The story is told of a forger in Athens Lat be protested that when he had furthed "improving" an antique be himself could not always tell where she genuine part ceased and the false be-gan. Under such circumstances it may not be wondered that at times even experts are tricked.

The following incident shows how

forgeries turn up in very unexpected places: One hot day a party of us were folling up a steep ascent in the island when we saw above us a number of Greeks seated on a parapet of ruins. We had been cruising long enough among the Ægean islands to know that these people of the place had seen our ship drop anchor in the water below and were now waiting to sell us antiquities. At the sight of these Greeks one of our number, a tireless Scotchwoman, scrambled ahead of us to the top, where we could soon see ber, wind blown and outlined against the blue sky, bargaining for a vase. When we reached the top after a more ieisurely climb she put her purchase in my hands and asked me what I thought of it. My hands were moist with perspiration from the exertion of the climb. and for answer to her question I held them out to her all blackened from grasping the vase. The sweat had attacked the maiern paint with which it was covered, and by thus coming off on my hands the color had betrayed its The whole vase had been patched up from six or seven pieces and then painted over to conceal the

CONCERNING DREAMS.

Often Indiente a Serious Illness-The

Harvey, who discovered the circulation of the blood, is sald to have recorded a dream in which a bumblebee stung him in his left thigh, on a place where a couple of days later appeared an ugly useer. Malesherbe, the rein a dream attacked by a rowdy, who stabbed him in his left breast with a dagger in an area where the following evening he felt the first attack of severe pheumonia. "The archives of medical reports," says Dr. Axel Emil Gibson, "are heavy with cases of a similar character, which have either received no explanation at all or else have been explained away entirely."

Dr. Glisan calls attention to the fact that dreams depend on some other media than those known as the five senses. A conclusive evidence in favor of this view is found in the circumstances that even the blind are able to see in dreams, as witness experiences recorded by Helen Keller, "Blind Tom," the poet Milton and others: bence the conclusion seems to be unavoidable that it is only as far as physical vision is concerned that the optic nerve guides and limits the field

of vision. duction that dreaming and waking differ in degree and form of manifestation only, not in principle and essence. "Like waking consciousness," he avers, "the dream reveals, but does not create. The same world that surrounds the waking individual surrounds the chains and grabs, and stretchers. dreaming, only the viewpoints and media of observation are changed."-Chicago News.

Was Just a Dream.

"Some old fellow over at Fort SIN who has been in this section of the country for a good many years once dreamed that there was an Indian massacre on the summit of Signal mountain. He afterward began to tell that dream, and at length told the story for the truth. That dream has gone down in history as an actual fact. There hever was a massacre on this mountain, nor even a battle of any sort. In early days, after the establishment of Fort Sill the soldiers had a signal station there, built the house that is now crumbling in ruins and
