PRECIOUS RELICS IN DANGER

Insure the Safety of Documents In the Vatican.

to retire from his important post, and Monaignore Rattl, director of the Ambrosian library, of Milan, has been se Consequently destructive Bird, Held lected by the pope to succeed him. The manuscripts contained in the vatican library number over forty thousand and surpass not only in num-ber but also in value and interest those of all other libraries in the world combined because they have been ac-cumulated since practically the begin-

over to his successor these manuscrip treasures, which must be identified one by one. The pope, on the suggestion of the of this detailed examination of manuscripts, which takes place whenever a new prefect is appointed, to referm the methods heretofore adopted for their preservation. The manuscripts are inclosed in low wooden cupboards called "armsdil," about five feet high, the doors of which are righty decorated. according to the plan in use for cen-turies in Rome, which was to combine

art galleries and libraries and thus give room to hang plotures on the walls over the books. walls over the books.

While every precaution is taken for the preservation of the manuscripts from moths and dampness this old are tent of keeping them has its great drawbacks in case of fire, as the cupboards are naturally not fireproof. Father Ehrle suggested to the pope that every cupboard when possible abould be converted into a strongbox or ania perfectly fireproof and that two are three large rooms abould be specifically built with walls covered with steal plates or other non-inflammablet material, to which the manuscripts that can rial, to which the manuscripts that ca not be kept in suppoards could be re-

His surgestion has been fully up-proved of the pope, who still recalls the fire in the vatican, which but for the intervention of the Italian fremen paght have had disastrous results, es to insure their safety and into
