TACOMA'S FORCES TAKE COMMAND

State Department Awaits Details of "Capture" Before Deciding Future Action.

Coiba, Honduras, Jan. 22.—via wireless to New Orleans—Great excitement was caused here yesterday when it became known that the United States cruiser Tacoma had "arrested" the revolutionary gunboat Hornet at Truxillo.

The Hornet is being "detained" on instructions from Washington, because of alleged violation of the neutrality laws.

It is not known what effect the seizure of the Hornet will have on General Manuel Bonilla's operations. Reports have reached here that for more than a week he has been mobilizing troops at Nueva Armenia, 25 miles east of here, preparatory to attacking this place. Coiba appears to have more generals, captains and other minor military officers than ordinary soldiers and the government has experienced trouble in securing loyal privates. Very durable trenches have been built on the outskirts of Coiba and the government officials say they can defend the town.

Creates no New Jobs for Statesmen.

Washington, Jan. 22.—The hopes of pork barrel politicians that the establishment of postal savings banks would result in the creation of several fat government jobs, among them that of auditor for the board of trustees, were sent glimmering Saturday by a decision of the comptroller of the treasury. The comptroller ruled that the trustees were responsible solely to Congress for their financial transactions, and that consequently there were no duties to necessitate an auditor.

The ban was also placed on the appointment of a special disbursing clerk to take charge of the \$100,000 appropriated to start the banks. All outgoing payments, the comptroller declared, can be properly looked after by the regular disbursing clerk of the postoffice department. Numerous other duties are to be divided among the auditors of the post office, state and treasury department. None of the additional work means any additional pay for the men doing it.

TAFT MAKES PLEA TO FORTIFY CANAL

Speech to Pennsylvania Society in New York Devoted to This Subject.

New York, Jan. 22.—President Taft Saturday night began in earnest his campaign for the fortification of the Panama Canal. His entire speech at the annual banquet of the Pennsylvania Society in New York was devoted to this subject. He has high hopes that Congress at this session will declare in his favor and appropriate \$5,000,000 to begin the work.

In the Senate, the President has been told, the sentiment in favor of fortification is almost two to one. The House seems pretty evenly divided, but not along partisan lines. Most of the members appear to have an open mind, however, and are willing to be convinced by the side that makes the better presentation of its case.

President Taft will bring all of his influence to bear in favor of fortification. In his speech tonight he said that there were absolutely no treaty obligations in the way of fortifying the canal; that the United States had every right and reason to protect what was purely an American waterway.

The President said he yielded to no man in his love of peace and hatred of war. At the same time, Mr. Taft cautioned his hearers that universal peace was still a long way off and he could not conceive of any patriotic American being willing to allow an attacking force free and equal use of a waterway which was built by Americans largely as an instrument for the defense of their country.

Creator Will Play Matinee Concert Here.

To the Citizens of New Bern: In view of the fact that the entire first floor and many balcony seats have been sold for Creator's Concert here next Wednesday night, thus making it impossible for many people who are anxious to hear this wonderful band attend the night concert, I have to-night had a long distance, talk with the manager of the band, and he has agreed to play an afternoon concert here next Wednesday at 3 p. m.

The entire theatre will be reserved for white people. The admission to the balcony will be 25 cents and admission to the first floor will be 50 cents. There will be no reserved seats.

This gives women and children and those out of town an opportunity of hearing the world famous Creator, who could not possibly go at night.

POLICE CAPTURE ANOTHER "TIGER"

Arthur Collins, Colored, Charged With Operating the Place.

While on his beat on West street Saturday night Policeman Gus Ispock heard a disturbance a few blocks up the street. Upon investigating the cause of the disorderly conduct the officer found that a crowd of young negroes had purchased a half-pint of whiskey from Charley Collins, and that they were having a disagreement over the division of the liquor.

After ascertaining from them who they had purchased the whiskey from the officer placed Collins under arrest and carried him to jail.

Yesterday afternoon he was given a preliminary hearing before Mayor McCarty but owing to the fact that several of the State's witnesses were absent the case was continued until this afternoon.

Yesterday morning Collins' home was searched and a number of bottles of intoxicating liquor was found on the premises. This will be very damaging to the defendant's case when it is tried in Superior Court.

A number of the colored denizens of the western part of the city engaged in a free for all fight Sunday morning and as a result two of them were badly carved up. In the future all offenders from that locality who are brought before the Mayor will be heavily fined for their offences.

Origin of Firewater.

When the Hudson Bay Trading company began its trading among the Indians it was found that by selling the Indians liquor they could more easily be induced to trade their peltries. The first whisky or intoxicant of inferior quality was distilled in England and brought to America in large barrels, but in transporting it overland it was found more convenient to divide it into small kegs. The traders soon becoming aware of the fact that by diluting the whisky with water more furs could be obtained. This was practiced for some time, but the Indians learned that good whisky poured on a fire would cause it to flame up, whereas had the whisky been diluted the fire would be quenched. It was by this simple experiment that the term "fire-water" became a common word among the Indians. A chief who had experienced the bad effects of whisky among his people saw it was most certainly distilled from the hearts of wildcats and the tongues of women from the effects it produced.—Red Man.
