There is a certain amount of nerve force created by the brain to supply the different organs of the body. Suppose the eyes are using up nearly all of this nerve force to correct some error that shall be corrected by spectacles, are you not liable to have nearly every kind of human ailments? Big Bundle of Money Lost. Los Angeles, June 11.—Reluctant admissions made by postal officers of three cities today confirm to some extent the belief that the disappearance of a registered mail pouch within the jurisdiction of the Kansas City Post-Office last Saturday night will prove to be one of the largest losses in the history of the Post-Office Department.

From private sources it was learned today that a package of about \$50,000 in currency was among the contents of the pouch which carried, in addition, an unusually large number of letters and packages containing money and other valuables. The amount may reach \$100,000.

The postal inspectors, after forty-eight hours work, refuse any explanation on the manner in which it became lost. That a pouch of value has disappeared was admitted today by the department at Washington by Postmaster M. H. Flint, of Los Angeles, and by Inspector W. J. Vickery, at Kansas City.

Cashier Charles Seyler, of the Farmers' and Merchants' National Bank, tonight, said: "According to our information, a mail pouch made up here on June 3rd, and leaving for New York on the following morning has disappeared. A conservative valuation of the currency contents, furnished by this and other banks of this city, will be \$50,000. The total amount is made up of between thirty and fifty packages. Our correspondent at New York in the Chemical National Bank, to whom our portion of the shipment was consigned."

The registered pouch left Los Angeles for New York over the Atchison, Topeka and Santa Fe Railroad the morning of June 4th, and was due in Kansas City on Saturday.
