I compose that there never was such a fing rishing time as the present for men with a grievance. The daily and weekly journals eagerly welcome letters complaining of the increase of carpaience, the pitfalls of the split infinitive, the prevalence of the red tie among the lower middle class, the care sness of the younger generation dotting its i's and other equally dreadful abuses which do not matter one ned to agree with the writers of these letters, who are for the most part men of enforced leisure and idle hands, that England is rapidly about to decline and fall .- London World.

Consumptives Made Comfortable, Incipient consumption is cured by Foley's Honey and Tar, but we do not hold out false hopes to consumptives by claiming that it will cure this dread disease in the advanced stages; but if the lungs are not too far gone Foley's

#### THE SOLDIER OF 176.

General John Thomas was the com-mander of the provincial troops when they occupied South Boston. He was an lutimate friend of Washington and was regarded as one of the best offi-cers of the little army. His military career, however, was short, for in 1776

The post which Thomas was ordered to occupy was at the top of a Roxbury. hill, the approach to which was plainly visible from Boston. The general's troops consisted of only 700 men, butwhen the army took up its position he marched the line round and round the bill, multiplying many times the apparent size of the regiment.

In some respects the scornful appellation of "rabble" given by the British to Thomas' division was appropriate to the provincial troops stationed on the hilltop. The social equality and familiarity which existed at home between the officers and privates continued in camp. "Bill," said a captain to a private,

'go and bring a pail of water for your "I shan't," responded Bill. "It's your

turn now. I got the last one." The appearance of the troops was against them also from a military point of view. The soldier of '76 was a grimy figure, his head wrapped in an old bandanna handkerchief, pipe between teeth, leather breeches, yarn stockings and hobnailed shoes, but it was a company of these uncouth soldiers who fortified Dorchester heights in a single night to the wonder and admiration of the British army.

By RENE DEVERAUX.

This is certainly a season of gold and so lavish an employment of gold and silver and sparkling spangles in the trimming of hats, wraps, gowns, coats and suits. Everywhere the most somber shades are lightened with a touch

Many of the long coats in dark blues and blacks are adorned with double rows of dull gold buttons. Soft evening wraps are piped with cloth of gold, effectively combined with velvet in black and rich shades, and embroidered trimmings and waistcoats, which the Directofre vogue has so much popularized, show through their designs glinting threads of burnished gold,

Hats of velvet and French felt are ornamented with bands of gold, some of the more dressy affairs for evening and theater wear showing a profusion of gold and silver roses.

Combined with tulle boas are tiny inner ruches of gold or silver, their narrow gold or sliver streamerse two or three on each side, falling almost to the hem of the gown in front.

Through the meshes of lace robes

of gold interlining, and elaborate belts and girdles are fashioned of plain gold and embroidered stuffs in many new

and fashionable weaves. For dark cloth suits there are thickly embroidered bands in Persian effects through which metallic threads or i very fine gold cord is interspersed, and Arnica Salve healed it, and now it is much of the chenille embroidery used for similar purposes is interwoven slightly with gold thread or has embroidered stitches in gold worked upon it.

One scarcely meets a child these days whose jaunty little coat or jackat is not fastened or trimmed with gold buttons and gold buckles.

Bodices and blouses made of piece lace dyed to match the shade of the velvet or cloth skirts with which they are to be worn are soft and becoming and easily made. With these, as well as with other costumes, gold girdles tive, adding a new note both striking and artistic; In spite of such elaboration in trim

mings, skirts as a rule are severely plain. Particularly is this true of the separate akirt for practical purposes This skirt, which is becoming more and more popular, closely resembles an abbreviated riding habit. The smartest of these are festened directly in front underneath a double slotted seam. A corresponding seam is down the center of the back, not a plat or gather to be seen anywhere. Narrow hence, tallor stitched, usually fluish those skirts at the bottom.

This same model was seen in a near present employed. Hosin, the writest by invisible green and brown plaid. In that can be obtained; respectfully plaids the circular sides are decidedly bias in effect, and the flare at the bot tom is in graceful ripples. Newbro's Herpicide

## THE HUNTERS CAME

Their Faithful Dog has pointed out the True Remedy to Prevent Baldness but the Hunters Came too late .- Chronic Baldness is Incurable,

"HERPICIDE ' A HAIR-SAVER."

Newbro's Herpicide saves the hair by destroying cause of dandruff, falling hair and baldness. In chron ic baldness the hair follicles are completely atrophied, the germ or microbe that is now known to be the causing the scalp to shrink and shine; little can be done in such cases except to save the remaining some protection against the cold.

gets its life and strength from the hair-papilla at the bottom of the hair follicle, and the papilla in turn gets its nourishment direct from the blood; therefore hature is the only true hair grower. There are enemies of hair growth that cause hair loss and baldners. Invisible microbe growths enter the sebaceous glands, situated at the top of the hair follicles (Dr Sabouraud of Paris, says the microbe usually enters the scalp in to be just what you claim for it. youth), where one colony after another is established, until finally, after mouths and sometimes years, there is dandruff, itching scalp and falling hair. The Sebum also solidifies, causing dry, lustreless and brittle hair. Destroy this microbic growth with Newbro's Herpicide and protect the hair against re-infection, and it will grow as nature intended.

Newbro's Herpicide is a Twentieth Century Remedy, its mission is to teach new rules for scalp clean'i-ness, new rules for hair preservation and to supp y a sons to have beautiful and luxuriant hair. Almost marvelouf results follow the use of Herpicide; and if done in such cases except to save the remaining it does not do more than we claim for it, your dealer "fringe," and this is well worth saving, for it offers some protection against the cold. The "Hair Grower" is a fallacy. It requires but a ing odor, which is characteristic. It contains no oil, slight knowledge of Anatomy to know that the hair grease or sedimentary substance, neither does it stain nor dye the hair.
