EASTERN CARULINA RAILROAD AND TIMBER MERGER.

ents in the local colus of the Journal, from time to time all point to the culmination of a tremendous railroad and timber land merger of these interests in Eastern North Carolina. The Virginia-Carolina Coast. the Suffolk and Carolina, the Coast Road, and just made public the Pamlico Orientul and Western, and hardly to be doubted, the Norfolk and Southern, and the Atlantic and North Carolina, these railroad properties all seem to be under one giant control of men to whom the nestion of money, in any amount, is of mall importance, if money is wanted for the acquirement of good properties. Together with these railroad combinations, there is also a gathering together of the large timber interests of this Eastern Carolina section, which include mills and roads over which the mill people have carried logs to their mills. Among these timber interests are the Roper and Blades people, whose properties are estimated at about \$4,000,000. If the timber interests are merged with the smaller railroad interests, the latter said to be capitalized at \$7,500,000. these totals go beyond the eleven million dollar mark, and if the large roads be added, with the additional timber interests said to be held by option, it is easy to see that here is some \$20,000,-000 to \$25,000,000 of practically new money coming into this section, and se investors are people who make invested money earn something, so that these many millions must produce a

> American League Topics. Rube Waddell, the famous pitcher of the champion Philadelphia Athletics, may be sold or traded to the Boston American team before the beginning of the next championship campaign. Connie Mack, manager of the Athletics, was in Buffalo in conference with Manager Collins of the Bostons, and the dea whereby Waddell will become a member of the Puritans may be announced

> One of the reasons assigned for Mack's willingness to let Waddell go is the coldness of the Philadelphia fans toward Rube. When the big twirler broke down last fall part of the Quaker ans thought his allment was not genulne, although the management was thoroughly convinced that the famous 'southpaw" was "all in" at the finish of the season. On account of Waddell's eccentricities and desire to stand high n the estimation of the rooters Mana ger Mack is afraid that Waddell would not be at his best if the fans were in

Where Toys Are Made. Until a few years ago all the toys the American children played with were brought from Europe. Now every toy that can be made by machinery has its starting place in the United States. Tin and pewter toys and all those that have clockwork for a moving power are manufactured in Connecticut, New York and Pennsylvania. All the drums used by our American boys are made in Massachusetts, Music boxes are the product of the people living in Switzerland, Harmonicas and jewsharps come from Austria, while all wooden toys are of German make

All dolls, with the exception of the finest and most expensive ones, which are made in France, are manufactured in Germany. The wooden jointed dolls come from the Tyrol, but the others as well as all false faces and masks are made in Germany.

A Rainy Day Race.

Gather all the children in the playroom or hall-for this game is apt to prove rather rough on furniture-arrange a number of hazards, such as low stools, boxes up and down steps or a jump from two rugs placed a short distance apart. Then give to each player a teaspoon with a spool standing upright in it and tell him he or she must hop on one foot over the entire course without upsetting the spool. If the spool topples over or the racer rests on two feet, even for a minute,

he is out of the game. The one who gets over the course with the least mishaps is the winner and can be given a-small prize.

Intelligent Dogs.

The shepherd dogs of South America have an extra duty to perform. The vultures are very cunning birds and the dread enemies of all sheep owners, The sheep are so heavy and fat that when they fall down and roll over on their backs they cannot get back on their feet. They lie down and kick, and the watchful dogs know this sigome other team, but the deal is by no nal as one of distress. They run to their assistance and help them up; otherwise the vultures would swoop down upon them when in their helpless condition, pick out their eyes and torment them in other ways until they die.
