

SAVINGS AND SPECULATION

COUNTLESS gauzy investment schemes are constantly being devised to relieve people of their money. Vast millions are taken in this way every year. Many of these investments fail and afford no positive assurance of the safety of the principal, to say nothing of earnings. The small investor rarely has an opportunity to protect himself. The wisest and safest way to handle savings or other idle funds is to deposit the money in an interest bearing account.

FOUR PER CENT PAID ON SAVINGS AND TIME DEPOSITS.

NEW BERN BANKING AND TRUST COMPANY

SIXTY FIREMEN TO FAYETTEVILLE

New Bern's Delegation to State Tournament Leaves This Morning.

The local hose teams which will enter the races at the State Firemen's Tournament to be held this week at Fayetteville will leave this morning for that place. Five cars will be used in transporting the members of the several companies, the horses and wagons and their baggage. Sixty firemen will constitute New Bern's delegation and a number of local citizens will leave here Tuesday morning to attend the meet.

The hose wagon races will be held on Wednesday and Thursday. The local teams are in excellent trim and feel confident of retaining home with one or more of the prizes. Thursday night the tournament will close and the teams will return home at once, reaching here Friday morning.

The Morehead City company will pass through this city today enroute to Fayetteville where they will enter their wagon. This is the first time that this little town has participated in an event of this kind but they have a fast horse and by constant practice have got the team in excellent trim and they, too, feel confident of winning one of the prizes.

Following is a list of the men comprising the four teams from New Bern and also the delegates from each of the companies to the Firemen's Convention.

NEW BERN No. 1.
Captain—Robt. Whitley.
Horse—"Ben Hurst."
Driver—H. G. Draney.
Buttman—Don Sparrow.
Wrenchman—Tom Davis.
Coupling Breaker—Roy Tucker.
Nozzleman—George Harrington.
Slack Pullers—Robt. Whitley and Claud White.
Delegates—Roy Tucker, Don Sparrow.

ATLANTIC No. 1.

Captain—C. J. Woodell.
Business Manager—E. H. Williams.
Horse—"Fred."
Driver—Ben Williams.
Wrenchman—T. H. Smith.
Buttman—S. C. Coward.
Coupling Breaker—C. Harker.
Nozzleman—Luby Smith.

Wrenchman—John Clark.
Coupling Breaker—Joe Loviner.
Nozzleman—F. Williams.
Slack Pullers—D. Brinson, A. Willie, Wm. Hoover.
Delegates—John Crabtree and Ed Howell.

FIVE PROMISE TO JOIN PARTY

Secretary J. Leon Williams of the Chamber of Commerce states that five members of the Chamber of Commerce have promised to join the party who will represent New Bern at the North Carolina Press Association Convention to be held at Morehead City on July 23-25. Mr. Williams wants at least ten members of the organization to be in this party and requests all who can go to let him know tomorrow. The party will accompany the editors to Cape Lookout and through the Inland Waterway Canal to New Bern.

Last Call.
If there are any young men in the city who would like to join the First Company Artillery and go to the encampment at Fort Caswell on August 5th, Captain Hunter Smith would be glad to have them communicate with him tomorrow. No members will be taken on after this week.

Devils for Sparring Quiet.

To give quiet to dwellers in noisy streets an English builder has simply used windows with double glazing. In sick rooms, lecture rooms and others the sound of street cars and the rattle of wagons were greatly diminished and the sound of voices was made imperceptible.

At the Athens, no matter what the weather, amusement and comfort.

FOUR GET HEAVY ELECTRIC SHOCK

Insulation of Wire Is Accidentally Cut—Serious Result Averted.

Mr. Walter Tripp, an employee of the New Bern Iron Works, was severely shocked when he rolled a movable crane over a live wire at the company's plant yesterday afternoon and three other employees, Messrs. Gannon Fulford, John Harrington and George Ellis are also suffering from the effects of coming in contact with the heavily charged iron crane.

Mr. Tripp had been told to bring the crane from the foundry into the machine shop. It runs along an overhead iron track and in some way the extension cord leading down from the main electric wires had become crossed over the track and when the crane was moved this cut the insulation on the wire and the crane was at once charged with several hundred volts of electricity. Mr. Tripp, who had hold of the crane, was badly shocked and finding himself unable to turn loose, called for help. Messrs. Fulford, Harrington and Ellis rushed to his rescue and after catching hold of him they too received the current. One of the other men employed in the shops had the presence of mind to cut off the current and release his comrades. But for this their injuries might have been more serious. Mr. Tripp was forced to suspend work for the day but the others resumed their work after a short time.

Report of Mr. Fields' Death Was Incorrect.

The account of the death of Mr. John Fields at his home at Fields, N. C., and which appeared in yesterday's issue of the Journal, proved to be incorrect. The reporter secured the information from a source which he thought authentic but it turns out that the information was incorrect. Mr. Fields has been sick but is now well enough to be out.

REPORT ON NEW ROAD IN AUGUST

Commissioners Have Walker Highway Project Under Advisement.

