Kodol consists of all the digestive elements, in highly concentrated form. It digests all sorts of food, and completely. It does all that the healthlest stomach can do. Pepsin is part of it, but pepsin digests albumen only. Starch requires something else, fat some thing else. Kodol combines all that is needed.

Digesters which depend solely on pepsin do only what pepsin does. They are but half-way treatments. Other elements are just as essential, and they must be in liquid form. That is why Kodol is liquid. And, because it is
