented to their Leader the sum of ten thousand dollars for the organ.

The six churches of Chicago, united in a gift of ten thousand dollars for the pews.

First Church of Christ, Scientist, of New York City, gave ten thousand dollars for the two large transept windows.

Second Church of Christ, Scientist, of Los Angeles, Cal., sent two thousand dollars for furnishing the chancel.

The Students' Association of Jamnab, N. Y., forwarded two thousand dollars for the tubular chimes.

The Kansas Christian Science Students' Association of Kansas City, one thousand dollars for the Reading Room.

Second Church of Christ, Scientist, of Kansas City, about one thousand dollars for the interior furnishing.

A husband and wife of New York City presented to Mrs. Eddy the title for the entire church, at a cost of nearly ten thousand dollars.

Friends in Boston gave twelve thousand dollars for the purchase of additional land on which to erect the church.

From the children in many of the

Christian Science Sunday Schools came contributions for furnishing Mrs. Eddy's room in the new church. The local church has given liberally, and, indeed, Concord's attitude quite generally shows that the old proverb is reversed, and that in Mrs. Eddy's case a prophet has honor in her own country as well as elsewhere.

The new church has one of the finest locations in the city, having a prominent position in the public square, around which are grouped the State Capitol, the handsome Post Office Building, the State Library, the High School, the Unitarian and Universalist Churches, the City Library, and the new City Building. This notable addition to the handsome public buildings of the Capitol City of the Granite State is on the corner of State and School streets, with the main approach to the church on State street, and consists of a broad granite platform running the full width of the church, with three Gothic doorways which give entrance to the building.

This is the consummation of the purpose which has long been in Mrs. Eddy's mind, to have the church of her faith in her home city adequately housed, public announcement of which was made in a local paper as long ago as March 19, 1893 when, in answer to an inquiry by the editor, she wrote:—

"On January 31, 1893, I gave a deed of trust to three individuals, which conveyed to them the sum of \$100,000, to be appropriated in building a granite church edifice for First Church of Christ, Scientist, in this city."

Prior to that, in the fall of 1897, Mrs. Eddy had purchased the homestead of the late Dr. Moses Russell, at the corner of State and School streets, and had remodeled it so as to provide the Christian Science Hall and reading rooms now in use. This involved an outlay of \$20,000 in addition to the \$100,000, set aside in trust for the erection of the church which is now completed.

The Concord church having outgrown the accommodations of the Christian Science Hall, Mrs. Eddy decided in the spring of 1903 to commence the erection of the new structure. Ground was broken June 1, and the cornerstones were laid July 16, 1903, with simple ceremonies, in accordance with the desire of Mrs. Eddy. It will thus be seen that the church was completed on the anniversary of the laying of the cornerstones.

The new church is built from designs by Messrs. Francis R. Allen and Charles Collins of Boston. It is of Concord granite throughout, and in Gothic architecture. Its proportions and lines are strikingly handsome, and in those architectural symbols of aspiration which are inherent in ecclesiastical structures, it will be a notable feature in the city's attractions. The seating capacity of the church is 1,000 and its interior finish and decorations are in keeping with the chastity and elegance of its architecture.

The builder of the church is E. Noyes Whitcomb of Boston. The trustees of the building fund are Messrs. Fred N. Lord, Josiah E. Dwight, and J. Wesley Plummer.

The present Readers of the Church are Rev. Irving C. Tomlinson, C. S. B., and Miss Mary E. Tomlinson.

Christian Science Hall, which has been replaced by the new structure, was completed and first occupied in December, 1897. Here Mrs. Eddy presided Sunday, March 4, 1898, and in November 1898, she taught here a class of seventy students, among whom were clergymen, physicians, editors, judges, business men and others.

The Hall has been the meeting place for visiting members of the denomination from this and foreign lands, and here at various times Mrs. Eddy has met and addressed her followers.

The new edifice which Mrs. Eddy has given to Concord is not to be confused in any way with the proposed magnificent new addition to the church structure of the Mother Church of this Christian Science denomination located in Boston. The Boston tabernacle will accommodate, when completed, 5,000 people, and is needed to meet the increasing membership there.

First Church of Christ, Scientist, in Concord, is a branch of the Mother Church in Boston, and Mrs. Eddy's gift to the local membership is made to meet the demands of the Concord church, which was organized Feb. 28, 1890, with a membership of 72, but which has so far increased in numbers as to have entirely outgrown its old quarters and to require the erection of the new church.

The growth of the new church is inspiring. Statistics show that ten years ago the membership of the Mother Church in Boston was 2,536. The membership is now 50,254, of which 1,125 were added during the past year. The number of branch churches in 1904 was 96; the number now is 318. The total number of places in which Christian Science services were held ten years ago was 314; the total at this date is 850.

The churches of Concord generally have taken great interest in the new building and are justly proud of the handsome additional adornment of their fair city. In a broad-minded way, regardless of class or creed, to a large degree, they appreciate this striking manifestation of Mrs. Eddy's interest in all that makes for the highest welfare of her home city.

TORTURING DISFIGURING Skin, Scalp and Blood Humours

From Pimples to Scrofula, from Infancy to Age

Speedily Cured by Cuticura when All Else Fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalded head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants and anxiety of worn-out parents, as in milk crust, tetor and salt-rheum—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cure, blood purifiers and humor remedies of the civilized world.

Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This complete local and constitutional treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning and scaly humors of the skin, scalp and blood, and points to a speedy, permanent and economical cure when all else fails.

Sold throughout the world. Cuticura Resolvent, (in form of Chocolate Coated Pills, 50c per box of 40), Cuticura Soap, 25c per box of 40, Cuticura Ointment, 25c per tin of 40.
