The ubers at the theatre have adopted the common sense plan of detaining late comers to the show at the rear of the house until there is a convenient time to seat them. WILL MAKE A TEST CASE.

The Anti-Trust Law & Considerations. It is of the opinion of C. M. Buckner, of Raleigh and other leading lawyers of the State that the anti-trust shop law for which the late legislature is responsible is unconstitutional and they advise dealers in stocks and cotton brokers to proceed with their business and to let the Supreme court determine its right to be a law.

They maintain that the law is class legislation of the rank and kind and as that is against the provisions of the constitution it is therefore a nullity. The bucket shop in Raleigh will not close and the result will be a test case in which they are confident of overthrowing the act.

THE EFFECT OF Eye Strain on The Nervous System. An uncorrected error of the optical apparatus of the eye requires an excessive amount of nerve force to stimulate the muscles governing it, and can be compared to a pair of opera glasses not in focus, you cannot see unless the error in the optical apparatus is corrected, nor can you see unless the error of the eye is corrected, you adjust the opera glasses by a screw, the eye by an excess amount of nerve force stimulating the muscles of accommodation, which is a constant strain and not only breaks down the eye but other muscles living in sympathy are caused to contract, resulting in cross eyes, the drain is a breaking down of the whole nerve system, headache a symptom and warning, inflammation of the eye inability to read for any length of time, or concentrate the mind, are all evils flowing from an uncorrected eye strain, scientifically fitted spectacles by an experienced optician being the only treatment.
