NEW BERNE, N. C., MARCH 29, 1883.

Entered at the Post office at New Berne, N. C., as second-class matter.

FACTS FOR CONSIDERATION.

The time will soon be here when the people of New Berne will be called upon to say whether or not they will sustain the Graded School, which has been so successfully conducted for the last six months, by voting a tax for its support...

New Berne must have a well-conducted system of public schools or she will not keep pace with the progress of her sister towns. Public education is now indissolubly connected with public progress.

The Graded School which is now going on here is "good enough for the richest, cheap enough for the poorest." In fact the system of teaching is the most thorough and the cheapest of any yet practiced.

Another thing to consider is, we need a building, one that will be a credit to the city, and the only way to build it at present is by voluntary contributions.

The whole thing is at last narrowed down to this question: "Is the Graded School of New Berne a public necessity?" Is any one prepared to take the negative of this question?

Ready Made Houses.

Within the memory of the present generation of men the "ready made" clothing business came into existence, and by degrees drove out the country tailors.

Cotton Seed Oil.

The following dialogue recently took place between the enterprising editor of the Athens (Ga.) Banner, who is devoting a good deal of his paper to farm topics, and one of the largest and most successful planters in the State.

"Why do you not urge upon the farmers of the country the importance of extracting the oil from their cotton seed?" asked Hon. James M. Smith, the mammoth planter of Oglethorpe, of us yesterday.

We replied by asking Colonel Smith to tell us all he knew in regard to the matter.

"You can get fuller information on this subject from Professor White than any one else, for he has analyzed seed both before and after extracting the oil and can tell you the exact value of each. He has clearly demonstrated, however, that both for a feed or fertilizer the cotton seed is worth more after extracting the oil than before.

"I have thoroughly informed myself on the subject and know what I am talking about. A bushel of cotton seed will yield one-half gallon of oil, which is worth at wholesale twenty cents. Besides this it turns out twenty-five pounds of meal, and putting this at the same price of guano, we have fifty cents worth of fertilizer or stock feed.

"Can you give us any estimate as to the cost of one of these mills?" we asked.

"Yes, for I have been writing for prices, with a view of putting up one myself. To get a mill in running order will cost about \$1,300; but they can and will soon be built cheaper.

"Where did you get it?" "Bought it at a hardware store." "What did it cost?" "Fifteen dollars."

"All right. I'll fine you \$10. That makes us even."

THE TERRIBLE BANG GIRL.

Distressing and Demoralizing Effects of Banging the Hair.

Bangs on a girl give her an unruly look, like a cow with a board over her face. You take the gentlest cow in the world and put a board over her face, and turn her out in a pasture and she gets the reputation of being unruly, and you would swear she would jump fences and raise merry blades, and you wouldn't give so much for her by \$10 only for beef.

Poor Teeth the Cause of Many Ills. It appears not to be generally understood, even among cultivated people, nevertheless, although the fact has been dwelt upon with emphasis by the best medical authorities, that the presence of carious, crowded, or asymmetrical teeth in the human mouth is the progenitor of a long train of nervous diseases, comprising not only facial neuralgia and its concomitant troubles, but diseases of the ear, in inflammation as well as functional, eventuating often in partial loss of hearing; defects of vision, naso-pharyngeal catarrh, and other tormenting maladies.
