INDUSTRIAL INSTRUCTION.

By President Geo T Winstan, College of Agriculture and Mechanical Arts.

Most of the pupils in our public schools will be employed after leaving school in some business, occupation, trade, or profession requiring manual labor.

But the training of our schools does not look to this end. It looks rather away from it. Neither public sentiment nor educational sentiment in North Carolina recognizes any connection between labor and education.

We have among us so little skilled labor, so few industries based upon technical and industrial education, that we scarcely realize the necessity of such education for the production of wealth.

The sidewalks of the streets in our capital city are paved with brick hauled into North Carolina from other states. We are buying dirt because we have not the skill and knowledge to press, burn and glaze it.

A century or more ago we got our fine bricks from England. We have now reached the point of getting them from Pennsylvania or Ohio.

A few years ago an Englishman was buying thousands of white oak trees in central North Carolina and shipping their trunks to Liverpool. Other trees unbought were decaying in the woods.

For lack of industrial education and training we have few skilled industries. We take it for granted that we can't make things, and other people can. Somehow or other we expect to learn without employing the means used by other people who have learned how.

Massachusetts makes more money from cotton than the whole south. It sells skill and knowledge instead of raw material.

It secures skill and knowledge by technical education. Massachusetts has two textile schools earn larger and better equipped than the North Carolina College of Agriculture and Mechanical Arts.

Our ignorance is so great that we scarcely believe technical and industrial education to be a necessity. We take it for granted that a graduate of a literary college or of the University is well equipped for any industrial career.

Industrial and technical education does not differ from literary, scientific or mathematical in the time and process required. It cannot be picked up in a year or two, at leisure, or at pleasure.

Industrial and technical education, if desirable for other states, is for North Carolina an absolute necessity. Our soil is too poor to compete except under the most intelligent system of interested and diversified farming.

How can we live by producing only raw materials. Louisiana with richer soil, might do so, or Mississippi, Texas, Illinois, Ohio or Indiana, but even they are not doing it.

It is, by and by, creating finished products and are recognizing industrial education as essential thereto.

We must do likewise. We must educate our boys and girls on the farm and teach them to use machinery.

We must also train many of them to become manufacturers. Let us learn from Germany, from England, from New England. Let us learn thoroughly the lesson of the kindergarten, and apply its great principles to our whole system of education.

From the North Carolina Journal of Education.

How do you think I look in my new \$4.50 suit? Test de same as you always did—like 'irty cents.—New York Evening Journal.

THE SECRET OF SUCCESS.

Forty million bottles of August Flower are sold in the United States since its introduction! And the demand for it is still growing. Isn't that a fine showing of success?

A CARD.

To the Man who Wanted a Loan From a Friend. Oh, the man who has asked me for a small loan!

My friend, you have asked me for the loan of a certain amount, stating that you needed it only for a short time and that you would pay me back by a certain date.

In reply to your request I might state that I happen to be short of ready cash just now and regret exceedingly that I cannot comply with your request.

But I shall do none of this. I shall refuse you the money on other grounds—grounds which I shall endeavor to make plain to you, so that the matter may not again come up between us.

In the first place, I will have you know at once that I am no moralist. My refusal is not based upon any absurd notion as to the deteriorating effect that a compliance with your request may have upon your character.

Whether to let you have the money will do you good or will do you harm is no concern of mine. You have arrived at your present dilemma through agencies which are entirely personal to you.

No, my friend, I am refusing you the loan for other reasons, purely selfish. The fact is that I like you. Your faults, so long as they do not obtrude themselves upon me, do not matter.

"It may be pink" (or some color in the room), says the first inquirer. Then begins the questioning. Is it the paper? The ribbon on your hair?

"What color may it be?" asks the other. "It may be pink" (or some color in the room), says the first inquirer.

"But I am sure I could interest you," argued the dealer. "A man who has the money you are said to have surely ought to afford a good touring machine."

TESTS PATIENCE.

The Most Patient New Bern Citizen Must Show Annoyance at Times.

Nothing spoils a good disposition. Nothing taxes a man's patience. Like any finchness of the skin, itching Piles almost drive you crazy.

All day it makes you miserable. All night it keeps you awake. Itch, itch, with no relief. Just the same with eczema.

Can hardly keep from scratching it. You would do so but you know it makes it worse.

Such miseries are daily decreasing. People are learning that they can be cured. Learning the merit of Doan's Ointment.

Fifty of proof that Doan's Ointment will cure Piles, Eczema or any finchness of the skin. Read the testimony of a New Bern citizen.

John F. Hans, proprietor of General Merchandise store at 80 Middle street, says: "I used Doan's Kidney Pills and they are all they are represented to be."

FOR THE CHILDREN

Some Little Misses. This Miss is unhappy—misfortune. This Miss is not always honest—misappropriate.

This Miss wastes time and money—misappet. This Miss should be shunned by the traveler—misguide.

This Miss gives unreliable information—miscall. This Miss meets with ill luck and delay—misadventure.

This Miss can destroy the peace of a nation—misrule. This Miss is an uncertain correspondent—misdirect.

This Miss makes trouble wherever she goes—misdoing. This Miss causes sorrow to her mother—misconduct.

This Miss does not value her friends—misappreciate. This Miss is distrustful of human nature—misanthrope.

These three Misses are untruthful—misrepresent, misinterpret, misstate. Story of a Lead Pencil.

When I came out of the factory I felt very proud, as I was of a bright red. I first went to a man who put me into a window with many other pencils.

Game of Colors. The following is a very simple game, but will help the time to pass pleasantly. "I see a color you don't see," says one.

Hide in Sight. Hide in sight, a kind of hide the handkerchief, in which the object, usually something unnoticeable, like a small coin, is placed where it may be seen without removing anything—for instance, on the floor or on a table or chair.

Whistling Trees. A species of acacia which grows very abundantly in Nubia and the Sudan is called the "whistling tree" by the natives.

Our Nine Thousand Coast Lights. There are 9000 burning lights and signals stretched along the American coasts, forming a perfect link, so that the navigator need never be beyond sight of one of the beacons.

The Conductor. A three-year-old going to church for the first time was much surprised when he recognized one of his father's friends taking up the collection.

How to Cure Corns and Bunions. First, soak the corn or bunion in warm water to soften it; then pare it down as closely as possible without drawing blood.

Political Meetings. The following meetings have been appointed by the State Committee. Hon. D. L. Ward and W. L. Arendell, candidates for the Senate will address the people at these meetings.

The Power of Steam. Money may see that it takes longer to heat. When James Watt saw the steam causing the kettle lid to jump up and down he said "There must be power in that steam that it can lift such a weight."

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the city of Toledo, County and State of Ohio, and that some firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of scurvy that cannot be cured by the use of Dr. Hall's Catarrh Cure.

MALARIA IN THE SYSTEM

Holly Springs, Miss., March 24, 1904. While building railroads in Tennessee some twelve years ago a number of hands contracted fever and various forms of blood and skin diseases.

I suffered greatly from Malaria, which would break out on different parts of my body. I saw S. S. S. advertised and after using about three bottles I was cured.

I began using your S. S. S. probably ten years ago for Malaria and blood troubles, and it proved so good that I have continued ever since using it as a family remedy.

Boils, abscesses, sores, dark or yellow spots and debility are some of the symptoms of this miserable disease. S. S. S. counteracts and removes from the blood all impurities and poisons.

Low Railway Rates for Circus. The Howland Improvement Co., Lessees of the A & N C railway offer the following low rates to and from New Bern October 4th, off account of John Robinson's Circus.
