

SOCIETY

Mrs. Ethel Hancock left yesterday for a visit with relatives at Tarboro.

Mrs. H. S. Owens arrived in the city last evening from Norfolk, Va.

Miss Georgie Herndon of Kinston is in the city visiting Miss Rosa Tolson.

Mrs. Frank Brinson of Bayboro who has been in the city visiting relatives returned home yesterday.

Mrs. T. P. Williams returned yesterday from a visit with relatives at Snow Hill.

Mrs. J. A. Long of Graham arrived in the city last evening. She was enroute to Stonewall for a visit with her father Dr. George Attmore.

girls and military boys will meet. 10 o'clock, old men, Impa and old women.

2:30 o'clock, Goblin Girls.

3:00 o'clock Indians.

3:30 Sailors.

4:00 College girls and boys.

5:00 Japanese maidens.

6:00 Banjo serenading girls.

SHORT PASSING EVENTS

The city's street cleaning force is engaged in cleaning the residential districts of the city and getting things in trim for the visit of the ladies who will be here to attend the North Carolina Federation of Women's Clubs which will be held here next week. The City Beautiful Club is also assisting in this work.

Although the oyster season in this section has closed, a few of the bivalves are still seen on the local market. There are many persons who want to have a plate of oysters just a little more time before they disappear from the market and to those are the ones now being disposed of.

FELT BAD ALL THE TIME

Shellhorn Lady Suffered a Great Deal, But Is All Right Now.

Shellhorn, Ala.—In a letter from this place, Mrs. Carrie May says: "A short time ago, I commenced to have weak spells and headaches. I felt bad all the time, and soon grew so bad I couldn't stay up. I thought I would die. At last my husband got me a bottle of Cardul, and it helped me; so he got some more. After I had taken the second bottle, I was entirely well. I wish every lady, suffering from womanly trouble, would try Cardul. It is the best medicine I know of. It did me more good than anything I ever used."

Cardul is a woman's tonic—a strengthening medicine for women, made from ingredients that act specifically on the womanly organs, and thus help to build up the womanly constitution to glowing good health.

As a remedy for woman's ills, it has a successful record of over 50 years. Your druggist sells it. Please try it.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.

GREAT HEADWAY ON SLUMBERLAND

DANCES BECOMING MORE BEAUTIFUL—PRINCIPALS LEARNING THEIR LINES.

Great headway is being made in the preparation of "Slumberland" for presentation here on May 15th and 16th. The dances are becoming more beautiful, the principals are learning their lines and "business" and the singing choruses are attracting considerable attention by passers by who declare they can hear the singing for blocks away.

The press of other cities where Slumberland has been given are loud in their praises of its merits. The Wilmington, N. C. Morning Star in a write up of Slumberland states—

"Without a parallel in the history of theatricals in Wilmington was the crush yesterday morning when the reserved seat sale for Slumberland Extravaganza was opened. Three policemen had to keep the eager patron in line, the crowd continually surged toward the entrance until the crush became so great a plate glass window in the building was smashed to flinders. The rush for tickets exceeded anything ever seen here before, the house was sold out within a few minutes after the store was opened. Even when Madame Nordica, Ben Hur and the Clansman appeared here, there was no rush for seats as that witnesses by hundreds of people yesterday morning."

SLUMBERLAND REHEARSALS FOR TODAY.

On account of conflicting events yesterday rehearsals today will be as follows: 9 o'clock this morning, the school

REPLIES TO DR. FOLEY.

Dr. Duffy Also Submits His Views On Public Health Matters.

Editor Journal: I noticed in your columns this morning an article which appeared as an advertisement from my friend, Dr. Foley, the city Milk and Meat Inspector. As the Doctor has considerably overstepped the mark in some of his statements and as he has given me a good opportunity to state some of my views on public health matters, I take the liberty to submit the following in reply.

In the first place my good friend Dr. Foley is supposed to be a member of the Committee on Health and Sanitation of the Chamber of Commerce. He was not present at the meeting a few nights ago although two notices of the meeting had been mailed to him. If he had been present there would have been no cause for him to have taken umbrage at what transpired. The newspaper report of the meeting was necessarily brief.

