TWENTY NINTH YEAR

FINANCIAL ANCHOR

N ANCHOR in financial matters is as important as an anchor for a craft at sea. Some people just drift through life. They do not have an anchor to hold them in a safe harbor. This is always an unsatisfactory way of living. One of the anchors of life is an active savings account with a strong, safe financial institution. Open an account with this bank and provide for yourself an anchor to windward.

The Washington government unex pectedly found itself confronted by the necessity of throwing an army along the border line of Mexico to stop the at a moment's notice in the event of precipitate general fighting or rioting. It was represented at the State Department that the United States must act and act quickly if the Monroe dec rine was to maintained. Foreign interests in Mexico naturally took to the United States for protection under that Republic however, are not to be compared with the American capital invested there so after all, the move to bring about more tranquil conditions in Mexico has to do principal with Americans and American interests.

Just what part the Diaz government has played in recent events has not yet been disclosed. From time to time protests have been made to Washington out such a force as has been rushed to- Grove cemetery. ward Texas and the Mexican frontier. It is considered probable that the Mexican government may have indicated to European powers its inability to put an er'd to the disorders so long as succor was given to the revolutionists forces n the United States.

The Mexican government whether it asked help of this government or not has been given the greatest assistance t could possibly have desired. The official note from Warhington made public in Mexico City last night assuring General Disz that there was nothing is the movement of troops that should cause unessiness on the part of the Mexican government was more than justified by the admissions made today. There is no telling at this time how long the big army sent to the Mexican frontier will have to remain there. It will not be withdrawn until the revolution has been crush dout, and until conditions in Mexico are much more staple than they now are believed to be.
