WHAT SCHOOL IS BEST!

The days will soon be at hand is a serious question and one which has often been discussed in the fam ily, for what parent does not want to give his child the best education that he possibly can? If he decides to send the child away he thinks he sees in his or her nature something that will be best developed by sending him away; or, he may think that influence in the local schools are such not conducive to good instruction or discipline. And to escape them he sends the child away at a time in the life of the boy or girl, when they, should be under the circuit supervis-

THE DRUG STORE.

Its Evolution From the Apothecaries of

During the seventeenth century the druggist came to America and closely followed English precedents, modify ing them, however, by the practice o the Indians, with whom he came in spring up in the new land, and in 1636 ne colony of Virginia passed a law which among other things regulated the prices and fees of the druggist At this time it was fashionable for the druggists to practice surgery in addition to pharmacy, and the Virginia colouv contained a large number of people who were proficient in both professions. In Massachusetts the business was largely in the hands of Indians, schoolmasters, old women and teachers. The Salem' witchcraft de usion retarded the spread of the drug gist for some time in the Bay State for the popular impression fastened on the apothecaries a suspicion that they sold the potions that were supposed t produce the spells. Among those who suffered persecution at this time mixers of medicine appear to have

been prominent. The drug shop had not yet become distinct institution. It was usually branch of the grocery or spice busi ness. In 1647 one Giles Forman o Boston, had, however, firmly estab lished himself as devoting special at tention to pharmacy. In 1648 the first distinctive drug store in America was opened in Boston by William Davies. -Lippincott's.

A Horse's Memory. My father had a fine driving horse that was intelligent and had learned n number of tricks. One night he was stolen, and no trace was found of his for nearly two years when, one day, father met a stranger driving the horse and of course claimed him. In the dispute which followed father remarked that if it was the horse stolen from him he would on being unharnessed go to the gate, lift the latch, open the gate, go around the barn, slide the bolt, open the door and go lute the third stall. The man agreed to give the horse up on those terms. They drove home and up the lane to the barn and unbarnessed the horse, when without a moment's hesitation, he per formed the feats father said he would

IN WRECKS AT SEA.

The Way Men Act When They Lose Their Heads and Nerve.
What has most struck me in my many experiences of shipwrecks has been the strangely diverse ways in which the passengers acquit themselves under intense excitement and panic, said a lifeboat man to the writer.

Women cry, faint and cling to each other, but are least trouble. Men often act very strangely. I remember one man throwing into the lifeboat a heavy trunk which he wanted to save, but which we promptly heaved overboard. Some men become quite paule stricken. I've seen strong men, probably brave enough in other cases, fighting flercely for the life buoys and thrust ing the women and children aside in frantic endeavors to leap into the boat Gret; yet, strangely enough, one man who thus disgraced himself has since obtained the Royal Humane society's medal for saving life at sea, thrice volinteering with a scratch crew in aid of

a distressed vessel. I've known others who became so rel of Flour or every zehicle we sell stupefied with fright as to resist all attempts at rescuing them, begging to be you, and even every bolt in them are left to die and having to be forcibly guaranteed to stand. We remain thrown into the lifeboat. Some per sons frequently become half demented, and I've known several cases where they have in a frenzy committed suicide by positively jumping headlong into the sen and drowning themselves

Some years ago another passenger, bearing the ship had struck, went and drowned himself in the bathroom, anticipating his fate, as it were.

I remember another case where passenger hanced himself in his cablu just as the lifeboat arrived .- London Tit-Bits.

A friend be fact that he must pay to get into who called on Burrowes at an early hone one morning found him shaving with his face held close to an empty wall. "What on earth are you assuming that attitude for?" he asked "To look in the glass," was the re-