I am very sorry to find from Dr. Foley that I am so densely ignorant in regard to public health matters. But I am charmed to find that Dr. Foley is so well informed about these same matters. Again it would be rather interesting to me and perhaps to others to know whose mouthpiece I am, as I was under the impression that I was my own. As a matter of fact I went to this meeting absolutely unbiased by any except opinions of my own and any ideas which I expressed there I am alone responsible for. The meeting was intended as one mainly for orientation to find out where we "are at" in health matters in other words. We missed Dr. Foley very much indeed as we were very anxious to have his views on the subjects with which he is so familiar. If there was any criticism expressed at this meeting of the character of the milk and meat inspection, I did not hear it.

Of course Dr. Foley is aware that the matter of public health covers a few other fields outside of that of milk and meat inspection. Most of the discussion at the meeting revolved around the question of having a county superintendent of health who was paid a sufficient salary to warrant his devoting his entire time to the public health work of the city and county. It was stated that it was absolutely impossible for one to practice medicine and at the same time have general supervision of the county health work. It's too big a job for any man to fill. If, however, the county would employ a man to devote his entire time to the work the campaign could be carried on with system and despatch and many evils which exist today could no doubt be corrected.

Dr. Foley criticizes me because the report in the Journal was not more specific. Again I say the Doctor should have been at the meeting. For his benefit and for general information I will now be specific. I asked one of the local druggists, who was present at the committee meeting, what was being done at the soda fountains to disinfect glasses, dishes and spoons. He told me nothing. Does it not appear to the most casual observer that here is a condition that should be corrected? How easy for tuberculosis, diphtheria, streptococic tonsillitis, syphilis and other diseases to be spread in this manner! Likewise the same is true of the various drinking and eating utensils in our restaurants and hotels. These should be sterilized in some manner after each individual use.

Another matter of importance is the disinfection of utensils and towels in our barber shops. Is there any one among us who would care to contract a case of barbers' itch, to acquire scabies, pediculosis, ring worm or syphilis through the medium of his barber? Yet these are possibilities. I dare say that our barbers are as good as any and are as careful as any, but nevertheless without strict regulations in regard to disinfection, one always runs a risk.

I am informed that our sewerage system here is inadequate but, as Dr. Foley says, I am very ignorant on this subject and therefore not in a position to give an expert opinion about it. Nevertheless a matter of so vital importance certainly warrants investigation. Medical inspection of our school children is a matter of vital importance. The future of the race depends upon the vitality of our children. By examination of all children on admission it would be possible to find and have eradicated such conditions as adenoids, hook worm infection, tuberculosis, disease of the ear, eye, etc., thereby restoring the children so affected to health and conserving the future vitality of the race.

The location of cases of pulmonary tuberculosis should be known by the health officers and measures taken to prevent the spread of this disease to members of the patients' family and others. There are many people who consider this disease as strictly hereditary and not susceptible of transmission by infection. The need of constant care on the part of the health officers by frequent instruction and observations of cases is an evident one.

Continued to page 3.

SCHOOLS?

The following have visited the schools and give their opinion as to the needs: A few weeks ago a Committee from the Woman's Club was appointed to visit the schools and report as to the needs etc. The committee consisted of Mrs. Harry Marks, Chairman; Mrs. Chas. R. Thomas, Mrs. J. P. C. Davis, Mrs. Clyde Eby, and Mrs. D. E. Henderson. The committee was accompanied by Mrs. S. L. Dill, Jr., and after spending half a day in the schools made the following report which was unanimously adopted by the Woman's Club:

"The facilities are inadequate for present needs, and

"Whereas, adequate school facilities are a necessity, which must exist to enable the city to support its increasing population,

"Be it resolved that the Woman's Club of New Bern desires to place itself on record as being in favor of the Bond Issue, which is to be voted on, May 6th, 1913."

T. D. Warren, chairman of the County Board of Education and trustee of the City School, says:

"The approaching election on the question of issuing bonds to provide for better school facilities for the city of New Bern marks an important crisis in the educational life and development of this city. Bonds have been issued by the city to provide for the material advancement of her citizens in the way of providing for substantial side walks and streets and for other purposes and no progressive citizen regrets this for ward movement. How much more important must the duty be to provide for the growing and imperative needs for better educational facilities for the boys and girls of this community.

"The work of the schools in New Bern is badly crippled and handicapped by the lack of sufficient school facilities, especially the lack of school buildings; for no teacher can do justice to himself and the pupils under him in an overcrowded room.

"At present there are only twenty rooms available for teaching purposes. In about half of these you will find over forty pupils and in one room there are over 70 pupils. For lack of room some of the classes have to wait until after dinner.

