## SUFFRAGETTES ON RAMPAGE

English Would Be Voters Mob Premier's Residence And Cut Up Generally.

London, March 2.—The suffragettes are making general violent demonstrations in various parts of London. One woman fired a revolver shot through the window of the Colonial office. The bullet smashed through the window but hurt no one.

Three other women stoned the windows of the official residence of Premier Asquith, breaking three of them.

Several shop windows in Piccadilly were smashed by women and a score or more windows were shattered in stores in the Strand. In the Haymarket, Oxford Circus and Bond street numbers of other windows were smashed with stones and pieces of iron.

There were over a hundred arrests, among them being Mrs. Pankhurst.

Mrs. Emmeline Pankhurst, the veteran of many suffragette battles, struck the first blow. In an automobile, accompanied by Mrs. Marshall and Mrs. Tukes, she drove up to the Premier's residence in Downing street at 6 o'clock. The three women leaped from the machine and drew out stones concealed in their muff. Four windows crashed in before the police, who are constantly on guard, could reach the women. The trio were arrested, but while being led to the station, managed to heave missiles through the windows of the Colonial office.

Window smashing by the suffrage tea is also going on along Oxford street and Whitehall. A massive window of the Canadian Pacific Railroad office at Charington Cross was shattered.

The women wreckers are scattered over a wide area. The special police reserves at Scotland Yard have been called out to deal with them.

Hundreds of extra policeman are on duty protecting the damaged buildings, while thousands of sightseers tramp the streets to view the havoc wrought by the women.

The suffragette leaders declare that it is their purpose to continue their campaign of window breaking until, like the coal miners, they force the government to take up their claims for suffrage, in order to protect business interests.

## COTTON REVIEW PAST WEEK

English Labor Troubles and Bad Weather Governing Factors.

New York, March 2.—Cotton has been irregular under the domination of rumors and counter rumors about the English strike. Early in the week there was a sharp upward turn, owing to reports that the English coal strike had been averted through the efforts of Prime Minister Asquith, and also because of reports of bad weather at the South, where it has been either cold or raining much of the time. The market had become sold out and to a certain extent oversold.

This caused a sudden flurry, which favored a quick advance, but it soon died out. The coal dispute was found to be unsettled. The receipts of cotton continue large. Present prices many take for granted will issue a large acreage, and with average weather, another large crop. Foreign spinners have been re-selling their purchases of cotton made for two years ahead. The Lawrence, Mass., labor situation still seems more or less ugly. The strike dies hard. Some weavers at New Bedford have struck. On the other hand there has been, as a rule, no great pressure to sell. Prices have held up well. The March notices were expected to be for 50,000 to 75,000 bales. They proved to be for only 25,000 bales and were promptly at p.p.d. Spot interests have brought. So have many of the Waldorf-Astoria operators and not a few of the Wall Street houses. The exports have been large. The spinners' takings have been suggestively liberal. The season for crop preparations at the South is believed to be two or three weeks late. While the demand for spot cotton may be less active, spot markets at the South are reported firm. The March price here is still far below a parity, while the South and the New York stock is slowly decreasing.

What is here consensus very largely of clean and not undersirable cotton, even through much of it is of low grade. The American visible supply is the largest on record, but the exports are also of extraordinary proportions and the supplies held by New England and British mills are not believed to be large. Some reports insist that the scales of fertilizers will be smaller this spring. Mean time trade and speculation halt for a settlement of the English coal trouble. Though a million coal workers struck Thursday, prices of cotton showed no little steadiness and today they advanced in anticipation of an early ending of the strike, and a which was also reflected in an unexpectedly strong Liverpool market. The immediate future of prices hinges on the coal strike, though English mills are said to be pretty well supplied with coal.
