

The Fly with its bill injects into our veins **MALARIA**.

The Mosquito with its bill injects into our veins **MALARIA**.

WE ARE all exposed to such dangers—our only armor is good red blood! Let your stomach be of good digestion, your liver active and your lungs full of good pure air and you don't surrender to any of the disease-bearing germs. The best tonic and alternative, that corrects a torpid liver, and helps digestion so that good blood is manufactured and the system nourished, is

Dr. Pierce's Golden Medical Discovery

This famous medicine has been sold by medicine dealers in its liquid form for over forty years, giving great satisfaction. If you prefer you can now obtain Dr. Pierce's Golden Medical Discovery tablets of your druggist at \$1.00, also in 50c size or by mail—send 50 one-cent stamps, R. V. Pierce, M. D., Buffalo, N. Y., for trial box.

Questions of Life are fully and properly answered in the People's Medical Adviser by R. V. Pierce, M. D. All the knowledge a young man or woman, wife or daughter should have, is contained in this big Home Doctor Book containing 1000 pages with engravings bound in cloth, sent free to anyone sending 21 one-cent stamps to prepay cost of wrapping and postage.

A MOVEMENT IN SCALPS.

One of them, though, for good reason, was firmly fixed.

One day when Professor Powell was hearing the class in anatomy he was describing the manner in which the various muscles of the scalp perform their several functions, says ex-Governor Theodore T. Geer, reminiscence of his school days in "Fifty Years in Oregon." To make the subject clearer the professor told the members of the class to move their scalps by aid of the muscles without moving the head and proceeded to lead the way by giving a personal demonstration.

He had a shaggy head of hair and could turn his scalp almost halfway round his head. The success that attended his maiden effort was so astonishingly complete that it brought forth a roar of laughter, in which the professor heartily joined, although his mouth was where his right eye usually was and his ears were under his chin.

When order was finally restored each member of the class tried it, with varying degrees of success. But Tom Niles' effort was a hopeless failure, although his superhuman attempts to move his scalp were as laughable as Professor Powell's grotesque success had been. Finally, after the poor fellow had made all the oblique grimaces the class could endure, the professor said:

"Thomas, what is the matter with your head?"

"I don't know, sir," replied Tom, "unless I am the only one in the room whose head is so full of brains that they crowd his scalp."

SLEEP OF THE ELEPHANT.

What Little There is Seems, as a Rule, to Be Taken Standing.

It is doubted whether, in the wild state, elephants ever lie down. Gordon Cumming thought he had found evi-

dence in marks upon the ground that the adult bulls did stretch themselves out at full length for a few hours' rest at about midnight, but he contended that the young and the cows always remained on their feet.

Another authority, Selous, has expressed doubt whether even the old bulls lie down. He tells of one herd that was known to have kept moving and feeding throughout the twenty-four hours. "Except when rolling in mud and water," he says, "it is likely that an African elephant never lies down during its whole life."

However this may be, the most com-

mon animal, though less and more likely by than any other, J. I. Kipping, the father of the writer, estimated the period of slumber taken standing up to average about four hours in the twenty-four, and this estimate has been employed by the son in an amusing passage for one of his stories, "Mott Gul," wherein the sleep of the elephant is represented as consisting of an hour's fidgeting on one side and a similar period's fidgeting on the other, followed throughout the rest of the night "by long, low, rumbling soliloquies."—Harper's Weekly.

Big Timber of Guiana.

The greenheart of British Guiana is one of the most remarkable and useful trees in the world. Of the three varieties—yellow, black and maintop—all are durable if cut at maturity and grow to such dimensions that logs can be had from eighteen to twenty-four inches square and seventy feet long. Greenheart is one of the eight woods esteemed as first class by the Lloyds, and admirable keelsons, plies and other ship timber, as well as submerged piling, dock gates, etc., are made from it. Owing to the great demand for the timbers and the reckless destruction of trees, the government has put a ban on cutting any which will not produce timbers eleven inches square.—Boston Globe.

Ballooning a Bonanza.

"Is it true that you farmers are hostile to ballooning?" ventured the young aeronaut who had descended in the barnyard.

MRS. LARAMORE TELLS TROUBLES

Lady in Goodwater Describes Her Distressing Experience and Tells How She Was Finally Relieved.

Goodwater, Mo.—"Ever since I was a little girl," says Mrs. Riley Laramore, "I was a great sufferer from dyspepsia. I suffered misery after eating, and had terrible heartburn.

I thought I had to suffer this way as long as I lived, but when I began to take Thedford's Black-Draught, in small doses, every night, the heartburn was all gone in a few days, and I could eat without distress.

I took two small packages in all, and although that was some time ago, the dyspepsia has not returned.

I speak a good word for Thedford's Black-Draught whenever I have the opportunity.

