The Election Returns. Much anxiety was felt throughout the day yesterday concerning the Presidential election. The vote in New York

and Indiana as indicated by our bulletins, is so close that it will probably require the official count to determine the result. Mr. Jas. A. Bryan received a telegram yesterday morning announcing that Cleveland had carried New York beyond a doubt, notwithstanding he had been cheated out of 30,000 votes in the city.

Later in the day Mr. R. G. Mallett received a telegram from New York with the same good news. In the meantime our bulletins indicated that Blaine was gaining and would probably carry the State by a small plurality. Several other private dispatches were received declaring that New York chances are in his favor.

complete than that we have gained in North Carolina. Two years ago we barely escaped defeat, to day we have a proud majority of 20,000. We elect every Congressman except in the black district. We have the legislature by a larger majority than at any previous election. We have carried more counties than ever before.

The majority on the State ticket is so large that it is difficult to estimate it. Our Congressmen have been elected

by good majorities. The fourth district has covered itself with glory. Gen. Cox will have near 5,000 majority-a compliment he well deserves at the hands of a constituency he has so faithfully and efficiently served.

#### Malarial Poison.

ROME, GA., May 23, 1883. In 1880 I came from the North to take charge of the gas works in Rome, as superintendent, and after the overflow which occurred in the spring following I was very much exposed to malarial poison, and in 1882 found my blood so contaminated with the poison that I was forced to give up business. I was treated by the Rome physicians without relief, they advising me to go North, which I did. The doctors North told me that my only hope was to return to the milder climate, and accordingly I came back to Rome, completely broken down and nearly a skeleton. My trouble finally determined in an abscess of the liver, and nearly every one (myself in-cluded) thought I was doomed to die within a few days. In this condition I was advised by a friend to take Swift's Specific, and I took it just as a drowning man would catch at a straw, but as soon as my system got under the influence of the remedy, the abscess came to a point and burst, passing off without pain. In fifteen days after this I was up at my work, and have since enjoyed xcellent health. Treatise on Blood and Skin Diseases mailed free.
