half, mose which may be the lirectly from a person or indirectly from a person or indirectly from the class be scarled fever, measies, diphtheria, on, influenza, crystpelas and vario pering; a also whooping cough, are contagious and infectious.

Courting Castoms of Slam.

In Slam the lighting of a cigar indicates a betrothal. In that country a person wishing to become engaged to the girl of his choice offers her a flower or takes a light from a cigar or cigarette if she liappens to have one in her month, and thereupon, provided there is no impediment, steps are at once taken to arrange for the payment of the dowry. The families of the bride and bridegroom have each to provide a considerable sum. In Calabria as in bridegroom have each to provide a con-siderable sum. In Calabria, as in many parts of India, a lighted taper or a lighted pipe betokens the acceptance of the sultor for the hand of a lady in marriage. In Siberia it is the custom that when a sulfor has been accepted by a girl she presents him with a box of cigars and a pair of slippers us a sign that he is to be master in the

One of the familiar sights on the treets of a Japanese town is the pan-ake woman, who, with her little bracake woman, who, with her little bra-sier of coals and her tiny frying pan, is usually found on a corner not far from a school. She has a bowl full of delious batter, a ladie and a cake turner, and there is apt to be a hungry crowd around her little stand as soon as school is out, for not many of the chil-dren are able to resist the smell of the crisp pancakes, at least if they have any money. For a small coln worth only a fraction of one of our pennies a child may fry and turn his own cakes, and happy is the one who has a number of coins in his little kimono sleeve and can fry and eat to his heart's content.

A fourth class postmaster—and he doesn't live in Biliville—sent the following to headquarters in Washing-

"This wil make three times that I'v told you I'm laid up with a bad log, havin' shot myself in the loft leg-the one that was wounded in the war while I was tryin' to kill a squirrel for my breakfast, and I will not be besides, I don't pit much holiday no how?"-Atlanta Constitution.

beadquarters of the London police, is a historical place, and to have been the site of a pulace where kings of Scotiand were received when they came to London. It is near the banqueting half, Whiteball. The Scotch kings retained Whitehall. The Scotch kings retained postession of it from 050 till the rebel-Hon of William of Scotland, Milton, Bir Christonice Wren and other notables lived in Scotland Yard.

Why?

The following advertisement appeared in a prominent London newspaper:

Whiteh-Experienced business woman as manageress, foorwalker, supervisor; not recessarily experienced in hairdressing, but must be tactful, reliable and born about Sept. 2.

Harner's Weekly.

-Harper's Weekly.

Two Kinds of People There are two great promoters of so cial happliess — cheerful people and people who have some reticence. The latter are more secure benefits to society than the former. They are the non-conductors of all the heats and animolities around them.

A Reac Instruction.

Miss inguite - Area's you near ready to an industry held? Miss Plenary I haven't make up my wind to go you have make that up tool- Cleveland Leader

In proportion to population, mate drinking is more common in those parts of South America where the plant grown than tes drinking in the ten districts of Colons.

SAVED THE LANDS.

The longest speech on record is be-lieved to have been that made by Mr. le Cosmus in the legislature of British Columbia when a measure was pending the passage of which would have taken from a great many settlers their lands. De Cosmus was in a minority. The measure had been held back till the eve of the close of the season or ension. Unless action was taken before noon of a given day the act would fall. De Cosmus got the floor at 10 a, m, and began a speech against the bill. Its friends supposed be would be done by 1 o'clock. At 2 o'clock he was saying, "In the second place." At 3

he produced a fearful bundle of evi-dence and insisted on reading it. Then the truth dawned. He was going to speak till noon the next day and kill the bill. Then they made merry over it and tried to shout him down, but that gave him time and breathing space. They flually settled down to watch the combat between the strength of will and weakness of body. They gave no mercy, no time for dinner or we ting lips with water and no sitting down. Members went to dine and sleep in squads, but De Cosmus went on. Day dawned,

The speaker was alternately dozing and trying to look wide awake. At last noon came, and a single man was triumphant. Although his voice had sunk to a husky whisper, his eyes were bleared and bloodshot, his legs tottered Attorney at I under him, his baked lips were cracked and smeared with blood, De Cosmus had spoken for twenty-six hours and saved the lunds.

THE BANANA PLANT.

times two feet broad. It grows to a height of ten to fourteen feet or even more, according to the variety of plant and the will and climate. Each tree produces one bunch of fruit only, which is really the terminal bud of the plant, just like an ear of wheat or barley. It has no branches, and when the fruit is ready, which is twelve or fifteen months from the date of planting, the tree is cut down and done

with.

But while it is growing up and maturing its fruit it is at the same time sending up from its roots other young plants or suckers—perhaps eight or nine of them. Each of these will produce its own bunch in turn, some of them in a couple of months after the parent plant, and there will thus be a regular succession of fruit. Many of these suckers have to be dug up and planted eisewhere, or they would be too thick on the ground.

And there is this poculiarity about the banana: You can plant it at any season, and the fruit ripens all the year round. When once a banana field has been planted out, all that is necessary to be done in to keep it clear of weeds and keep thioning out the multiplying sockers.

A Curious Wooden Watch.

The most curious thockesper perhaps had has ever been made in this county was the work of one Victor Doriot, who lived at Reistol, Tenta, in the lest entury. This herological oddity was othing more or less than a wooden match. The case was made of brier set, and the ladde works—all except tree of the main wheels and the wrings, which were at metal —were ade from a piece of an old burwood le. The face, which was polished and it looked like a sinh of finest one, was made from the affordire.