"What progress can a teacher make with 77 pupils in one room? The result is the child is necessarily neglected. Can the people of New Bern afford to say to the children we are not able to provide comfortable seats and sufficient room for them while in attendance upon school and thereby deprive them of educational facilities to which they are entitled? For myself I am willing to pay this additional tax for the benefit of the children.

"The city schools are growing rapidly and under the present management too much credit can not be given for the splendid work that is being accomplished, in spite of the urgent demands for more buildings. The increase of pupils for the year 1913 over school year 1908-1909 is 186 per day and at this rate in all probability at the end of another five years the enrollment will be near 1200 pupils. To meet this increase, additional accommodations are now needed and will be needed in future. There is a present need of 5 or 6 more rooms and unless the means are provided to meet this pressing demand the cause of education in the city will be seriously handicapped.

"Those who have children to educate and those who are interested in the educational progress and development of the boys and girls of New Bern cannot afford to vote against the bond issue."

S. M. Brinson, County Superintendent of Schools and a trustee of the City Schools, says:

"The crowded condition of the grades in the city schools and the demand on the part of the people for educational facilities for their children—not to speak of the effect of the compulsory law—require more rooms for teaching purposes.

"There are various ways of providing the additional rooms, all of which will require a considerable outlay of money.

"A bond issue of \$20,000 (the limit which the Board of Trustees agree to in the event the bond issue carries) is not too large to meet the requirements of the situation.

"A visit to the present buildings will convince one of the urgency of the need of sanitary improvements which will call for the expenditure of several thousand dollars."

E. H. Meadows, president of E. H. & J. A. Meadows Company, and trustee of the City Schools, says:

"Upon thorough investigation of the crowded condition of the City Graded School owing to the city's increasing population, I find the present facilities are inadequate from an educational standpoint, as well as a sanitary one, and that relief from the congested condition that now exists, must be provided.

"Therefore I most cordially favor the proper means to meet the school requirements."

T. G. Hyman, president of the Hyman Supply Company and President of the Chamber of Commerce, says:

"I am very glad that I visited the white city schools last Tuesday. The crowded condition which makes a demand for another building is much more urgent than I had any idea of, before my visit.

"The action of the Board of Trustees in asking for increased facilities is to be commended, and I cannot understand how any citizen can oppose the proposed bond issue, if they will acquaint themselves with present conditions.

"An educated citizenship assures an enlightened and prosperous community.

"New Bern must provide adequate school buildings or take a step backward."

This 15th day of April, 1913.
J. R. MERRITT,
Registrar Fifth Ward.

A FEW POINTS IN FAVOR OF THE PITTSBURG VISIBLE TYPEWRITER.

There is not the least doubt but that THE PITTSBURG VISIBLE TYPEWRITER is the best low priced machine on the market today. It is durable, attractive and light. Its simplicity is marvelous. There are no complicated parts to get out of order. It is like an open book. If something clogs, you have only to make a few turns with a screw driver, remove the part causing the trouble, clean it off, replace and go ahead. It is the only machine in the world on which the set of type and type bars can be taken apart from the machine in less than ten seconds. This feature alone is worth many dollars as a time saver. It is the only machine now on the market with which twenty legible typewritten copies can be made at one writing. The ribbon control is automatic. The color change is simple and convenient. The back spacer and tabulating key are within an inch of the operator's hands when using the machine. The type are lined in a symmetrical row in front of the operator and are easily cleaned. Strong piano steel wires control the type bars and it is impossible for these to break. The machine is so constructed that the lightest touch or the vigorous pound used in heavy manifolding have the same effect on the mechanism.

Call at the office of the E. J. Land Printing Company and take a look at this wonderful machine. Price \$65.00 on the easy payment plan.

WHITE AND FIGURED CREPE DE CHINE CHARMINGLY COMBINED.

Two fabrics in combination are this season more fashionable than one material used all by itself. This girlish little frock for afternoon wear in blue is part of the trousseau of Miss Ethel Roosevelt whose marriage to Mr. Richard Derby recently took place at Oyster Bay. The tunic of scroll-patterned crepe de chine in green and pink tones falls over a draped white crepe de chine in skirt which is slashed to show a petticoat flounce of sheerest machine embroidery and net. The deep bertha and long sleeves are of the white crepe de chine.