If eating causes distress, we urge you to try Thedford's Black-Draught. It cleanses the system, helps the stomach to digest its food, regulates the bowels, and stimulates the liver.

It acts gently and is without bad after-effects. Try it. Price 25c.

"Why, no, stranger," laughed the old farmer as he came forward with a pitchfork. "We are always glad to have a balloon land on our place."

"I'm certainly glad to hear it."

"Yes, the last one that landed here came in handy. I used the ropes to tie the steers packed corn in the basket and cut the gas bag up and made overalls for all the farm hands. Welcome, stranger, welcome!"—Chicago News.

Reassuring Him.

"I thought I told you not to eat any porterhouse steak without my permission."

"So you did, doc; so you did."

"Then why are you disobeying my order?"

"This won't delay the paying of your bill, doc; this steak is being paid for by my friend here."—Houston Post.

The Modern Cinderella.

One day the teacher during recess told the children the story of Cinderella. The next day, to test their memory she asked them:

"Why did Cinderella have to leave the ball promptly at 12?"

A bright little maid answered: "So she could catch the last car."—St. Louis Republic.

Gravitation.

Examiner—What do you know about the power of the earth's attraction? Candidate—It is the strongest at about 2 o'clock in the morning.—Pileggi's Blatter.

Observe the face of the wife to know the husband's character.—Spanish Proverb.

The Apostle of Greenland.

The conversion of the Eskimo in the remote and bleak dependency of Denmark, Greenland, was regarded as one of the most important of the world's history. It was the work of Hans Egede, who has become historic as the apostle of Greenland. In that year he published as a pamphlet "A Proposition for Greenland's Conversion and Enlightenment." This was welcomed with no great warmth by the clergy and was violently opposed by mercantile interests. In four years he had succeeded to such an extent that he founded a training college for missionaries in Copenhagen May 3, 1721. He sailed for Greenland with a small party of mission workers. He was greatly disappointed to find that the Norse colony, left for many years to its own resources, had wholly vanished. He turned, therefore, all his efforts to the conversion of the Eskimo and met with marked success, becoming bishop in 1740. In this office until his dying duties he was succeeded by his son, Paul.—New York Sun.

The Harmony of Colors.

The principle that the sensation of white results from the equal excitement of sensations produced by the three fundamental radiations is deduced naturally from an analysis of the rules of the harmony of colors. Colored lights do not focus at the same point. Therefore the eye must seize different distances at the same time in order to see when different colored surfaces touch. The difference of refrangibility of the different colored rays causes some colors to stand out and others to stand back. Red is the most "flying" or "tapering" of the colors, a red object always appearing to be further away than a blue object, though it is seen on the same plane and in the same light.—Harper's.

Manufacturing the Truth.

A gentleman was staying in an English country house, when hearing a great platter below one morning, he looked out and saw a couple of grooms holding one of the servant maids on a horse, which they led with difficulty once round the yard. He asked them what it all meant.

"Well, you see, sir," said they, "we're going to take the horse to market to be sold, and we want to be able to say that he has carried a lady."

Didn't Care for the Money.

You advertised for a young lady to be married in a cage of lions.

"That's right. Fifty plunks. Where's your young man?"

"Didn't you provide the man? What do you suppose was my object in so being into this affair?"—Pittsburgh Post.

Gas Tubing

All Kinds All Sizes Any Length

We have it for your GAS STOVE, DROP LIGHT, GAS IRON and for any other purpose.

We Carry the Well-Known **Vulcan Brand Gas Tubing**

VULCAN is without a doubt the very best gas tubing on the market to-day. It is made of new high-price material, very flexible. The rubber ends are specially constructed and will not crack.

A Word About Cheap Tubing

DON'T use it even though it may cost less. In the end it will cost you more. Cheap tubing is cheap because it is made of cheap stock. It leaks from the very start, perhaps only a little, but enough to annoy you with a smell of leaking gas. The ends split after short use. The tube becomes hard and cracks, then it must be thrown away, necessitating the purchase of another length.

ONE LENGTH OF VULCAN TUBING WILL OUTLAST THREE LENGTHS OF CHEAP TUBING

FOR SALE AT OUR OFFICE Mail or Telephone Orders Filled

New Bern Gas Company

Too Bright.

"Didn't you win anything in your suit for damages?"

"No."

"Why didn't you engage a bright lawyer to take your part?"

"I did, but he took my all."—Philadelphia Press.

The highest and most profitable lesson is the true knowledge and lowliest esteem of ourselves.—Thomas Kempis.

Also one farm situated on the south side of Neuse River containing 40 acres more or less 2 1/2 miles below New Bern. Mostly cleared land.

For sale one 6 inch suction pump. Will throw 500 gallons minute.

Thomas Daniels.

North Carolina.

Craven County.

NOTICE OF SALE.

