LOS ANGELESE DYNAMITING CASE

Anarchists Charged With Drowning Man Indicted to Prevent Talking Jury Troubles.

Los Angeles, Cal., Oct. 16—Circumstances under which it is believed by the prosecution that David Caplan has been murdered to prevent his "squealing" on the other men indicted with him for the Times dynamiting. The Burns detectives and the Los Angeles District Attorney are satisfied that Mr. Caplan was drowned in Puget Sound by members of the anarchists' colony at Lake Bay, near Tacoma, where he took refuge last winter.

Caplan was the San Francisco man described by Wm. J. Burns as "a poor nut," nothing but a blind tool for Brice in the purchase of the dynamite for the Times explosion. Caplan and "Cockeyed Schmidt," both under indictment are still fugitives, were the accomplices of James Brice in procuring the eighty per cent. gelatine in the dynamite works at Giant, near San Francisco.

Schmidt disappeared from San Francisco the day after the Times disaster. Caplan fled six days later. Gradually he worked his way up the coast, as Burns' detectives later established, and arrived at the anarchists colony destitute. There a launch was provisioned, according to the prosecution, and Caplan set out in company with Anarchists sympathizers for British Columbia. The detectives say he has never been seen since the day he set foot in the boat.

The motive for sinking him in Puget Sound, the detectives say, was furnished by Caplan's insistence on communiting with his wife in San Francisco and his avowed determination to see her.

Mrs. Caplan recently disappeared from San Francisco, according to the detectives.

Three sessions of court have brought the trial of J. B. McNamara to a fork of the road of momentous importance to both prosecution and defense. The course will not be known till later, when Judge Bordwell, after two days' weighing of the argument will pass upon Clarence S. Darrow's plea for a common law jury. If the court sustains Darrow and disqualifies Z. L. Nelson, the first salesman for implied bias, the defense is likely to succeed in throwing out, one by one, the entire list of 80 veniremen made up by the Supreme Court judges last January. If the defense carries its point, there appears to be in fact serious question whether such a jury as it demands can be found at all in Los Angeles county.

Many lawyers about the court question the likelihood of getting a jury at all. Should Nelson be disqualified it was pointed out that it would be well nigh impossible to get a dozen men from the one hundred on the list of the court who already had not formed some opinion on the case.

Should it develop after a time, it is said that the panel was rapidly being exhausted, it would not be surprising if the defense asked for a change of venue on the ground that nobody could be found in Los Angeles who has not acquired fixed prejudice on the case because of its notoriety in this section.

ATHLETICS TAKE SECOND GAME

Lucky Bunching Of Hits. Weather Favorable Attendance Thirty Thousand.

Phila., Oct. 16—Sunday's rain and threatening weather were forgotten today under clear skies that soon put Shibe Park ball field in good condition. There were 30,000 enthusiasts present to cheer, with a New York delegation to urge on the Giants.

To the surprise of the forecasters, Connie Mack sent the veteran Plank to pitch, and his judgment proved correct, the lucky bunching of two long hits in the seventh, after getting a run in the first on errors, gave the home club the victory.

The Athletics took a run in the opening inning, the Giants evening up the score in the second. The struggle continued without either gaining until the seventh when after Collins had doubled, Baker's home run drive gave the Athletics a total of three runs that could not be over come. Crandall pitched the eighth inning being sent in to bat for Marquard who was hit safely but four times. Following is the score by innings.

CHINESES REBELS ARE CUT OFF

Peking Government Refuses To Transmit Messages and Stops Train Service.

Peking, Oct. 16—The Chinese Government has placed severe restrictions on the telegraph lines, evidently to prevent communication between the rebels. The telegraph administration refuses to transmit messages either to or from the provinces of Hu Peh, Hunan, Kiang Si, Sze Chuan, Kwei Chow and Yunan. On this account Hankow, where the revolution is at its height, is cut off.

It is not considered possible that the wires have been cut through out these six provinces. Until lately the revolutionaries, having free use of the wires, received and disseminated information concerning the progress of their plans in all quarters. The Government refuses to reveal the number or the destination of the troops who are being sent southward.

Beginning today only a single first-class train will be run daily between Peking and Tien-Tsing Fu, about 70 miles to the southeast of the capital. This is due to the heavy troop traffic and intended to prevent any great number of rebels from coming into Peking. Passenger and freight traffic has been entirely suspended between Peking and Handow.

So far the Government has refused to permit correspondents to accompany the army. Both sides are anxious to favor foreigners, and it is believed that the Government will reconsider this refusal, should the imperialists meet with initial success.

The last dispatch received from Hankow said that the revolutionaries had organized a Red Cross society and had invited the co-operation of the American Episcopal Mission. This invitation was accepted provisionally.

WAR AGAINST PREDATORY BEASTS

Government's Forest Rangers Skill. Fraud In Bounty For Killing Wild Animals.

Washington, Oct. 16—One of the duties of Uncle Sam's forest rangers is to kill "varmints" that destroy cattle, sheep and other domestic animals. In the Western States, where bears, mountain lions, wolves, coyotes, wildcats and lynxes are plentiful, the annual damage from wild beasts runs into millions. Last year forest rangers killed 7,971 destructive animals. The reports, just out, show that 213 bears, 88 mountain lions, 172 wolves, 69 wolf pups, 6,487 coyotes, 879 wildcats and 72 lynxes fell before the rangers' guns.

In addition to their efforts after animals that are harmful to live stock and to game animals and birds, forest officers have made headway against the prairie dog, which eats one thirty-second as much as a sheep. The Biological Survey estimates that one grown wolf will destroy about \$1,000 worth of stock a year, and that the average family will get at least \$3,000 worth. The stock killed by wolves is principally cattle. Calves and yearlings are generally selected by them for slaughter, but if these cannot be readily had cows and even full grown steers are killed.

It is said by stockmen that wolves in Wyoming kill from 10 to 20 per cent. of the annual increase of the herds. In some sections of Montana they are just as bad.

The Government employees claim that hunters who kill wild animals for the bounty do not exterminate for the reason that they do not want to "kill the goose that lays the golden egg." They destroyed male wolves and coyotes, but protect the females.

The professional hunter or trapper is tricky. Two brothers made a small fortune operating in different States. One lived in Arizona, where wolves are abundant, and the other in Wisconsin, where sheep are plentiful and bounties high. The man in Wisconsin snipped scalps to the one in Wisconsin, who in turn, collected a bounty for each one from the county.

Vernon Bailey of the Bureau of Biology in discussing the bounty system said: "It has everywhere proven a incentive to fraud, and thousands of dollars are wasted annually in paying bounties on coyote scalps offered in place of wolves, and on scalps of dogs, foxes, coons, badgers and even cats, which are palmed off for wolves and coyotes. In order to reduce this deception to a minimum the Government has issued a "key" to animals on which wolf and coyote bounties are often paid."
