## FROZE A SOAP BUBBLE.

Then Broke It in Pieces and Floated Them on Liquid Air.

A frozen soap bubble broken in two and floating like an iridescent, transparent eggshell on the surface of a vessel of liquid air was one of the marvels exhibited by Professor Dewar in a lecture before the Royal Institute of Great Britain.

The lecture was upon the subject of atmosphere and the curious effects of intense cold, the liquid air and soap bubble being adjuncts introduced to facilitate some explanations.

A few spoonfuls of liquid air were poured into a vessel, and the intense cold caused by evaporation immediately brought on a miniature snowstorm in the atmosphere directly above the vessel. A soap bubble was then placed in the freezing stratum. Almost instantly there was a change in the color of the transparent globe, the bubble becoming much darker; the movements of the rainbows film grew slower; it contracted somewhat in size, and a little later it froze.

A slight but dexterous movement of the rod upon which the bubble was suspended broke the latter into two pieces, which fell upon the liquid air and there floated for an hour, gradually accumulating a tiny snowdrift from the almost imperceptible precipitation constantly going on in the freezing atmosphere above.

## STEVENSON'S GRAVE.

Its Romantic Site, in Samoa, Atop the Forest Clad Vaila.

No English novelist rests in a more eccentric spot than that chosen by Robert Louis Stevenson, who is buried on the summit of the forest clad Vaila, in the island of Samoa, that genial spot in the south Pacific that the gifted writer loved so well.

The day after his death at Vallima, in 1894, his remains were carried to the top of this precipitous and picturesque peak by sixty sturdy Samoans, who had loved and now mourned their dead chief, Tusiuta.

A party of forty had previously cut a pathway through the thick, tangled wood with knives and axes, while another party had prepared the grave. With infinite care and trouble they bore him shoulder high over the rough ground to his last long home, and there, under the starry sky, they left him to sleep forever, with the Pacific at his feet.

On either side of his tombstone is a bronze plate. One bears the words "The Tomb of Tusiuta," while the other is inscribed with his own requiem, beginning:

Under the wide and starry sky  
Dig the grave and let me lie.

## The Parrot Fish.

There are water parrots as well as land parrots. The parrot fish come from the tropics, are brilliantly colored and have beaks something like those of the parrot, for use in breaking off the coral shell in order to get at the living polyp. Not all of them, however, live on animal food, some species being herbivorous. One species is found in the Mediterranean sea, where it has been known for thousands of years. The Greeks and Romans regarded it for a time as the first of fishes, and Pliny tells us how it was introduced into the Italian sea in the course of the reign of Claudius. It was known as the "scarus" by the ancients, who told some wonderful stories about its love, its wisdom and its rumination. Some having a length of sixteen inches have been captured alive.

## Doncaster Races.

Doncaster is one of the four places—the other three being Chester, Epsom and Lincoln—that claim to be the cradle of the British turf. In May, 1800, the minutes of the corporation record that "Hugh Wyrall hath caused a steeple, or post, to be set on Doncaster More at the west end of the horse-race," which was ordered to be "cutt down." A few years later "for the prevention of sutes, quarrells, murders and bloodsheds" it was agreed "that the race on Doncaster More be discontinued." Eventually the corporation, with the true Yorkshire combined love of "t brass" and sport, took the horse racing under its patriarchal care and turned the meeting into a source of profit.—London Standard.

## The French.

The French were first mentioned as the Franks, a tribe of warlike Germans in the northwestern part of the region now known as Prussia. They came into notice about 240 A. D. and with other German tribes invaded the Roman empire in the fifth century and settled in the country now known as France. The word Frank, or Frankman, means free man. After their conquest of Gaul they named the country Frankerick, or Frank's kingdom.