By virtue of the power of sale contained in that certain mortgage deed made by William Adams to J. H. Carraway on the eighteenth day of October, 1907, recorded in the office of the Register of Deeds of Craven County in Book _____ Page _____ the undersigned mortgagee will sell for cash to the highest bidder, at the court house door, at New Bern, Craven County, North Carolina, at the hour of 12 o'clock M. on the eighth day of March, 1913, the following real estate, to-wit:

That certain lot or parcel of land in Craven County, North Carolina, in No. 3 Township, near Winthrop Mills in said county, being an acre of land by the side of and near the foot of Winthrop Mills road, and being the lot of land on which the said William Adams has recently constructed a framed house.

This 4th day of February, 1913.
J. H. CARRAWAY,
Mortgagee

Labor-Saving Cole Planters and Distributors THAT EVERY FARMER NEEDS

Every farmer in this section should own one of these Cole Planters and Distributors. They positively pay for themselves after a few days in the field. The planter plants better and cheaper than any other planter ever built. The distributor makes one trip do for two—doubles the good from guano. Cole Planters and Distributors are the "Farmer's Friend." They were "born and raised" on a North Carolina farm.

You'll find them so downright useful and reliable that you'll wonder how you ever got along without them—why you were ever content to put up with out-of-date machines, when you could own a Cole!

The Cole Planter

SAVES Labor of 1 Man and Mule Seed

Plants Cotton, Corn, Peas, Beans, Peanuts and other Seed

At one trip the Cole Planter smooths the bed, opens a furrow, mixes guano with the soil, covers it, opens again, plants the seed and covers them in the most accurate manner. The guano being mixed with the soil directly underneath, seeds the plants as soon as the seed sprout. You get a quick start, get two chances at a big crop.

The Cole Planter plants the seed in a straight line at the same depth. The depth is easily regulated. Cotton comes up in a straight line—without bunches. It can be chopped to a stand cheaper, fast of cultivation is less.

The seed fall in plain sight. The wind can't blow them away—none are wasted at the end of the rows. Doesn't skip or bunch the seed—as far ahead of the old style planters—as the old style way is ahead of hand planting. Works perfectly on any kind of land, where other planters are unsatisfactory.

The Cole Spreader and Cultivator

Lister and Side Dresser Sows Guano and Throws a Good List at one Trip

With this machine you can feed guano to growing crops—get more good out of it—spread guano at the right time to make fruit, right where a network of roots need it.

By feeding the guano during the growth instead of all at one time but little is washed away. The plant receives all the benefits of the plant food.

With cultivator attached (as shown in the cut) you can sow guano and effectively cultivate at the same time—save the work of one man and one mule.

Two strong universal plow feet are furnished free. By removing cultivator and attaching plow feet, you have the best machine for sowing guano and throwing two good furrows upon it.

The hopper holds 1 sack, and spreads uniformly any quantity from 100 lbs. to 2000 lbs. to the acre.

Pays for itself in labor saved—doubles the good from guano.

The Cole SINGLE FOOT Distributor

Opens a Furrow and Sows Guano at One Trip

Here's a Cole Distributor with opening plow in front, which many farmers prefer.

With one, you can run off rows, open a furrow, and sow guano at the same time. It'll save the work of one man and mule every planting day. Especially good for side-dressing—can be run right up alongside plant.

Strongly made thruout, large hopper, strong plow wheel with steel spokes. Convenient feed, cuts off bow of guano. Has the reliable Cole force feed, needless as a bicycle. Swivel rod holds distributor rigid while you fill the hopper.

The Cole DOUBLE FOOT Distributor

Sows Guano in Open Furrow, Throws 2 Good Furrows Upon It. Saves Labor

The form of spout used on this machine spreads the guano, instead of putting it in a small stream. The fertilizer feeds more plant roots—gets more good from guano.

Positive force feed sows from 100 to 1,600 lbs. of guano to the acre. Instantly regulated.

The plow feet throw two good furrows upon guano at the same time. Plow feet are strongly attached to side beams, so that good plowing can be done.

It can be left without danger of its falling. Graduated hitch post adjusts the weight on the plow.

Other Styles of Planters and Distributors to Meet Every Need

Besides these machines we have the Universal Single Foot (either force feed or Knochler), Universal Double Foot, Knochler, and other styles suited to different uses. Discard your old out-of-date trouble making planter or distributor, hitch up to one of these labor saving Cols! Come and see them now.

Guaranteed By Us and By The Cole Mfg. Co.

The Cole is doubly guaranteed. The maker guarantees it. We guarantee it. Every machine must prove a practical daily working success in your field, no matter if the soil is rough or smooth, level or hilly, with crooked rows or straight.

They are made as good as money and brains can make them—sold at a fair price to everybody. Come and see these machines, they're ready for planting time.

For Sale by **BURRUS and COMPANY, New Bern, N. C.**
