Spring time cometh and the balmy air of central New Berne is filled with the sweet fragrance of guano. This portion of the city ought to grow.

To-night the Graded School Library gets the benefit from Willoughby Reade's entertainment. All who go will enjoy at least one hundred and fifty hearty laughs.

D. M. Ferry & Co., Seedsmen, Detroit, Mich., have sent us a copy of their Seed Annual for 1885. It is more beautiful and valuable than ever. The hints on the formation and management of gardens, as well as the cultural directions it contains, have evidently been prepared by careful hands, and cannot fail to be of great service to all who garden, whether for profit or pleasure.

Those who go to the theater to-night will certainly enjoy a pleasant evening. Mr. Reade is a superb reader and never fails to make those who hear him laugh heartily. But more than this his reading is grand acting in its purest simplicity. In listening to his reading one cannot fail to learn a lesson in elocution which he can never forget. No one should fail to hear him to-night.

The Chattanooga Times says: "If it were possible to make people die with laughter, Prof. Reade could accomplish that feat."

Business Locals.

We are often asked to insert advertisements among our local reading matter. The JOURNAL has never liked the idea of trying to force people to read Dr. Burkhead was severely pounded advertisements, at the same time we desire to please our patrons as far as we can consistently with our own interest. Hereafter all local notices of a business nature will appear at the head of the first column on our local page under the head of "Business Locals," and all matter inserted under this head will be charged ten cents per line for the first insertion and five cents per line for each subsequent insertion.

When Brockett saw him he expanded his eyes to a wonderful size and swore (he will swear sometimes) it was a young sea-serpent. The oyster had been out of the water over two days when Brockett opened it and that queer fish had lived out of his native element all that time, and when he became acquainted with Brockett he was alive result of the raid was the arraigning of and kicking his tail, and apparently tionists have obtained complete possessine persons, six women and three men; satisfied and happy. It is susand one would suppose that he was of the catfish or eel family, but for his bottom of the uprising, and a general having no marks of family resemblance. He must have intruded into the castle of that oyster when he was a fishelette or minnow, for an oyster, never hospitable to strangers, always peeps out upon the outside world through a very small aperture, and having no armament of offensive or defensive warfare five dollars and cost for the second. Lawless Miners.

COLUMBUS, Ohio, Jan. 12 .- Last night news was received at the Hocking Iron and Coal office in this city that one of their mines at New Straitsville, known as No. 5, had been set on fire and was burning so fiercely as to be beyond control. Later reports confirmed the first accounts, and the mine is still burning. It is the largest mine in the Hocking Valley, and, it is said, in the world. It is ascertained that the party that set fire to the mine obtained entrance through W. P. Rend's mine, which is connected with No. 5, thus making discovery by the guards on the outside of the mines impossible. The fire was not discovered by the guards until about 4 o'clock Sunday evening, when attempts were

but without success. Later efforts were said to have been made to induce some of the Straitsville miners to assist in getting control over the flames, but no one seemed willing to lend a helping hand. An engine and some miners from Buchtel were taken to New Straitsville this morning, and it is thought that the force sent may be sufficient to master the fire.

made at once to extinguish the flames,

A rumor was current among the miners to-day that 125 cowboys had as sembled at New Straitsville, who would shortly make a raid on all the working miners. Guards are being doubled a the mines in the valley, and a crisis is near at hand. Mine No. 5, which has a capacity of 120 cars per day, had been closed for sometime, and it was supposed to be securely blocked at the mouth but entrance was gained by digging un-der or through the stone and wood

work. Attempts on the part of some guards to get at the burning mine were met with a shower of stones, and nothing could be done to extinguish the fire then. The Division Superintendent at Buchtel was ordered this morning to go up to Straitsville with a force of men to assist in closing up the burning mine to prevent further damage. No assistance for this purpose could be obtained at Straitsville. Col. Churchill, Treasurer of the Columbus and Hocking Coal and

Paris, Jan. 12 .- The Government has received news from Saigon of a slight agitation in Cambodia. A band of marauders had surprised a French military post. The Government has taken such action as the circumstances required. Another version of the Cambodian trouble is as follows: It is learned from semi-official sources that a serious revolt, headed by a brother of the King, has occurred in Cambodia. The revolupected that Chinese intrigue is at the massacre of the French at the military posts is feared. The King has tele-graphed that he is powerless to resist he revolutionists and a large force of French troops has been ordered to hold itself in readiness to proceed from Saigen to aid the King in restoring order and punishing the offenders.

Arsenic by the Pint. J. A. Smith, a Gainesville, Ga., merchant, says: "For years I was a victim to the combined effects of Erysipelas and an aggravated type of Eczema, that baffled all medical skill. I consulted the very best physicians in the United States to no good purpose. I gave every patent medicine that was recommended a faithful trial and received no benefit. I took large quantities of potash and a pint cup full of arsenic pills. The pat ent medicine, pills, and potash mixtures fed instead of curing the disease. They destroyed my appetite and wrecked my system—I lost flesh and energy—I lost three years from my business and spent \$2,000 in a fruitless effort to regain my health. At last when I began to consider my case hopeless, I commenced taking S. S. S., and in a short time I was entirely cured. I waited a year after a cure was effected, and continued to take Swift's Specific off and on as a sort of safeguard, before I was willing to make public this marvelous cure. Being assured beyond the possibility of a doubt that the cure was permanent, wrote this history of my case for the

benefit of my fellowmen. My skin is now as smooth as it was when a boy. I weigh more than I ever did in my life, and my general health was never better. I passed through last winter (which was an unusually cold one) without losing a single day from my business. For the last twelve months I have had no return of the ery sipelas in any shape or form, or any touch of eczema." Our Treatise on Blood and Skin Dis