Several weeks ago the Chamber of Commerce took up the matter of opening up the Walker road leading from New Bern to Aurora. At a special meeting of that organization Mr. N. A. Purifoy, who lives in the section which would be opened up by the opening of the new road, explained the advantages to be derived by the local merchants and manufacturers if this road was opened and also how much it would help the people living in that section. Mr. J. S. Basnight, chairman of a committee appointed to look into the feasibility of opening the road made a report for his committee favorable to the project.

The matter appealed favorably to the members of the Chamber of Commerce and they decided that if possible the road should be opened. After discussion it was decided that as in such case as the road would benefit the county as a whole, the county commissioners should be asked to use the convict force in getting the road in shape.

The Commissioners considered the matter at their last meeting and took it under advisement. It is expected that they will reach a decision at their next meeting which will be on the first Monday in August.

The opening of this road has long been agitated. People living in that section now go to some other place to do their trading and also carry their farm products to other places. If this road is opened all of this trade or certainly a good part of it will come to New Bern. The people want the road opened and it is to be hoped that the Commissioners will see the matter in a favorable light and so report.

Rain Injures Crops.

Mr. J. C. Wetherington, of Jasper, was among the visitors in the city yesterday. In speaking of crop conditions in his section, Mr. Wetherington stated that owing to heavy rains which have fallen there during the past few weeks the crops had been cut down at least one third.

Picnic at Ellsworth Church.

There will be a picnic at Ellsworth church near Vanceboro on Saturday, August 3rd, for the benefit of the church. All are invited to come and as far as convenient bring well filled baskets.

JOURNAL'S NEW MACHINE HERE

Will be in Operation Within Next Few Days. A Mechanical Wonder.

One of the most remarkable machines ever invented is the monotype type-casting and composing machine. If an engineer were asked to design a machine that would cast duplicate parts from hot metal at the rate of 140 a minute, within a limit of accuracy of two ten thousandths of an inch, automatically selecting from 225 characters of twelve sizes in one dimension, he would say, without hesitation, "It is impossible to fill this specification." Nevertheless the Monotype Company after years of experimenting has produced a machine that accomplishes the possible day in and day out.

The monotype casting machine is a complete automatic type-foundry producing type, borders, and spacing material of any size from .5 point to 36 point, at a speed that makes it cheaper to cast new type than to distribute. It will turn a pound of metal into type of the highest quality in less than two minutes.

Among the first monotypes built were four which were installed in the office of the New York Sun. Today the New York Sun operates forty-two monotypes and all the composition of the Morning, Evening and Sunday Sun is done on these machines. Nearly two hundred monotypes are used in the government printing office at Washington.

The monotype has the advantage over other machines in that it is as well suited to job work as to newspaper work.

One of these machines has been purchased by the E. J. Land Printing Co. and will be used in the printing of the Journal and in turning out the job work done by the purchasers. The machine is already in the Land Company's office and will be installed in the course of the next day or so, an erector having arrived here Friday night, sent here by the factory in Philadelphia.

The machine will be installed as stated in a day or so and in time to be inspected by the members of the North Carolina Press Association when they visit New Bern en route home from attending the annual press convention at Morehead City. The members of the press association will be shown the workings of the monotype in the office of the Land Printing Company by Mr. Hatch of the Monotype Company and Mr. J. T. Hill, the erector.

The readers of the Journal are invited to come in at any time as soon as the monotype is installed and see the machine being operated.

Not An Authority In Democracy.

The Durham Herald says: "We always scratch the ticket and we have never yet taken part in any kind of a Democratic primary." The Herald has also said plainly that it will not vote for Craig for governor "if there is any other white man in the race." And yet the Herald is working night and day trying to prove that Senator Simmons is not a true Democrat.—Greensboro News.

Preaching Thursday Night.

John Kohr, Bishop of the Reformed Mennonite church, will preach in the court house on Thursday night, July 25. Services at usual hour, eight o'clock. Public cordially invited. 5t.

COMPLETES TWO IMMENSE FILLS

The Norfolk-Southern's steam shovel crew has just finished two very large fills in the vicinity of Bunyan. At Open Dam Swamp they put in a fill 450 feet long and seven feet deep. At Hall Swamp they built one 700 feet long. They also raised the track seven feet, this making the fill sixteen feet deep in places. Steel spans with concrete abutments were also put in connection with the improvements to the road at this place. Mr. E. L. Nicholson was the chief engineer in charge of the work and Mr. Ellis Williams engineer of the steam shovel.

Courage and Hope.
The men whom I have seen succeed best in life have been cheerful and hopeful men, who went about their business with a smile on their faces, and took the changes of this mortal life like men, facing rough and smooth alike as it came.—Charles Kingsley.

Peculiar Chinese Industries.
In Tschoow there are some strange industries. One is the raising of the mack, a sort of large pheasant, the tail feathers of which are very valuable, as they are needed for the dress hats of mandarins. Timber is very plentiful in this district and is sent away by raft to all parts.
