DEFICIAL PAPER OF NEW BERN AND CRAVEN COUNTY.

New Bern, N C., Jan 5 1906.

NEW BERN'S LAST YEAR FIRE RE-CORD.

New Bern's fire record for 1905 is rather a startling one. It shows thirty three fires of all kinds, with a total of lesses of over one-half million dol-

This to the average citizen will seem to be a record for which some accounting ought to be made. First, were the fires due to just ordinary causes, and why so many within twelve months, and second, how did it happen, there being nothing out of the usual accidental causes of fire, that there should be over \$500,000 of property destroyed.

In answering the first, while there have been suspicious circumstances alleged in connection with several of the big fires, there has been no proof to justify the suspicions, and sustain them That the property losses have been so large, has been more an unexplainable condition, for the big losses have been in several localities. Neither can it be aid to any special inefficiency in the local fire department, for men and apparatus were up to their customary good standard.

The real situation, locally, as re gards the fire department and fire protection, is that this city has out-grown the past and present methods employed Not only has the city grown in size, in number of extra fire risks to be encountered, but there has been a gradual decline in the enthusiasm which has inspired fire fighting among the volunteers, to whom property owners must look for protection.

In plain language, a paid fire department is demanded for New Bern. It is wanted in order that those who have property, and have it insured, shall not be taxed at almost prohibitive rates, in in order to be insured. This change from volunteer to a paid fire departmen is demanded because every month finds less enthusiasm to get out to fires, and delay in getting to fires means im mense fire losses.

There is nothing to compel volunteers to risk personal safety, clothes and comfort in trying to save proper; from fire. Every fireman has suffered at some time of his service, and with out the stimulus which has hitherto existed, in the rivalry between fire companies, there is now the thought of per son and the hesitation to start quickly and risk personal effects of clothing and limbs, to be at a fire and fight the

flames. It does not follow that 1906 is to show any such fire losses as 1906, but the fact remains that to assure against big fires, there must be a paid fire department for this city. It must come, and the sooner the more money saved. And the more assured protection prop. erty will have against severe fire losses

by local applications, as they cannot reach the diseased portion of the car. There is only one way to cure deafness, and that is by constitutional remedies Deafness is caused by an inflamed condition of the mucuous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is en-tirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be deare caused by Catarra, which is nothing but an inflamed condition of the

A Modern Miracle.

"Truly miraculous seemed the recovery of Mrs. Mollie Holt of this place," writes J. O. R. Hooper, Woodford, Tenn.. "she was so wasted by coughing up pus from her lungs. Doctors declared her end so near that her family had watched by her bed side forty-eight hours; when, at my urgent request Dr. King's New Discovery was given her, with the astonishing result that improvement began, and continued until inally completely recovered, and is a healthy woman today." Dangers of a Cold and How to Avoid Them.

More fatalities have their origin in or result from a cold than from any other cause. This fact alone should make people more careful as there is no danger whatever from a cold when it is properly treated in the beginning.
