Official Paper of New Bern AR Craven County.

NEW BERN, N. C., Nov. 25, 1904

NEW BERN NOT AN INLAND CITY The merchants of New Bern, and its

Chamber of Commerce, ought to be ever fully alive to the fact that this city is not inland, but upon a splendid water way, which has contributed in the past, and abould be made to contribute more liberally in the present and future to the city's commercial prosperity.

The reports sent out from the How land Bureau of Publicity, tell of what great plans Benater Aldrich has for deepening the water at Beaufort, and making that place a great port of commerce.

This is all right, and the Journal only hopes that the proposed appropriation of \$200,000 for Beaufort can be secured and even more. But that is the plan for Beaufort, as outlined by Senator Aldrich and the others interested with him in the lesse of the Atlantic and North Carelins railroad, and it has nothing to do with New Bern, whose people cannot afford to wait until Sen ator Aldrich and his people make anoth er Sanday visit to this city, and perhaps promise to look after its commercial interests.

What is needed is that there be some action on part of the Chamber of Commerce of this city, largely backed up by its merchants and citizens, generally, an action concerted and business like, with definite plans looking to some legislation which shall secure appropriations from Congress to keep open to a sufficien depth both the Neuse river. below New Bern, and the various branches of the

Neuse and Trent rivers above this

Such legislation can be secured leading to government appropriations for the rivers tributary to New Bern, it there is only some local action taken

This District has an active represents tive in Congress, in the Hon Charles R Thomas, and by being active and per

PLAYS AND PLAYERS.

Bernard Shaw's latest play will be called "John Bull's Other Island" and will attempt to give the stage the real Irishman. It is to be produced at the

Court theater, London. Edward Terry, the actor and owned of Terry theater, London, is engaged to marry Lady Harris, the widow of Sir Augustus Harris, says a special dispatch from London.

Young Mile, Germaine Rejane, who has accompanied her mother to this country, says she will never, no, never, be an actress. It is an interesting fact that she made her only stage appear ance in this country.

A new prime donne. Miss Martha Carine, is seen in the production of "The Cingalee," by J. C. Duff's company at Daly's theater, New York. Miss Carine is an American girl who has studied in Paris for several years.

Elsie De Wolfe has returned from Europe after a trip which began in the early spring. She has a play called "The Massarenes," by Ouida, which Paul Kester is to dramatize. She has several others in reserve, including one by Brieux.

Lillian Russell signed a contract with Sam S. Shubert, by the terms of which she is to star under the Shubert man agement for five years, beginning next December. Miss Russell's initial yehicle will be an operatic version of "The School For Scandal."

HORSES AND HORSEMEN,

Izetta, 2:181/2, retires for the season unbeaten. There are few like her. The Roman has been second in many fast heats this year, but has not we one.

Snyder McGregor's new record is 2:07%. He is among the big winners of the year. John Mae, 2:09%, has been another

severe disappointment for Geers. He has won but one race for him. Stanley Dillon's 2:07% is still high water mark for the year for a green trotter and bids fair to stay so.

The gray mare Ruth C. goes into winter quarters without a record. She has won quite a bunch of money too. Adara, the fast daughter of Advertiser, 2:15%, reduced her record to 2:161/4 in a fifth heat over the Wheeling (W. Va.) half mile track. Two pacers are now tied for the

world's record for a seventh heat, 2:07%-Baron Grattan and King Direct. Geers drove them both.

Margrave, three years old, the superb roan son of Baron Wilkes, 2:18, owne by the Flemings of Terre Haute, has nine new performers and stands second for the season to Allerton only.

BREAKFAST IN ENGLAND.

The Evolution From Ale and Win-to the Modern Meal . According to the Oxford Dictionary, 1463 is the date of the earliest mention of breakfast, but until a century ago it consisted only of a draft of al or tea or chocolute. There were only two meals a day-dinner, ranging from 9 o'clock in the morning in the fifteenth atury to noon in the seventeenth and su per, which similarly advanced from 5 in the afternoon to 7 o'clock. Pepys, for instance, went down to the admiralty at 4 and 5 in the morning on no other breakfast than half a pint of wine or a dram of cordial. But in the eighteenth century dinner was gradually postponed until 5 or 6 o'clock in the afternoon. When it passed midday breakfast became a necessity and a meal. Before this hunger had demanded the addition of brend and some such relish as radishe

to the morning draft. But when, a hundred years ago, cold meats and fish began to be served at breakfast the utmost surprise was ex pressed. Its novelty made it fashion-able and led to the giving of breakfast parties. Eleven or 12 o'clock was the bour, and it was declared to be par excellence the meal for poets. Tom Moore was an inveterate breakfaster and after the trencher work sung for the company's entertainment. Breakfast finally became an institution, as a necessary oasis in the long stratch between supper overnight and dinner the next afternoon. This ac

ceptance of breakfast a century ago Ezekiel Hinds of Newport, Me., sevthus made England for the first time enty-eight years of age, has begun to a three meals a day nation. amoke cigarettes.

There is everything to keep and gain in such a movement, while sitting down means that trade will be diverted from this city.

Let the citizens just keep in mind that New Bern is not an inland city and act on it, and it will solve many of the twists in the transportation and freight storage problem which now affects the local business interests.

THE REPORT OF THE OWNER.

Salt For Sheep.

The great value of sait for sheep was shown in some recent experiment made in France. Three lots of sheep were treated alike in the matter of food, except that one lot had no salt, a second lot had one-half ounce per head every day, and the third lot three fourths per day. Those receiving one half ounce per day did the best, gaining four and one-half pounds more than those that received three-fourths ounce All the sheep receiving sait made 18.4 pounds more wool and had a better floece than those which had none."

Boot Menl.

Beef meal is made from scraps o meat and bone from which the grease has been extracted and the liquor concentrated by cooking. The residue is then pressed, dried, ground and put in 100 pound sacks. It contains about 60 per cent protein and 8 or 9 per cen fat. Beef meal is fed to hogs with good results. It may be fad with corn in the same or somewhat greater pro-portions than tankage. Ment scrap has about the same composition as beef meal and is fed in the same way .-- Rural New Yorker.

For Burns. Apply molasses or strup and cover with a piece of paper. It will take out all inflammation, even if bilistered. Afte-erward put on vassiline until healed.
