#### SEVENTEEN HORSES BURNED

In Livery Stable. Warehouse Destroys Farmers Want Rain, Clay

Releigh, Aug. 24—Fire was discovered his morning just before day light in he livery and hearding stable of Gee. H Bardin here. When the firemen res he place all the interior was in fiames. Seventeen horses were burned in their stalls, seven of these belonging to Har dip and insured, the others belonged to private individuals and business firms, some of them being very handsome and It is said that the watchman, a white man, was salcep. The building belongs to M T Leach and E B Barbes and was insured. Hardin, the lessee, is in Balti more at the driving park, with a string more at the driving park, with a string of race horses. About 20 vehicles of various kinds were burned. The fire aprend to a warehouse owned by WA Myatt, which was touched on two sides by the burning stable. Myatt has no insucance. In the warehouse were 240 bags of sugar belonging to the Have meyer Sugar Co., also car load lots of once, corn, pails, lot of molesces and sev cats, corn, nails, lot of molasses and sev eral reaping and mowing machines. The loss is \$3,000 on these and \$1,400 on the sugar. The chief of the fire depart ment says excellent work was done, but on the other hand there are criticisms of artment which is volunteer and it is said there will be a movement to se ours a paid one. The fire was very arar ly in the center of the city and created a great deal of excitement. It had probably been on fire half an hour before discov

The farmers are becoming rather dis-pirited on account of the dry weather. There were carnest hopes of rain here last night, but all failed and the drought continues, all the more severe by reason

of the long rainy season.

BREATHE HEALING BALSAMS

Hyomei's Novel Way of Curing Catarch. F. S. Duffy Guarantees

Two or three years ago when a physician had a patient who was troubled with catarrh, the prescription would be, according to his means, either to seek a change of climate, or to take a tonic or blood purifier. Today, the advanc-ed physician will tell his catarrhal patient to breathe Hyomel.

This novel treatment for catarrh con-sists of a bard rubber inhaler of a size convenient to be carried in the vest pocket or purse, a medicine dropper is possible to breaths while at home or at work, air which is almost identical

at work, air which is almost identical with that of the monatains or health resorts where the air is inden with healtin, and health giving indicants.

No other medicine gives such prompt relief as Hyomel in the treatment of cetarrh. The first breath soothes and heals the infinitely and smarting fair passages, and its angular use for a few days or weeks will ourse the most stableon cases.

no risk whatever in buying Hyenel, for your word decides the question as to whether you pay for the remedy or

and comprises an inhaler, a bottle of Hyomet and a dropper. The inhales will last a lifetime, and additional bottles of Hyomet can be obtained for

### THE REASONS WHY

#### The Atlantic & North Carolina Railroad Should Not be Leased Concisely Given.

Rallroad Begin-rs to 8034-32-33

Whereas through the ingenious intimedic of cortain imenious intimedic of cortain imenious intimedic of cortain imenious the complete of cortain imenious and well-mening people for awhile was
matty twiled, a sentiment has been inrolles favoring a lease of the A. & N. C.
Railroad;
Rasolved. That in the face of certain
facts, we view with deep concern and
slarm the danger now threatening this
road, whose operations so vitally atfacts related to the danger now threatening this
road, whose operations so vitally atfacts a size section of our State in a
territory almost solely-dependent upon
the well-guided and judicious management of it for its present and future
development and progress. And that in
the light of certain insolaure that alease under no conditions be granted
flow, irrespective of company or corporation seeking it.

If the manes of the people of our
State thoroughly understood all the
facts relative to the efforts made to
force the State to surrender its rights
to this property and place it in other
hands, there would be a unanimous
voice raised, opposing in emphatic
terms any and every effort to effect a
lease. I speak with a thorough knowledge of the situation without blas. I
have been a resident in a city through
which this road runs from my earliest
boyhood, and have held stock in it, and
have been indirectly and often directly
interested in its management from the
beginning of my business cancee.

With this railway as the main avenue
of wasching the outer world by may
people living in the counties east of
Geldaboro, entirely dependent upon it
for communication and transportation
with arterial points of commerce, it
should be expected of us to jealously
guard it to the extent of our ability,
I recognize that in the hands of an untriendly corporation, the agricultural,
commercial and manufacturing inter

any city or section through The roadbed is laid through a level t passed might be damaged or section of country, with long stretches destroyed, dependent as it would be entirely upon the caprices or cupidity of perfectly straight track. It is easily entirely upon the caprices or cupidity of its management.

A STEADY AND SAPE INCREASE depressing period, it is now safely on the highway to a prosperous career. Its future is most promising, and it is this the lease of the road, I wish to call attention to agree feater relative to the first period of the capital tracks.

A SUBADY AND SAFE INCREASE

OF BURINESS.

In support of my position, opposing the lease of the road, I wish to call attention to some facts relative to its increase of business, as will appear from the appended statement which was carefully prepared by a competent screening period, it is now safely on the highway to a prosperous career. Its further is most promising, and it is this which has excited the cupidity and hungry desire of certain capitalists to recountant. In the first place, I note that the average earnings per mile, which was in the years of 1801-02-03 to 12.11, almost doubling, and while I bettleve flat the eastern section of North Carolina in many essential features is the best portion of the State, it is to day only beginning an era of development and progress unparalleled in its history.

I submit approximate figures which I that average sustances and safe which are based upon an increase of actual business. A husiness which is growing with greater rapidity than these figures indicate. For instance, I must that the awarage sustances each year per mile from 1801 to 1800, inclusive, was 22.300, when it results for the state that the awarage sustances each year per mile from 1801 to 1800, inclusive, was 22.300, when it results for the state that the awarage sustances each year per mile from 1801 to 1800, inclusive, was 22.300, when it results for the state that the awarage sustances each year or more than all the sustances and the awarage sustances are sustances and the sustances are miles for the year or more than success.

The amproximate of the sustances and the sustances are miles for the year or more than success.

The amproximate the treatment and the complete of the proposition of the first place of the sustances and the sustances and the sustances and the sustances are made to the sustances and the sustances are sustances and the sustances are sustances and th
