contains an antidote for all malarial disorders which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

## A Warm North Pole.

The great question concerning the Arctic regions now is, whether or not there is an open sea around the North Pole. Lieut. Greely thinks there is, and a considerable number of Arctic explorers agree with him. The little American flag which was made for his expedition by Mrs. Greely has been unfolded to the breeze at a point about four hundred and fifty miles from the pole. If, therefore, the sea is open from near that latitude, several voyagers have already gone through most of the difficulties of reaching the pole. Mr. Joseph W. Cremin sends to the New York Herald a letter on this point which is as brief as it is ingenious. He agrees with Lieut. Greely that the sea about the pole is probably open, and for these curious reasons:

"First—In descending through a shaft or in sinking or boring an artesian well we find that the mercury rises in the thermometer one degree for about every fifty feet that we descend towards the centre of the earth. That would make a difference in temperature of about one hundred and five degrees in one mile, and in thirteen miles the difference would be one thousand three hundred and sixty-five degrees.

Second—The polar diameter of the earth is twenty-six miles shorter than the equatorial, therefore the North Pole is thirteen miles nearer to the intensely heated centre of the earth than places at the Equator. And as a difference in temperature of one thousand three hundred and sixty-five degrees, it appears to be impossible to conceive how water, which is heated by connection, could freeze so near the interior fires, and on a surface of such a temperature.

Third—The volcanic fractures in the crust of the earth in these northern latitudes prove its thinness and the close proximity of its surface to the heated interior.

From what has been stated and from the observations made at Discovery Harbor and Cape Sabine, proving that warmer water came from the north than from the south, it is almost certain that Lieut. Greely's theory of the open Polar Sea is the correct one.

It would startle the world to learn that the temperature of the North Pole is rather comfortable than otherwise.

# A CLEAR HEAD.

"One year ago I was induced to try AYER'S PILLS as a remedy for Indigestion, Constipation, and Headache, from which I had long been a great sufferer. Commencing with a dose of five pills, I found their action easy, and obtained prompt relief. In continuing their use, a single pill taken after dinner, daily, has been all the medicine I have required. AYER'S PILLS have kept my system regular and my head clear, and benefited me more than all the medicines ever before tried. Every person similarly afflicted should know their value. 122 State St., Chicago, June 5, 1882."
